New bill to coordinate fed. agencies

By JOANNE SPAHR

WASHINGTON - A bill which provides for the establishment of a council to coordinate federal agencies and calls for the United States Department of Agriculture to get its house in order has been through final subcommittee hearings of the House Agriculture Committee and will now be marked up on Wednesday.

That bill, known as the "National Consumer Nutrition Information Act of 1978," (H.R. 11761) among other things will establish the National Nutrition Education Council. If formed, this council will review the 31 government programs such as Extension, the Office of Aging, Head Start, as well as HEW's nutrition education program and adult education program, and will come up with policy to coordinate them. At the present time these programs are not evaluated or coordinated, and have no national directors. There is also no connection among the programs.

Along with the review of programs, the council would have the obligation to oversee and review nutrition education programs and determine a method to evaluate them.

This 18-member panel will be made up of six government officials, four individuals involved in the food chain (such as farmers and retailers), four individuals involved in providing nutrition education (such as scientists and educators), and four consumers.

Along with the formulation of the council, the bill calls for the Department of Agriculture to coordinate its own nine uncoordinated programs. Within a year, the USDA will be required to report to the council what their own programs are doing.

The rest of this complex bill calls for the establishment of experimental programs and demonstration projects for the dissemination of nutrition education. These experimental projects will be aimed at reaching a large portion of the population on the subjects of diet, nutrition, and health.

Three types of approaches will be taken with these projects. One type will be community based programs, two of which will be rural. Another type of pilot project

The newly chosen officers of the Lancaster County Red Rose Future Farmers of America Chapter include: (left to right) Jeff DeLong, vice president; Stephen Hershey, treasurer; Anthony Eberly, president; Maxine Messner, secretary; Clifford R. Martin, reporter; and Clyde D. Peters, sentinel.

Eberly is Red Rose FFA leader

BROWNSTOWN -- Tony Eberly, a junior from Ephrata High School, was chosen to take the reigns of the Lancaster County Red Rose Future Farmers of America chapter on Thursday evening. The son of Mr. and Mrs. Mahlon Eberly, Denver R2, Eberly is also the president of the Red Rose 4-H Beef and Sheep Club.

Serving as vice president under Eberly in the county FFA organization will be Jeffrey DeLong, a junior at Solanco Senior High School. DeLong, the son of Mr. and Mrs. Henry S. DeLong, Peach Bottom R2, has previously held the office of reporter in his home chapter.

Holding down the position of secretary in the county organization is the only female officer in the group, Maxine Messner, from Garden Spot High School. Ms. Messner is the daughter of Mr. and Mrs. Ronald White, 58 Meadow View Dr., Leola.

In the treasurer's position is Stephen Hershey, from Manheim Central High School. Hershey, the son of Mr. and Mrs. Donald Hershey, Manheim R5, has previously held the same position in his local chapter.

A second FFA member from Garden Spot High School, Clifford R. Martin, East Earl R1, will take over the role of reporter. Martin is the son of Mr. and Mrs. Clyde W. Martin.

Rounding out the list of officers is Clyde Peters, Manheim Central, who is this year's sentinel. Peters is the son of Mr. and Mrs. Benjamin Peters, Manheim R6.

According to Eberly, who has received the star greenhand and star chapter farmer awards in his chapter as well as the FFA chain steer and chain gilt, earning the position as president of the county group is a goal he has held since a freshman. He has prepared for the role by holding down the same position and that of sentinel in his home chapter.

He is also part of the winning FFA area parliamentary procedure team in which he holds down the position of vice president.

DeLong has been named the star chapter Red Rose Farmer at Solanco and was part of the fourth place 1977 state dairy judging team.

Nitrite case soon decided in court

By KENDACE BORRY

ELIZABETHTOWN -- Hopefully, by May 1, a decision will be made on the use of nitrite in bacon. That's the word from Stephen F. Krut, representing the American Association of Meat Processors.

According to Krut, the meat industry had formed the Nitrite Safety Council to gather the information needed to satisfy the USDA about the use of the chemical in bacon. The response for bacon was sent in on March 17.

Covering all forms of research done on bacon concerning the use of nitrite, the report was 1½ inches thick. Now it is up to the USDA to come back with their response.

Krut stated that he suspects that the USDA is leaning towards allowing the meat industry to continue using the controversial chemical, with the addition of blocking agents, such as vitamin C and vitamin E. The use of these will cut down on the chances of nitrites forming nitrosamines, the reaction which the USDA has been concerned about.

It is to be remembered, as was reported in Lancaster Farming before, that nitrite is needed for curing meats such as bacon. It is used to protect against botulism. It gives cured meats their

Hogs being tattooed, sales remain steady

LANCASTER – Tattooing of market hogs at Lancaster County livestock markets is resulting in business as usual. In fact, hog marketings at Lancaster were up slightly from the week before for both Monday's and Wednesday's activities, and Vintage swine sales on Wednesday were up by 300 over a week earlier. New Holland's volume of market hogs dropped slightly, from 1592 head last week, to 1475 head this week.

Some packers had declared a week ago that they would not visit Lancaster County livestock auctions if market hogs were not being tattooed. But when markets opened on Monday of this week, the buyers and sellers were there and hogs were beng tattooed. Business went on as usual.

While tattooing of hogs is strongly recommended by the Pennsylvania Department of Agriculture, and demanded by a few packers in order to identify the origin of isolated cases of swine tuberculosis, the procedure is frowned upon by some buyers. The extra running around and slapping of pigs is a cause of stress resulting in a drop in quality of the meat, they claim. To operators of the market, the tattooing procedures mean extra expenses and more labor. But as one spokesman for a livestock firm put it: "We're willing to cooperate, we want to work with the producers and get this problem licked."

Last week one buyer reported having received 15 tuberculosis-infected hogs. They allegedly all came from the same farm. Without tattooing that

Hearing set for animal neglect case

By DIETER KRIEG

HARRISBURG -- The businessman from the Washington, D.C. area who has allegedly been underfeeding his cattle has been summoned by both the Pennsylvania State Police and the Pennsylvania Department of Agriculture to appear at a hearing on May 10.

The Department of Agriculture is charging James G. Angelaras, owner of the farm, and previous owner of the cattle, with violations of the Dead Animal Disposal Act. Specifically, Angelaras is charged with allowing dead animals to be on his premises beyond the time limits (48 hours) required by state law before the animal must be disposed of. The State Police will be pressing charges of cruelty to animals. In both cases, the underlying cause is alleged neglect to the extent that cattle died of thirst and starvation. It's a charge which is supported by various neighbors near the farm, located near Gettysburg.

To support its charges, the Pennsylvania Department of Agriculture's Bureau of Animal Industries has been conducting tests as well as collecting evidence and affidavits from neighbors who have been complaining

DEKALB BROWN & WHITE EGG LAYERS

Quakertown, PA. 18951
(215) 536-3155

HUBBARD WHITE MT. BROILERS

Deliverymen Dave Overholt, Bob Lytle, and Lester Moyer

MOYER'S OFFERS YOU A CHOICE!

We have different makes, sizes, and styles of delivery vans to fill different needs, for us.

And as a progressive poultryman, you should be able to choose the layer which best meets the unique needs of your operation.

DEKALB does offer you 3 'models' from which to choose - the DK-231, XL-Link, and the Sex Sal brown layer. do you need early maturity, extra large eggs, exceptional shell strength, high egg numbers, brown or white eggs?

We'd like the privilege of helping you decide which DEKALB layer is best fitted for your needs.

From mother to market, we formulate feeds and feeding programs with your profit in mind.

Does pork production represent a sizeable part of your income? Are you ready to devote an hour or so of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop feeding and management programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. Whether you farrow and finish your own pigs or buy feeder pigs. Your management practices. The health and overall condition of your herd. And other factors that have an effect on your profit potential.

With the aid of computers, we then design programs that can improve your profits by reducing expenses, improving performance, or both.

For example, many producers who switched from a competitive program to a Pennfield program have cut their feed costs and their hogs go to market sooner. In effect, the Pennfield program is putting more money in their pockets.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us. Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll free 800-732-0467.

THE OLD FARMER'S ALMANAC

APRIL 24-30, 1978

Longer light puts cold to flight.

Daylight Saving Time begins April 30 (set your clock ahead one hour before retiring on the 29th) Japanese Emperor Hirohito born April 28, 1901 Last quarter of the moon April 29 Average length of days for the week, 13 hours, 56 minutes . Zipper patented April 29, 1913 *Do not make a fence more expensive or more important than the thing that is fenced*

Ask the Old Farmer: In the days of steam locomotives, the railroad companies placed water towers at intervals for refilling the boilers How did they keep the water from freezing in the winter, especially during severe weather in northern states? W.S, Worcester, Mass.

From what we can find out (and the Lord knows old railroad men are scarce) they air-vented the water tanks by putting a good-sized pipe in, reaching from the bottom of the tank to above the water level It is claimed that with this arrangement the tank would not freeze solid

Home Hints: Remove indentations on rugs by holding a steam iron over them for a few seconds

OLD FARMER'S WEATHER FORECASTS

New England: Warm and sunny to midweek, then light rain

Greater New York-New Jersey: Clearing and warm to start, then some light showers

Middle Atlantic Coastal: Sunny and seasonal to start, then showers and cool at midweek, sunny and warm over the weekend .

Piedmont & Southeast Coastal: Heavy rain and cool, last part of week sunny and hot

Florida: Clear and hot to start, then seasonal weather with rain south for remainder of week

Upstate N.Y.-Toronto & Montreal: Warm east, cloudy and cold west to midweek, then partly cloudy with light showers, seasonal.

Greater Ohio Valley: Rainy, warm west, fair east, then very warm with rain central and north through weekend

Deep South: Rainy to midweek, then seasonal, clear and hot

Chicago & Southern Great Lakes: Sunny and seasonal east, cold west, warm, clearing, but showers northwest for weekend

EDITORIAL COMMENTS By DIETER KRIEG, EDITOR

Everybody wants a piece of country

Land.

That's the thing to have these days. It's valuable, gaining in value all the time, and precious for raising both crops and children.

Years ago it wasn't that way. Land was cheap and people would just as soon live in town. That's where the jobs, playgrounds, golf courses, clubs, and stores were. That's where the action was. The excitement, the fun, and the profit for business. Towns and suburbs were the places to be.

Things and times have changed now, however. The cities are decaying. Streets are dirty, children grow up surrounded by concrete, and welfare rolls are expanding. Youngsters who grow up with nothing to do are easy game for crime. Cities aren't the place to be anymore.

Land is where it's all at now. Those who can afford a piece of country are glad to call it home. The "country hick" of yesterday now has doctors and lawyers and architects and insurance men for neighbors. Their children have entire fields for playgrounds and they can enjoy a thoroughly different and refreshing world.

Shopping centers, schools, churches, and entire new "towns" have moved out to the country. There's a brand new appreciation for the land. And with it there's competition for its use and eventual ownership. Despite the upsurge in appreciation and competition, however, not much is happening in regard to respect for the land. Land -- the soil -- is still abused by both farmers and non-farmers. Conservation is a popular topic of discussion, and is diligently practiced by a good many of our farmers, but erosion still continues and farmland -- even the very best of it -- gets "slaughtered" for development.

That's why land is the thing to have these days. Aside from the noble reasons supplied by agriculture, land is the thing to have because it's as good as gold in most cases. While the dollar is sinking in value, and the economy in general is in a slump, and foreign products are displacing the "Made in the U.S.A." stuff, farmland is not only holding its own, it's considered a mighty attractive investment. Everybody wants a piece of country.

Joining Americans in their quest for land of their own are foreigners. According to government officials, no one really knows at this time how much of America's soil is owned by foreigners. But it is no secret that foreigners have been buying here, are looking to buy more, and incidents of that type are increasing rapidly.

The General Accounting Office in Washington has been asked by Congress to look into foreign ownership of American land. The fear in some circles is that foreign investors could gain enough control of land in some areas to have an impact on local conditions.

Even without foreign speculators, businessmen, and farmers eyeing good land in the United States, there's enough demand to keep prices up. That's significant since farm prices for some commodities such as wheat and other grains haven't been attractive enough to cause farmers to bid up land prices.

Although farmers -- particularly those near populated areas -- were rarely alone when it came to bidding up farmland, the farmers now have more "help" in that regard than they ever had before.

With that in mind, it's almost next to impossible for farmland values to stop escalating. Were we still back in "the good old days" when everyone except the farmer wanted to live in town, land prices would probably be going down now because of the economic squeeze so many farmers face in major agricultural areas of this country. Farmers can't afford to buy land at present prices. But others can, and so the prices stay high. In many cases they're out of line with the farmer's ability to pay.

Granted, some areas of the country are reporting slight drops in land prices. But that isn't expected to last. The fact that everybody wants a piece of country is holding prices up. The world has learned that land is where it's all at.

THE BIBLE SPEAKS

Internat onal Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

DOWN TO SAMARIA

Lesson for April 23, 1978

Background Scripture:
Acts 8:4-40.
Devotional Reading:
Acts 8:26-35

The serious student of the Bible who follows the scriptures with a map may find him or herself perplexed in reading that "Philip went down to a city of Samaria and proclaimed there the Christ" (Acts 8:4). How could Philip go "down" to Samaria when every Bible map clearly shows that Samaria was located North of Jerusalem?

Of course, if you have a topographical map or you have even been there in the Holy Land there is no dilemma. Although Samaria is indeed North of Jerusalem (and therefore "up" from it on a map), it is lower in elevation than the Holy City. Thus, anyone going from Jerusalem to Samaria would have to go "down" from a higher to lower elevation.

Multitudes gave heed

There was, however, another sense in which one went "down" to Samaria quite apart from any concerns of topography. In the eyes of the Jews Samaria was always a step "down." Although Samaria occupied roughly the area of the old Northern Kingdom of Israel, the Jews regarded the people there as a racially-mixed polygot of people whose racial and religious purity had been dissipated forever. So greatly did they look down on the Samaritans that, although it represented the most direct route North to Galilee, it was usually avoided by Jews who took the longer way around through the Jordan Valley.

When, during his ministry, Jesus traveled through Samaria on occasion and found some response from these people, his Jewish peers were scandalized, and probably his disciples as well. Thus, Philip's trip "down" to Samaria must have caused some apprehension in the early church. There must have been those who wondered why Philip couldn't have remained in Jerusalem and Judea and worked among more "deserving" people.

There was much joy

There was even some irony in the fact that it was Philip who went to Samaria. Philip was not an apostle, but simply a man who had been chosen along with Stephen and some other Greek-speaking Jews to provide for some of the early church's material needs. He was not chosen to do any preaching or teaching. He had no rank as an evangelist, yet despite his lack of high status, his results were gratifying: "...multitudes with one accord gave heed to what was said" (8:6). Furthermore, Philip was able to perform great miracles of healing and exorcism ther. Hardly the result one would have expected from a low-grade evangelist in a down-beat mission field!

Sometimes God has a way of making us come down from our lofty perches of prejudice and ego, showing us that he is in no way limited to the channels and parochialisms that seem to mean so much to us. There comes a time when each of us must go "down to Samaria."

NOW IS THE TIME

By Max Smith, Lancaster County Agricultural Agent
Phone 394-6851

TO GUARD AGAINST PARASITES

There are many kinds of internal and external parasites that infest our livestock population. All producers should make a special effort to control all of these pests. Stomach worms can be very serious in this part of the country because of the high humidity and the dense livestock population. A sample of the feces to the local veterinarian will reveal any infestation. At the present time we are aware that some hog herds have the problem of mange mite; this causes severe skin irritation and poor weight gains. Body lice are likely on all species of animals and should be eliminated. Parasites reduce vigor and profitable returns. Don't allow them to reduce your bank deposits.

TO BE CAREFUL WITH LEFT-OVER SEEDS

This time of the year we often have extra crop and garden seeds left; this is only normal and if they are stored properly, they can be used later this year or next year. Keep them in a dry place away from all weed killer sprays or dusts. The main thing is to be sure they are not eaten by the family or fed to any livestock. Most of the seeds have been treated with one or more pesticides to control insects or diseases; this makes them unfit for human or livestock consumption. All growers should be careful in not allowing these seeds to be consumed. They should either be used, burned, or buried. Don't leave them lying around the premises. They are dangerous to children, pets, or livestock.

THE CULL DAIRY COWS

The farm press has been suggesting the heavier culling of dairy cows in recent months. The abundant supply of milk at this time, and indications for greater supplies in the few months ahead, might support the suggestion. No doubt every herd might have several head that are not as efficient as others, which could be sold without hurting the net profit picture. In

COMMENTS FROM READERS

Dear Editor:

The failure of the Jeffords cow cull bill is that it offers a politically attractive handout instead of a much needed solution to a basic problem facing beef, pork and egg producers as well as dairymen. We (I fatten beef cattle) need larger markets. This means more demand and - if the government will leave our market alone - better prices.

The greatest food fad in our history - the low chloresterol diet - hurt us

DOES YOUR FARM EQUIPMENT HAVE DIESEL PROBLEMS?????

Contact us

MILLER DIESEL INC

Specializing in Diesel fuel injection pumps and injectors

6030 Jonestown Rd.
Harrisburg, Pa. 17112
717-545-5931
Interstate 81 Exit 26

In addition to our repair service, we offer a fast exchange system for fuel injection pumps, injectors and governors. Let us solve your diesel problems. You can depend on us for fast efficient service.

We welcome all farm equipment dealers business.

Figure it for yourself.

You're money ahead when you feed Milk Replacer No. 22.

Trying to figure a way to get calves off to a healthy start at less cost?

You're money ahead when you feed Milk Replacer No. 22. This high-energy product contains 20% fat and extra levels of milk sugar along with just the right balance of vitamins, minerals, and milk proteins — plus antibiotic.

For every 50 lb. bag of No. 22 you feed, you sell an extra 600 pounds of milk.

That's extra money in the bank, and your figures will prove it.

Build your own starter for less.
After two or three days on Milk Replacer No. 22, your calves will be ready for an 18% protein starter.

By using your own grain, soybean meal, and Vigortone's Kalf Ayd No. 23, you grind and mix your own starter for a lot less than commercial products.

Not only will your 18% starter ration be fresher because it's homebuilt, but it'll be highly fortified with vitamins, minerals, trace elements, and antibiotics — thanks to Kalf Ayd No. 23.

Your calves will do better, and your farm record book will, too.

Now is the time to compare.
See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's low-cost dairy feeding programs with any other you name.

Omaha Cattle

April 20, 1978

Compared with the previous week's close: slaughter steers through midweek were 1.50-2.00 higher, and heifers were 1.00-1.50 higher; much of the sharp advance was registered on Monday. Cows were 1.00-2.00 higher and bulls sold firm to 1.00 higher.

Four day receipts 12,400 as compared 18,000 previous week and 18,400 a year ago. Fed cattle prices again advanced sharply on modest marketings as continuing rains hampered livestock movement. Most buying interests were in need of cattle for immediate requirements, but were still somewhat on the cautious side in view of the poor ratio between live costs and carcass realizations. Late supplies were not sufficient to reflect the bearish conditions which developed at the wholesale carcass level. Most producers were reported quite current in marketings, and the latest 'Cattle on Feed' report was not considered bearish for the close-up supply situation. Slaughter steers made up approximately 41 per cent and heifers 41 per cent; several loads choice and prime were included, but much of the supply was good to average-choice. Cows made up 9 per cent and feeders 8 per cent.

STEERS: At midweek, load choice and prime 3-4 1257 lbs. 55.50, highest locally since early July 1975. Eight loads same grade 3-4 1144-1285 lbs. 54.75-55.00. Choice 2-4 975-1275 lbs. closed 53.00-54.50. Mixed good and choice 2-3 950-1250 lbs. 51.50-53.00. Good 2-3 47.50-51.50. Standard and good 2-3 45.00-46.50. Good and Choice 1200-1300 lb. holsteins 48.00-49.00. Good 45.50-47.00.

Average of LS-214, detailed quotations, for choice 900-1100 lb. steers this week 53.25; choice 1100-1300 lbs. 53.68. Average weight steers first three days 1132 lbs. as compared 1134 lbs. previous week. Average weight heifers first three days 974 lbs. as compared 983 lbs. previous week.

HEIFERS: Load choice 2-3 983 lbs. and small consignment choice and prime 3-4 1050 lbs. 53.50, modest volume same grade 3-4 967-1060 lbs. 53.00-53.25. Choice 2-4 875-1050 lbs. 51.00-53.00. Mixed good and choice 2-3 850-1000 lbs. 49.00-51.25. Good 2-3 44.00-48.50. Small lots standard and good 2-3 42.00-43.50.

COWS: Utility and Commercial 2-4 37.50-40.00. Cutter 36.00-38.00. Canner and Low Cutter 33.00-36.00.

BULLS: 1-2 1300-2100 lbs. 40.00-45.00, individual 1 46.00-47.00.

Oklahoma Cattle

April 20, 1978

Thursday feeder cattle auction: estimated receipts 5500, same day last week 4354.

Moderately active, feeder cattle and calves generally steady; majority receipts mixed Good and Choice and Choice 400-750 lb. feeder steers and 350-650 lb. feeder heifers; supplies include a liberal offering of cattle arriving from wheat pasture. Moderate attendance buyers.

FEEDER STEERS: Choice, few Prime, 300-400 lb. 66.00-70.50; 400-500 lb. 63.00-67.00; 500-600 lb. 57.25-61.00; 600-700 lb. 53.25-58.00; 700-800 lb. 52.50-55.00; few 800-900 lb. 51.50-52.50; mixed Good and Choice 300-500 lb. 59.00-63.25; 500-700 lb. 52.75-56.75; 700-800 lb. 51.50-52.25; Good 600-750 lb. Holstein steers 48.25-49.75.

FEEDER HEIFERS: Choice, few Prime, 300-400 lb. 54.00-57.75; 400-500 lb. 52.50-57.50; 500-600 lb. 50.00-52.50; 600-700 lb. 49.25-50.75; mixed Good and Choice 300-500 lb. 50.00-52.50; 500-700 lb. 47.75-50.00; Good 300-500 lb. 48.25-49.50; 500-750 lb. 46.00-48.75.

FOR THE WEEK: Compared to late last week, feeder steers generally steady; feeder heifers under 600 lb. unchanged. Feeder heifers over 600 lb. .50-1.00 lower with fleshy offerings at the full decline. Slaughter cows mostly 1.00 higher, late sales Utility and Commercial 2-3 37.00-39.75; Cutter 1-3 34.50-37.00; bulls generally steady, weeks sales YG 1-2 1000-1800 lb. 45.00-47.50. Salable receipts near 13,100 head compared to 10,381 last week and 14,806 head the comparable period a year ago. Dilapidated buildings, neglected fences, rusting equipment, and discarded farm materials strewn across the premises mark the Angelaras farm where dead cattle have been found. Both the Pennsylvania State Police and the Pennsylvania Department of Agriculture have summoned the owner to appear at a hearing on May 10.

Hearing set for animal neglect case

(Continued from Page 1)

about the alleged maltreatment conditions for more than a year.

Angelaras, who owns 10 farms in southern Adams County, sold his herd of cattle recently, allegedly because of mounting public pressures. But the cattle are still on his farms and are being taken care of by their new owner, Dale Yost of Littlestown. Yost and a brother own Yost Quality Meats, also of Littlestown.

The May 10 hearing has been set to take place in Magistrate Harold Deardorff's office, Fairfield. The Department of Agriculture will make its statements at 1:30 p.m., followed by State Police charges at 2 p.m. Gettysburg State Police troopers are expected to specifically charge Angelaras for depriving approximately 90 head of beef cattle "of necessary sustenance and drink" during the first two weeks of February, 1978.

The State Police conducted the investigation on the request of District Attorney Gary Hartman, who had read of the alleged negligence in the Gettysburg Times as well as received complaints from concerned citizens. Evidence collected during the subsequent investigation is deemed to be sufficient to bring charges against Angelaras, according to investigating Trooper Donald Blevens.

If found guilty of the charges being brought against him by the State Police, Angelaras could be fined up to $300, plus be charged for the costs of the hearing.

According to the Gettysburg Times, which has been reporting on the Angelaras case since January, the defendant paid $394 in fines brought by the Pennsylvania Department of Agriculture's Animal Industries Division in March and April, 1976, for improper disposal of dead animals on two of the farms he operated in Adams County.

Those charges were filed by Dr. William P. High of the Bureau of Animal Industries, Pennsylvania Department of Agriculture.

Angelaras, who owns a construction engineer firm and makes his home in Silver Spring, Md., hasn't been getting along very well with the people he used to lease some land from, either. He used to lease 120 acres from the National Park Service, but after they were dissatisfied with his

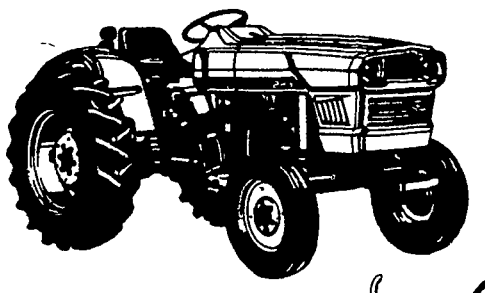
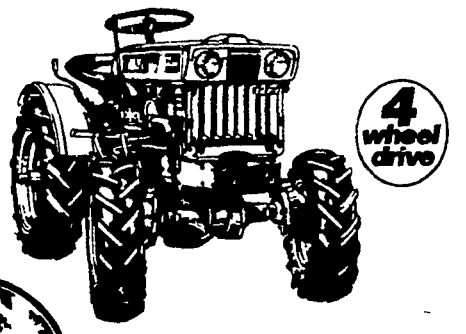
THE COMPLETE LINE OF IN-BETWEEN TRACTORS

KUBOTA TRACTORS

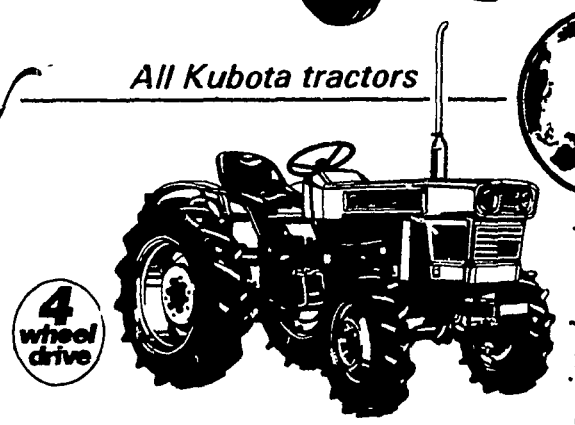
Model L285 w/ag tires The one compact with power and pull to spare. For versatility and ease of use, this power-packed 30HP, 4-cylinder compact is hard to beat. Perfect balance, exclusive spherical combustion chamber and high grade filters are some reasons for its fine performance. Plus PTO's, standard.



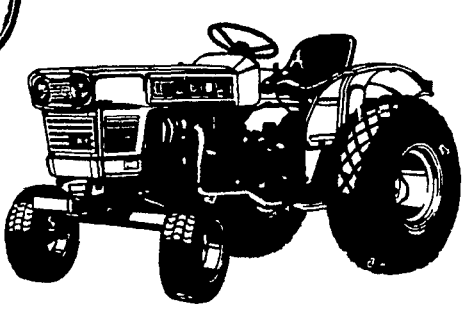
Model B6000C ... A complete, 12.5HP liquid-cooled, 2-cylinder diesel tractor. It's perfect for less than full scale farming. Features power take off and 3-point hitch, 8 speeds, 4-wheel drive, and a hefty hydraulic lifting system. Plus front and rear PTO's, standard.



All Kubota tractors are available. Many implements come with live hydraulics.



Model L245DT Here's more traction and versatility from the new Kubota line. Rugged, yet agile four-wheel drive model with outstanding traction and great lugging power. Powered by a water-cooled 25HP, 3-cylinder diesel engine. Implements are handled with ease by the powerful hydraulic lift system Plus PTO's, standard.



Model L185 Turf ...The tough, little tractor that doesn't act its size. For people who want more than a garden tractor Powered by a 17HP quiet, but powerful diesel engine 10 speeds, 8 forward and 2 reverse. Category 1, 3-point hitch with stabilizer Hydraulic system easily lifts up to 1,350 lbs Plus PTO's, standard

have a nice weekend...

Farm organizations unite in support of bargaining act

WASHINGTON, D.C., — The nation's general farm organizations, in a statement issued jointly on Monday, announced that they have united in support of federal legislation to require handlers of agriculture products to bargain in good faith with associations of farmers for prices and other terms of sale of farm commodities.

The statement was issued by the American Farm Bureau Federation, the National Council of Farmer Cooperatives, the National Farmers' Union, and the National Grange. Several other agricultural organizations are associated with the general farm groups in support of the proposed legislation.

The legislation, which spokesman for the farm group said will be introduced in the congress soon, defines "unfair practices" in the buying and selling of farm commodities and prohibits both handlers and associations of producers from engaging in such practices.

Spokesmen for the four farm organizations said the proposed legislation will facilitate the formation and the operation of farmers' associations in marketing and bargaining for prices of farm products. They said this should improve prospects for raising farmers' incomes, stabilizing prices and supplies for consumers, and increasing the efficiency of the marketing system.

The legislation was drafted in the course of a year-long series of meetings and working sessions attended by representatives of general farmers' organizations, existing marketing and bargaining associations, and other farm and ranch groups.

Guernsey breeder cited

PETERBOROUGH, N.H. - Raymond and Louise Witmer, Penn Del Farm, Willow Street, Pa. have received their tenth Gold Star Breeder Award from The American Guernsey Cattle Club. This award is based on high standards of milk and butterfat production, type classification and herd health.

The Penn Del herd had 60 cows that completed 63 records with a 305-2X-ME average of 13,190 pounds of milk and 632 pounds of butterfat. Fifty-four of these cows have a classification average of 80.1.

These production records were supervised by Pennsylvania State University.

Hearing Set

(Continued from Page 16)

treatment of both the land and animals, they terminated his contract. Conditions Angelaras allegedly failed to meet were the mowing of pasture lands, fertilizing and liming the soil, proper fence maintenance and acceptable maintenance of buildings. The government charged further that dead animals were not removed promptly and that the farms' manager was hard to find when Park Service officials wanted to talk to him. The defendant purchased his first farm in Adams County in 1967, and now owns 10 farms in the area.

The complaints of neighboring residents and reports by the news media have caused the issue to receive more than local attention. The presitigious **Washington Post**, for example, has been doing its own bit of investigation and printed a lengthy article complete with pictures of dead animals in its April 2 edition.

"The three cattle farms owned by James G. Angelaras in the lush, softly rolling countryside of Adams County stand out from most of the tidy farms around them," began Washington Post staff writer Barbara J. Katz in her opening paragraph. Then she described the farm as a picture of neglect. Her report detailed what so many had been complaining about: "... the dead cow ... like that one that started the complaints coming this Winter ... lying on the ground on one of the farms ... it lay near the roadway on its back, its legs locked at an angle, its eyes staring open.

Just how many head of cattle died on the Angelaras farms this past Winter is not known. Bill Bell, who runs an animal carcass removal service in Woodsboro, Md., acknowledges that he has removed "more than a dozen dead cattle" from the property this Winter.

FFA officers hold procedures drill

FREDERICKSBURG — Chapter FFA officers from Lebanon County schools drilled through parliamentary procedures Thursday afternoon, with each team striving to come out best in the judges' opinion. When all the motions were made and the seconded and the mock meetings adjourned, it was the team from Annville-Cleona High School that received the highest nod of approval.

Coached by Lowell Morton, the Annville-Cleona team of officers provided the judges with the smoothest proceedings. Team members are Reid Hoover, president; Ellis Meyer, vice president; Joe Harvatine, treasurer; Jeff Landis, secretary; Alan Graves, reporter; Alan Hostetter, sentinel; Darryl Landis, chaplain; and Bryan Burkholder, student advisor.

Second best, according to the judges was a team of officers from Northern Lebanon High School, with president Cory Bender in charge. Completing the slate are Mike Brajkovich, vice president; Tom Donmoyer, treasurer; Randy Behney, sentinel; Earnie Meily, chaplain; Tom Seaman, reporter; Greg Dunbar, secretary; and Paul Gibble, student advisor. Their coach is Raymond Bickel.

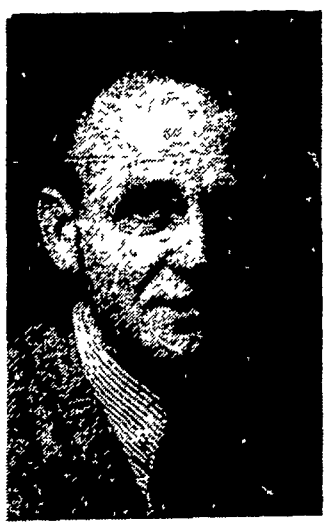
A team from Eastern Lebanon County High School placed third. Coached by Gerald Strickler, the slate of officers consisted of Vince Arnold, president; Bill Hoffman, vice president; Sue Ritchie, treasurer; Sue Heilinger, secretary; Ken Arnold, reporter; John Kline, student advisor; Glenn Wenger, chaplain; and Brett Eberly, sentinel.

Placing fourth was Cedar Crest's parliamentary procedures team, coached by Jay Lentz. The officers are: Dean Moyer, president; Ronald Brubaker, vice president; Mike Balsbaugh, chaplain; Gary Mase, sentinel; Roy Shirk, treasurer; Dawn Shirk, secretary; Jed Hoffer, student advisor; and Paul Miller, reporter.

Eastern Lebanon County High School's FFA team for parliamentary procedures was composed of, left to right, John Kline, Bret Eberly, Ken Arnold, Vince Arnold, Susan Heilinger, Glenn Wenger, Sue Ritchie, and William Hoffman.

Annville-Cleona's FFA Chapter provided the winning parliamentary procedures team Thursday when Lebanon County FFA teams competed for the honor. Team members are, left to right, Bryan Burkholder, Alan Graves, Reid Hoover, Jeff Landis, Darryl Landis, Alan Hostetter, and Ellis Meyer.

Congressional spending scorned



Norman Aamodt

COATESVILLE — At a regional Pennsylvania Farmers' Association policy meeting in Chester County, Norman Aamodt charged "Robert Walker's announcement that he returned $55,000 of his budget to the federal government was a blatant political deceit."

He charged that "Walker did not return $55,000; he simply did not use it. The $253,400 he did spend resulted in no legislation which would improve agriculture, improve the economy or effectively address inflation or the energy shortage. Rather, an additional $250,000 of tax papers money was spent on public relations, mailings, etc., which provided no significant responses to constituents problems; it was used for publicity to aid him in his re-election effort."

Aamodt went on to state that the family farm can be saved "by doing two things - by increasing the inheritance tax deduction level to an amount where, when the parents die, the surviving family can take the farm over without excessive debt burden; and by improving the existing markets for farm products and developing new ones.

"The inheritance tax revision would have wide support in the Congress because it would apply to family businesses and homes across the nation. Markets for farm products can be improved by first attacking the false notion regarding the adverse effects of eggs and dairy products on health and by developing an entirely new market for grains as fuel made from grain derived alcohol, as was demonstrated successfully in Nebraska last year."

Let us never forget that the cultivation of the earth is the most important labor of man.

Placing second in the Lebanon County FFA contest for parliamentary procedures was this team from Northern Lebanon High School. Team members are, left to right, Cory Bender, Randy Behney, Tom Seaman, Greg Dunbar, Earnie Meily, Paul Gibble, and Michael Brajkovich.

Parliamentary procedures team members from Cedar Crest's FFA Chapter are, left to right, Jed Hoffer, Michael Balsbaugh, Paul Miller, Dawn Shirk, Dean Moyer, Ron Burkholder, Roy Shirk, and Gary Mase.

RED TOP LIVESTOCK WATERERS

RED TOP CATTLE & HOG WATERERS

RUB-MOST HOG OILERS

Quality Doesn't Cost it Pays

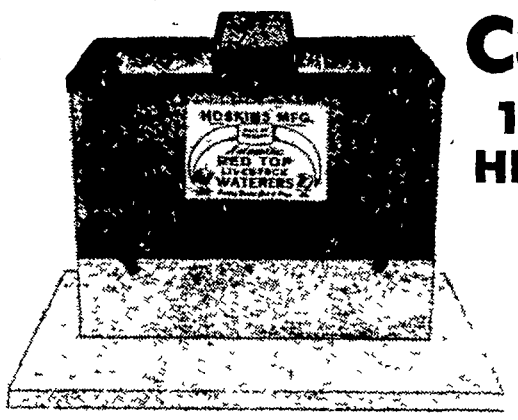
★ **A COMPLETE LINE OF LIVESTOCK WATERERS TO FIT YOUR NEEDS.**

★ **STAINLESS STEEL HAS MADE RED TOP THE NEW LEADER IN LIVESTOCK WATERING.**

STAINLESS STEEL TANKS FEATURE:

- Heavy Galvanized Frames.
- Electric or Gas Heat w/adj. Thermostat.
- ¾" Brass Bob Valves.
- 2" Brass Drains.
- Insulated with Expanded Polystrene.
- Large Service Doors.
- Tanks Slope to Drain.
- Strong 2" x 1" channel iron re-enforcement capping.

RED TOP CATTLE WATERERS



C36
16" HIGH

31 Gallon Stainless Steel Tank Provides for 75 to 125 head. IDEAL FOR FENCE LINE. 500 Watt Heat Unit. ¾" Brass Bob Valve.

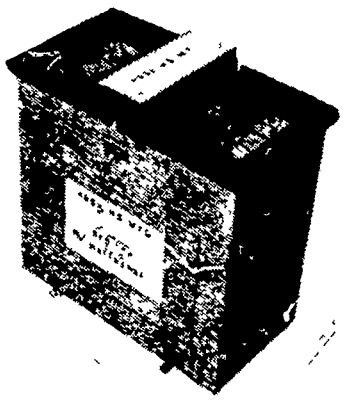
Length: 36" Width: 26"
Height: 16" Weight: 16" - 100 lbs.

SC32
16" or 26"

15 Gallon Stainless Steel Tank Handles 50 or more head of cattle, 100 or more sheep.
3/8" Brass Bob Valve. Heated with 500 Watt Unit. Can be ordered with valve on end.

Length: 32" Width: 20"
Height: 16" or 26" Weight: 16" - 90 lbs.
26" - 100 lbs.

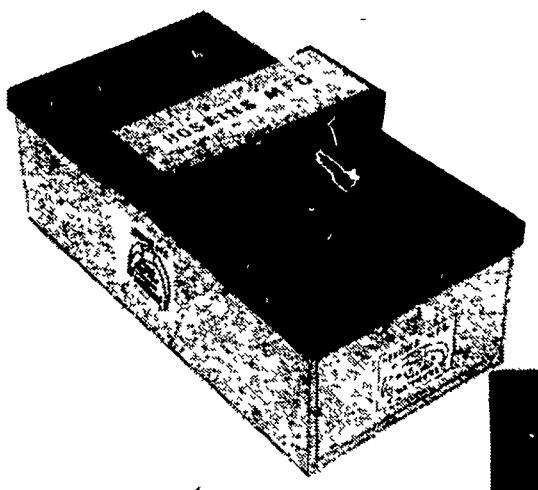
HC 14-26"
HORSE & CATTLE WATERER



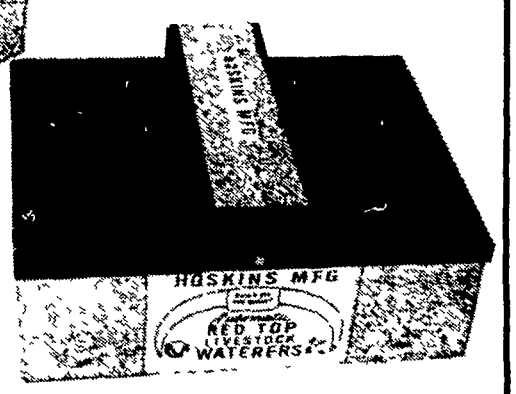
5 Gallon S.S. Tank
3/8" Brass Bob Valve
250 Watt Heat Unit
Ideal for fence line use.
Length: 28"
Height: 26"
Width: 14"
Weight: 85 lbs.

HOG WATERERS

UNIQUE DESIGN IN REMOVABLE MUD PANS IN ALL HOG AND COMBINATION WATERERS: PANS SERVE AS LID OR COVER FOR THE MAIN BODY OF WATER, LEAVES ONLY A SMALL AMOUNT OF WATER EXPOSED.



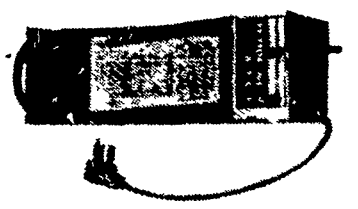
H9-28D
8 Gal. S.S. Tank. Serves: 15 Head. Length: 28". Height: 9". Width: 22". Weight: 70 lbs. 250 Watt Heat Unit.



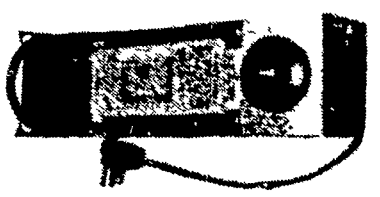
H9-14D
5 Gal. S.S. Tank. Serves: 100 Head. Length: 28". Height: 9". Width: 14". Weight: 55 lbs. 250 Watt Heat Unit.

ELECTRIC AND GAS HEAT

ADJUSTABLE THERMOSTAT - NO ELECTROCUTION DANGER ... Many times customers have said it costs less to heat with gas and do not have to worry about electrocution. It is a proven fact that it costs less to heat air than it does to heat water. We have done just that very thing with an electric space heater. Tests show that it costs 30 to 50 per cent less to heat a Red Top than competitive brands. We have also taken the worry out of electrocution as our unit does not touch the tank. It is with great pride that we say we have not had so much as one electrocution in 11 years. Test our competition against that record. You need not be an electrician or an engineer to remove the heater for service.
HEAT UNIT DOES NOT TOUCH TANK . . . Residues do not bake on tank!



A-250 Watt



B-500 Watt

RED TOP GUARANTEE

Customer satisfaction is guaranteed by the Hoskins Mfg. Co., Inc. They further guarantee that their products be free of defect in material and workmanship. STAINLESS STEEL TANKS CARRY 25 YEAR UNCONDITIONAL GUARANTEE AGAINST RUST, CORROSION AND NORMAL LIVESTOCK DAMAGE.

Storm water management seminar notes problems

By KENDACE BORRY

LANCASTER – Back in November of 1977, the Lancaster County Conservation District adapted a resolution on storm water management. They noted that stormwater runoff, having a definite impact on the physical environment, including changes in stream geometry, land erosion, siltation, stream turbidity, flooding and decreased ground water recharge, adversly affected the human life around the area. It could also cause damage to public and private property. Therefore, they decided to include storm water management as a new dimension to their erosion and sedimentation control program.

The effects of part of that resolution could be seen this week as 60 municipal officials and engineers met at a storm water management seminar, sponsored by the Lancaster Conservation District. Held at the Lancaster Farm and Home Center, the men gathered to learn of the problems of storm water management and possible solutions.

Most of the men came from Lancaster County but there was also representation from Berks, York, and Cumberland County.

The problem with storm water management occurs when land use is changed or the earth is disturbed, resulting in storm water runoff which leaves the property at a greater rate than that of before the land was disturbed. The increased runoff results in increased downstream flooding, floodplain enlargement, and streamland and channel erosion for frequent smaller storms.

The storm water management plan does not intend to provide flood control but hopes to cover the problem of providing protection against streambank and channel erosion as related to the increased runoff. This means that storm water management techniques are actually soil erosion control techniques to prevent streambank and channel erosion rather than techniques to control sedimentation.

According to Richard E. Laudenslager, soils engineer with the Department of Environmental Resources, understanding of the problems of storm water management and the terms used in explaining it, is one of the biggest dilemnas facing officials.

Richard E. Laudenslager

"In simple terms, with storm water the problem is this," he explained. "If you change the land, you change the amount of water that will run off. This can result in localized flooding, erosion, sediment damage to streams and property, and put an added strain on purification plants."

"Basically, urbanization is costing individual owners money. If you consider the farmer, storm water runoff is resulting in his machinery getting stuck in wet fields and the topsoil being eroded off."

Laudenslager, one of the speakers at the seminar, went on to explain that since the Lancaster County Conservation District decided to tackle the problem of storm water management, they have had many calls for help come in.

"They want to assist in solving the problems," Laudenslager noted. "And that's one reason for this seminar today. One of the first steps is letting the public know of the problem and solutions."

Another part of the conservation district's resolution deals with helping with favorable legislation in Pa.

"Right now there is a Senate Bill 744, which has passed the Senate and now is in the House Conservation Committee. It's a very encouraging bill, and will assist in letting local people establish ordinances on watershed planning. It's a planning tool, and will mandate watershed planning in munincipalities in the same basin. The DER will be the lead agency for such a program."

Speaking of the storm water management program offered by the Lancaster County Conservation District, Laudenslager related that he felt it was an "outstanding program", one with a good start and fine goals, one of the best he has seen.

"It seems that the farmer is always on the receiving end of the problem," he stated. "Urbanization and farming interests need to get together."

When asked if he foresaw this in the future, the soils engineer nodded yes. "It can happen," he stated. "You need to get their attention and establish credability, and then you can mediate on the problems which arise. This is what the conservation district is trying to do, and problems are being solved."

Adams Co. youth win art awards

GETTYSBURG – Four Adams County youth won art awards in a farm safety poster contest held by the Women's Committee of the Adams County Farmers' Association. Thirteen contestants entered 14 posters to be placed in county business establishments.

Elaine Stock, daughter of Mr. and Mrs. George Stock, New Oxford R2, was first prize winner in the senior division with David Donaldson, son of Mr. and Mrs. Guy Donaldson, Gettysburg R3, in second place.

In the junior division Danny Wilkinson, the son of Mr. and Mrs. Lawrence Wilkinson, Gettysburg R4, placed first, and his brother Eddie came in as second prize winner.

Judges were Mrs. John C. Bream, Cashtown, a former Franklin Township school teacher, and Nadine Waybright a student at Indiana State University, Indiana, Pa.

A planning meeting was held Tuesday at the Women's Committee Chairmen of the nine counties in PFA's Region II. The purpose was to plan for the regional ladies' day out to be held in July at Chilcoat's Restaurant, Reedsville near State College. The main speaker will be Pat Leimbach, an Ohio Farm wife, a lecturer, writer of two novels and feature writer for Farm Journal magazine. Her well known book is "A Thread of Blue Denim."

Mrs. Arthur Musselman, a member of the State PFA Women's Committee and Mrs. Lloyd Benner, co-chairman of the Adams County Farmers' Association Women's Committee attended Tuesday's planning session held at Chilcoat's Restaurant and announced July 13 as the date for the region's Ladies' Day Out.

Tough machinery for today's stepped up demands

Two rugged machines—a Model 21 forage box with steel sides/endgate, and a Model 270 manure spreader for wide, uniform distribution of manure—join the Kasten line

New Model 21...

a beefed-up box to haul beefed-up silage loads

A bigger and stronger forage box with steel siding and steel endgate Built for today's stepped up tempo in forage handling (bigger, heavier loads hauled faster). Either 18 or 15 ft floor length, the Model 21 is rated 8-ton instead of 6. New blade-type beaters tear loose stringy material for free-flowing forage. Full 16-inch auger discharge that users report works best

New Model 270 manure spreader for uniform, wide distribution

Blade-type beaters tear into manure for consistent shredding, uniform spreading. Cor-ten steel sides resist erosion better than carbon steel, one seam down the middle of floor instead of usual one on each side makes leak proof corners Low profile allows maneuverability under barn cleaner or manure bucket Heavy T-bar chain for greater tensile strength.

Super 121 Forage Blower for tall silos and medium size tractors

Blows up to 2 tons of haylage a minute to 80 feet high or more . then shoots material 10 feet across to silo center. Shoulder-level U-shaped bar for easy start of vee-belt drive. Push to start Pull to stop Curved paddle increases lift power, avoids wedging

Running gear with muscle enough for heavier loads

New 10-ton tandem puts six wheels on the ground. Rear tandem provides 5-inch vertical movement up or down. Even weight distribution permits 20,000 lb loads with increased resistance to twist and stress. Available in 6-ton, 8-ton and 10-ton 4-wheel models'

Mounted harrows allow planting after one pass through the field

Extra-long, chisel-pointed spike teeth penetrate deep without clod dodging to break crust...work out air pockets Pivoted clevis mount with chain pull to center eliminates side draft. Fits most mono-frame plows with standard brackets

the short line for the long haul

Bucking broncs have it easy, says rodeo owner

THE BUCK – Anyone who has worked with a large amount of horses knows that there will always be a few that won't cooperate. A horse trainer with an "outlaw" on his hands knows he is left with three choices- 1. continue working with the horse und risk being injured, 2. sell the horse for slaughter, or 3. send him to a rodeo producer as a prospective bronc.

Horses that are tried as rodeo broncs and make the grade lead an easy life, being bucked at rodeos about 30 times a year, and for only eight seconds each ride. They are well fed while on the rodeo circuit, and the remainder of the year they spend on pasture. With this kind of life, many of today's rodeo broncs are still bucking at 25 and 30 years of age.

A few prime examples of these outcasts from the domestic equine world can be seen at the Keystone Rodeo, May 6 at 2 and 8 p.m. at the Buck Tractor Pull stadium. Such names as Geronimo, Snowflake, Buckeye, Scooter, Stormy, and Preperation H will be on hand to try unseating professional bronc riders who are trying to obtain World Championship points in the American Rodeo Association as well as their share of the several thousand dollars in prize money.

David W. Martin, proprietor of the Keystone Rodeo, says that in addition to young horses which cannot be trained, many older horses that have gone "sour" find their way into the rodeo herd. These horses have found that by unloading the pleasure rider, they can get away with much less work.

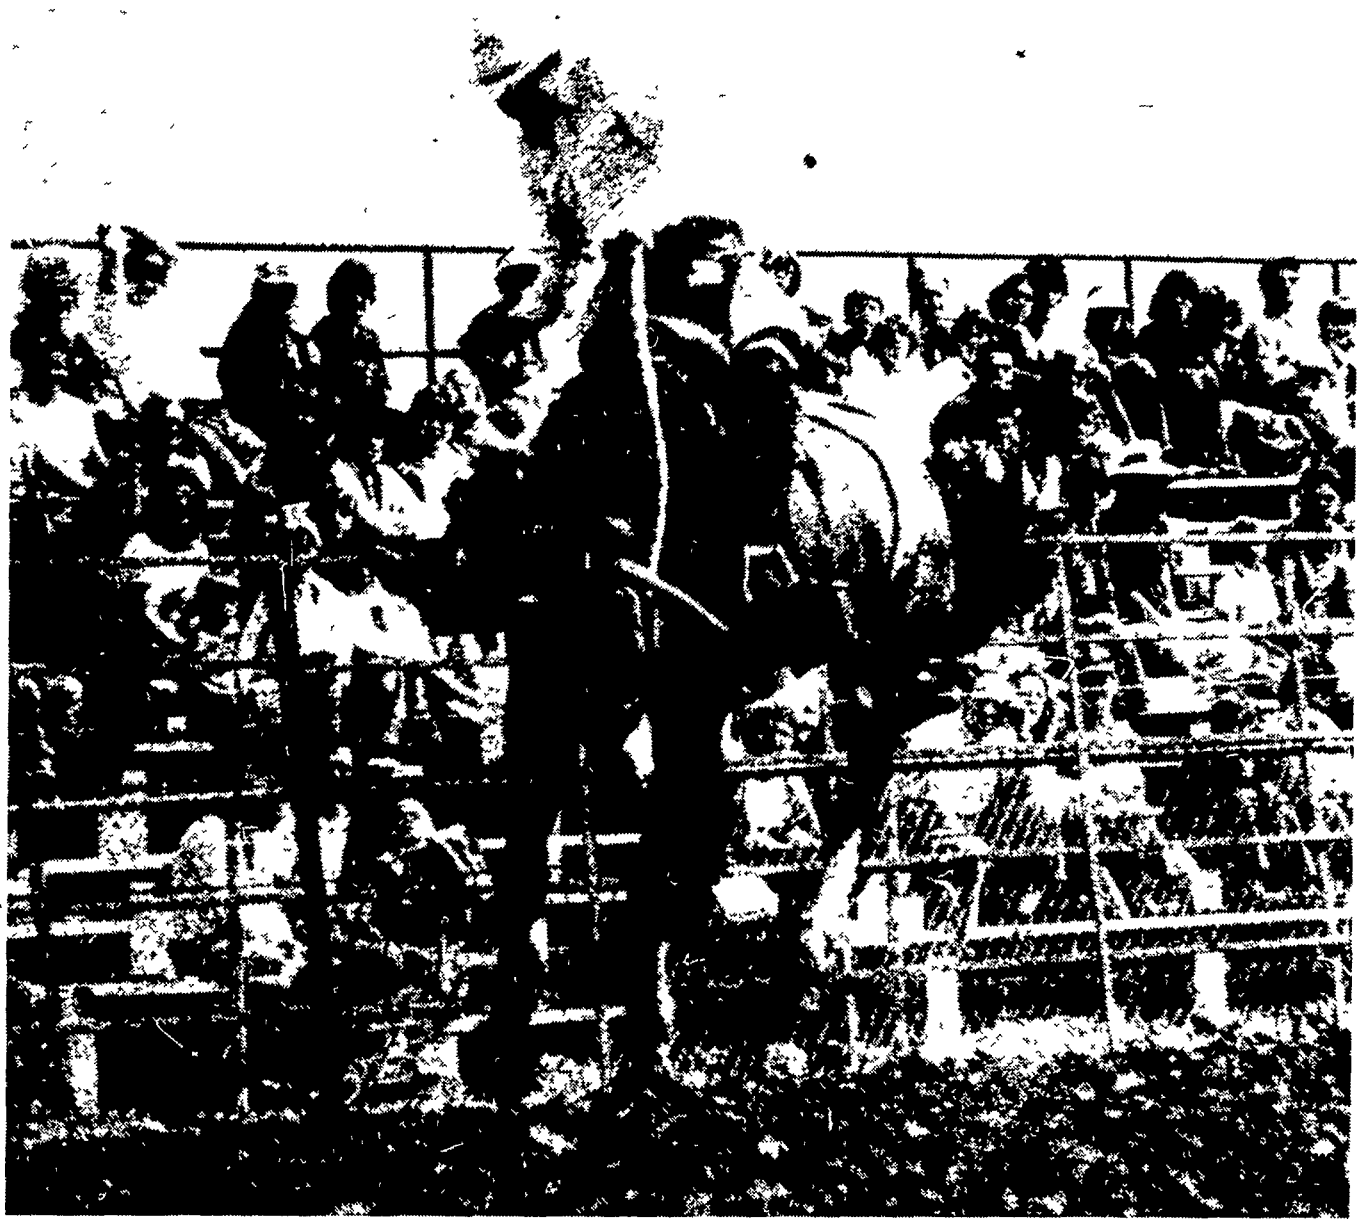
Some of these rodeo prospects are taken to sales where they are bucked and then acutioneed off to various buyers from rodeo compaines. The closest sale to Pennsylvania is held annually in Monroe, N.C., at the Union County Stockyards.

To get a horse that bucks consistently is not easy, contends Martin. A new horse is never taken to a professional rodeo without first being bucked at home to assure that he is capable of getting the job done.

Stock contractors have found that by placing an extra cinch just behind the back cinch of a saddle, most horses will try to kick out of it. This encourages a good bucking horse to kick even higher with his back legs and often sends the would be rdier over the head of the bronc.

Professional rodeo rules require that this cinch be covered with sheepskin for padding so that the horse is protected, and to add to the tickling sensation of the cinch. Sharp objects are never placed in this cinch. Contrary to misconceptions, this type of treatment would

(Turn to Page 22)



Joe Heller, Dallas, Tex., takes a shot at a bucking bronc in last year's Keystone Rodeo held at the Buck.

My Thoughts ...

And welcome to them

By JOANNE SPAHR
Assistant Editor

If it had happened to me this Spring instead of in April of 1960, I would have thought I'd had a brush with creatures from outer space. But, that was before Hollywood made the movie "Close Encounters," and way before I'd studied astronomy in college. So, as a result, instead of men from outer space, I thought, it was the boogeyman I encountered that night back 18 years ago.

It all happened as I innocently lay in bed one evening dreaming about the new bunnies that had just been born in our rabbit hutch. Just as I reached to pick up a cute little white one, a sensation which tingled my ears and seemingly rocked my bed, jarred me out of my sleep and nearly onto the floor. Needless to say, it also rendered me paralyzed with fear under the covers.

Although I'd never personally heard one before, I knew that if the boogeyman made any noise at all, that horrible piercing, bone jarring sound would be it.

Holding my breath, I carefully moved my eyes (without moving my head) in the direction of my closet. Hum, I thought to myself, the door was shut - he couldn't have come out of there. (Even though I'd checked the closet that night, as I religiously did for this creature which was known to eat little girls, I thought perhaps I hadn't been thorough enough.)

Still careful not to make a sound, I noiselessly shifted my eyes toward the hall, where I always contended the boogeyman hid after Mom turned off the light. Huh, I thought, no boogeyman, again.

Just as I was about to let out my breath and relax, another ear piercing noise tore past me, nearly flapping my earlobes as it ripped through my dark boogeyman-infested bedroom.

Opening my mouth, I tried to scream for my brother to come and save me. (Although I'd already decided he wasn't good for much, I quickly thought I'd give him another chance at redeeming himself.) But, even though I opened my mouth, nothing came out.

As I was ready to faint from near suffocation, I heard a rustling in the room down the hall where my parents slept.

"Wake up," I heard my mother yell, "The tobacco bed steamer's here."

The steamer, I thought. The steamer.

The more I thought about it, the madder I got. That joker had pulled the same trick on me the year before.

Traditionally arriving at our farm at 2 or 3 a.m., the coal stoked engine had a whistle that could have gone in the World Book of Records as the "loudest ever created."

And, just as traditionally as his early arrival, the steam engine operator would pull the whistle as soon as he pulled in the lane. This was to get his customers into action.

And, this year was no different than any other.

Irritated, but relieved, I lay down in bed to sleep and to return to my dream. And, when I finally did get back to dreaming about my bunnies, guess who was holding the one I'd dropped when the steamer made me awake -- you guessed it -- The Boogeyman.

Bucking broncs

(Continued from Page 21)

only make the horse's flank sore, and after investing an average of $500 per head, no rodeo producer will abuse that investment.

"Bucking horses keep bucking because they love it," says Martin.

"No one can train a horse to be a good bucking horse if he doesn't have the heart for it," he states. "The flank cinch will not make a horse buck. The desire to buck and the pride in unloading a rider has to be acquired by the horse through experience and natural ability."

As long as there are cattle ranches, rodeos, and cowboys, the old saying will stand the test of time..."There never was a bronc that couldn't be rode or a cowboy that couldn't be throwed."

For tickets to the Keystone Rodeo contact the Sport Center, Park City Mall; Mailman's, Manor Shopping Center, Lancaster, or the Queensgate Shopping Center, York, Shenk Brothers Sporting Goods, W. King Street, Lancaster; Willow Street Diner; Carris Market, Church Road, Quarryville; Cape Horn Corner, Red Lion; Benson's Leathercraft, Ephrata; and Maplehofe Farm Dairy Store, Quarryville.

Morton Buildings Do Double-Duty

BUY AND BUILD NOW — BE READY FOR HARVEST

A Morton Machine Shed with bulkheads installed is the most innovative idea in government approved flat grain storage. The sidewall bulkheads are 6' high designed to withstand pressures with grain peaked to trusses. The sliding door bulkheads withstand grain pressures when in place, yet are easily removed for access to building by equipment and machinery. Regular grain storage bins cannot be used for machine storage when empty, but your Morton Machine Shed can . . . it does Double-Duty!

TYPICAL EXAMPLES OF BUILDING CAPACITIES: (With 12'6" Sidewalls)
42' x 72' holds 18,600 Bu. +
48' x 81' holds 27,050 Bu. +
54' x 108' holds 47,440 Bu. +
(Grain height at sidewall 6' — Capacities will vary depending on moisture content, test weight and other variables

MORTON BUILDINGS' WARRANTY
- 5 Years Against Damage by Wind — Includes All Sliding Doors.
- 5 Years Against Roof Leaks.
- 5 Years Against Damage by Snow Loads.
- 5 Years Against Color Peeling.
- 40 Years on Posts.

Hershey was also named the star greenhand and star Red Rose farmer from his chapter as well as earning a district PCA project book award. His outside activities include catching chickens with MAPS poultry service from Manheim Central High School.

Miss Messner, among other things, placed first in the FFA area public speaking contest held this week. She has also won foundation awards in horse proficiency and dairy products processing.

Martin has also held the star greenhand and star chapter farmer honors from his chapter and won dairy foundation awards as well as honors for farm and homestead improvement.

Peters is another star chapter farmer and poultry production foundation award winner. He also earned a foundation award in public speaking.

Officer designations were made by a panel of last year's county FFA leadership team.

Nitrite case

(Continued from Page 1)

special flavor and appearance. Nitrite also enhances the flavor of the meat by retarding the oxidation which would otherwise cause an undesirable taste.

Stephen F. Krut

Krut noted that if the use of blocking agents in the process of making bacon becomes the law, new processes of meat curing will be needed.

"Techniques to add this process to making cured meats will have to be thought out," he stated. "Added procedures will increase the expense and time needed to cure the meat."

The American Association of Meat Processors is also in federal district court on another matter with the USDA at the moment.

"The case concerns whether the USDA has the authority to demand that a product be proven that it has no harmful effects." Krut explained. "What the USDA did, was flatly state that within 90 days the meat industry had to prove that nitrites were not harmful. We got a 60 day extension to the order, but we still beleive that they had no right to so order."

"The USDA believes that they can use the Delaney Amendment, which is for the Food and Drug Administration. That amendment states that if there is a trace of a harmful element in a substance, that substance must be banned."

Krut went on to say that if someone wants information or a study of an aspect of the meat business, that would be one thing, but what the USDA did was say that bacon was guilty until proven innocent.

"If the USDA wins the case, we still have our data already for them," Krut added. "If we win, we don't know exactly what will happen. All we want is some regulatory rules making decisions on what can be done."

"The USDA is feeling a lot of pressure right now," Krut went on to say. "They have to listen to the people who they represent. If bacon had been proven harmful it would have been different, but it hasn't. The USDA is no longer sitting on information, it has been released."

By April 28, the USDA has to respond to the charges made. Then the case will be decided.

"One thing of note though," Krut concluded. "In Canadian test, rats were fed a diet of 25 per cent bacon nitrosamines for 2½ years. After that time, they found no influences on growths on the rats."

THE IH® TWO-YEAR TRACTOR WARRANTY.

4386 Tractor

1086 Tractor

THE FINEST EVER OFFERED.

We're your Right Connection for a complete, two-year warranty on every IH tractor over 85 horsepower. That's every one of the popular, new Series 86 tractors, both two-wheel and four-wheel-drive.

This unique warranty covers every part on the tractor—every single one—except for the tires and radio, which are warranted by their own manufacturers. It's a complete warranty for two years or 1500 working hours, whichever comes first.

Compare other warranties. No other tractor warranty even comes close to this new IH air-tight protection plan. So why not come on in and make The Right Connection with the only tractors covered by a complete, two-year warranty? The finest ever offered.

Hogs being tattooed

(Continued from Page 1)

determination could not have been made and preventive procedures could not be undertaken. The Bureau of Animal Industries of the Pennsylvania Department of Agriculture is spearheading the drive to clean up infected herds.

xxx

Though the S.S. HOPE was retired in 1974, Project HOPE continues its medical education programs in land-based facilities in twelve developing areas on four continents.

Operators of livestock auctions, swine producers, and buyers are cooperating.

All Lancaster County livestock auctions are reportedly tattooing hogs.

Reports of findings of swine tuberculosis vary. Some buyers claim they have very little trouble with infected hogs, while others report significant percentages of infected carcasses.

In either case, the hog industry is concerned enough to cooperate in a program wich might bring the disease under control.

DER hearing set for May 3

HARRISBURG – Pennsylvania Department of Evironmental Resources will conduct a public hearing into proposed revisions to the Commonwealth's water quality regulations at Penn State's Capitol Campus, Middletown, on May 3.

In announcing this, the last of eight hearings planned throughout the state, DER Secretary Maurice K. Goddard said that sessions will be held both at 2 and 7 p.m. to give all interested individuals and groups opportunity to express their views on these proposals.

This hearing is for concerned citizens in the Department's Comprehensive Water Quality Management Program Study Area 3 which encompasses the counties of Adams, Cumberland, Dauphin, Lancaster, Perry and York and portions of Franklin, Lebanon and Schuylkill Counties.

Copies of the proposed revisions to the regulations governing "Water Quality Criteria," "Wastewater Treatment Requirements" and "Industrial Wastes" have been distributed by the Department to water discharge permittees, industrial and municipal officials, legislators, environmental groups and governmental agencies.

Additional copies are available from Water Quality Management Bureau Planning Section Chiefs in area DER Regional Offices -- Region II-South, 16 Angelica Street, Reading, PA 19602, telephone 215-378-4358; and Region III, 407 South Cameron Street, Harrisburg, PA 17120, telephone 717-787-9665.

The hearing will be staged in the Auditorium on the second floor of the Main Building at PSU Capitol Campus, Middletown.

Sheep & wool crafts shown at Md. festival

WESTMINSTER, Md. – Six Pennsylvanians will display their specialties at the fifth annual Sheep and Wool Crafts Festival to be held Saturday and Sunday, May 6 and 7, at the Carroll County Agricultural Center, Westminster, Md.

Coming from Waynesboro will be Jack Middour, to demonstrate pottery, and Claire Hunter, batik. Others who will demonstrate and display their crafts are Alexia Hunter, Mercersburg, card weaving; H. Trawitz, Troxelville, sheep skins and other wool products; Caroline Mack, Blue Ridge Summit, crotchet, and Bucks County Fur Products, Quakertown, sheep and other animal pelts.

Grounds will be open from 9 a.m. until 6 p.m. Demonstrations of various country crafts will enlighten festival goers.

White fleeces will be sold each day and natural colored fleeces will be auctioned at 11 a.m. Saturday. The Spring lamb show is scheduled for 10 a.m. Saturday, with a lamb sale slated for 1 p.m. Club lambs for 4-H projects also will go on the block.

Sunday's events include a "sheep to shawl" competition and the crowning of a new Maryland Lamb and Wool Queen. Sheep dog demonstrations will be held at 3 p.m. each day.

No admission will be charged and food will be available. Sponsor is the Maryland Sheep Breeders' Association, with Rae Nicholson, Hampstead, as festival chairman.

New soybean variety released in Maryland

COLLEGE PARK, Md. — Another new field crop variety from the University of Maryland has been named after a major river in the Old Line State. The latest is Miles, a medium-maturity, high-yielding soybean released jointly in April by the Maryland Agricultural Experiment Station and the U.S. Department of Agriculture.

Other new crop varieties with river names released in Maryland since 1971 include Wye soybeans and Potomac wheat.

Miles is the fourth new soybean variety developed and released during that time in which the Maryland Agricultural Experiment Station has participated. Besides Wye, the earlier new soybeans were Shore and Essex. The latter variety has done especially well as a late-season soybean in the Delmarva area.

Average maturity date for the new Miles soybean is one day later than Kent and one day earlier than Delmar, two other medium-season varieties. Designated as Maryland 71-407 during its three-year trial period, Miles includes Clark and a test variety from the South in its parentage.

At four locations in central Maryland and the Eastern Shore during 1976-77, Miles averaged about two bushels per acre more than Kent and seven bushels per acre more than Delmar.

Other tests at eight locations throughout the Mid-Atlantic area in 1975 showed a four-bushel-per-acre advantage for Miles over Kent, according to Dr. William J. Kenworthy, assistant professor of agronomy at the University of Maryland in College Park.

Mature plants of Miles are about the same height as those of Kent; but Miles can be distinguished from Kent because of its narrow leaf. It appears best suited for planting in narrow-row widths of 20 to 30 inches, Dr. Kenworthy commented.

Plants of the new variety have purple flowers, tawny pubesence, and tan seed-pods.

Individual seeds have a yellow coat, black hilum, and dull seed coat luster. The seeds are smaller than those of Kent, but they have a comparable oil and protein content. Overall seed quality of Miles soybeans is better than for the Kent variety, Dr. Kenworthy says.

Although susceptible to many of the same diseases of Kent, the new Miles variety does have better resistance to pod and stem blight and purple seed stain. It also exhibits less shattering loss at harvest-time.

Its yield advantage on sandy loam soils is still open to some question, however, the Maryland agronomist admitted.

In 1976, for instance, the test plots of Miles soybeans on sandy loam averaged 41 bushels per acre - almost eight bushels per acre more than Kent. But in 1977 the Miles variety averaged almost two bushels per acre less than Kent at the same location. Dr. Kenworthy hopes that one more year of testing will establish whether Miles soybeans actually have a yield advantage on sandy loam.

Also remaining to be tested thoroughly is the suitability of Miles soybeans for double-cropping under various soil conditions.

The available seed supply of Miles soybeans has already been allocated for 1978 by the Maryland Crop Improvement Association. Limited quantities of certified seed are expected to be available to farmers for 1979 spring planting.

Pa. Weekly Summary

(Continued from Page 15)

HOGS 7310: Compared to 7744 last weekend and 7683 a year ago. Barrows and gilts mostly steady. Good 65-120 wooled slaughter lambs 40.00-60.00.

New bill

(Continued from Page 1)

will be in graphic labeling, and a third will be in professionally produced public service spots.

The Poultry and Egg Institute of America states that it opposes the bill "to the extent that the guise of 'national policy' could be used to improperly limit or restrict the public's free exercise of dietary choice."

Richard Ammon, vice president for government regulations for PEIA, stated, "We oppose government dictated dietary selection, government mandated eating patterns, government guidance of consumer purchasing, and a government managed marketplace."

Rep. Fred Richmond (D-N.Y.), sponsor of the bill, has told **Lancaster Farming**, however, that the committee is not concerned with governing what Americans eat, as the PEIA believes. According to Richmond, it is not in the jurisdiction of the panel to make dietary or nutrition recommendations. Instead, he contends, these decisions should be made by a scientific panel.

Ammon also questioned a number of provisions in the bill. He has asked what type of nutrition information will be selected for the various demonstrations, TV commercials, and related projects.

National Dairy Council, on the other hand, endorses the concept of the proposed legislation. They do, however, voice concerns for establishing a long term council rather than the 18-month duration proposed; for a more broad-based involvement of representatives in the medical and nutrition research/education communities in the council membership; for the need to assure close coordination between the council and the USDA intradepartmental task force; and the need for adequate funding and longer time periods for the implementation of demonstration projects.

of organic materials only, those sold by Organic Center and others. I carry Agrispon and Soil Conditioner.

DANIEL FISHER, BLUE BALL, PA

717-354-0867

EXTRA HI-PRODUCING GRAIN-TRITICALE - a cross between wheat and rye 70 to 120 bu. per acre.
Twice the protein of wheat.
Higher total digestable nutrients (TDN).
Quick, high producing pasture, silage, greenchop.
A Spring variety seed for sale by Organic Center below.

ORGANIC VEGETABLES wanted in quantity starting in July to take to Tail Gate Market in Phila. 5 days a week. We are also finding large wholesale outlets in Phila. and Washington and Lehigh Co. for our surplus if needed. Persistant trying is finally paying.
NATURMIN M42G mineral car is due at R.R. station. 5% dis. off a car. Outstanding testimonials from livestock feeders for 1½ yrs. Healthier without medication. More production on less feed. Horses have more endurance, better quality hoofs for shoeing.
SUPREME QUALITY FRUIT & VEG. from using the same mineral above on the soil. It is rich in trace elements that helps the soil, livestock and humans. It is a rich natural deposit out of the earth.
ORGANIC ORCHARD wants family share cropper near Winchester, Va. Good fruit, good market. Mennonite church nearby.

AGRISPON™

NATURAL SOIL CONDITIONING IS THE FARMER'S PROVEN ANSWER TO MORE PROFIT.

IT IS SO ECONOMICAL TO HAVE NATURE'S FORCES WORK FOR YOU.

It saves much fertilizer and soil compaction.
It produces healthier, more pest free crops.
Then you save vet bills and pesticides.
It produces considerable higher protein and nutrition
Then you save on protein purchases

AGRISPON is a culture of micro-organisms, fungi and algae which stimulate and activate the natural soil life. It is natural and "God-intended" that nitrogen be drawn out of the air. Chemicals prohibit it. Agrispon restores the process and function, and releases a storehouse of nutrients, minerals, phosphorus and potash that were locked in because of chemicals. Test plots have shown it produces large crops equal to heavy applications of chemical fertilizer and often more. It is also an excellent seed treatment for quick emergence, fast start.
And only costs $6.50 an acre for all that.

"SOIL CONDITIONER" breaks up hard pan and subsoil and pulverizes top soil like a sponge.
Then it holds much more water for a drought, saves fuel and horsepower and lets the earthworms breathe and breed. And only costs $2.70 an acre for all that.

The above story is not just sales or rubber talk. Our customers are intensely proving it and have easy sailing compared to others. They get large crops with very little or no fertilizer. Their soil has become a natural factory. Until you get your soil life back, use some Fertrell fertilizer in addition to above products for bumper crops. It doesn't hurt your precious soil life, bacteria and earthworms.

DEALERSHIPS AVAILABLE for above products. Free literature.

Electronic marketing encouraged

WASHINGTON, D.C. – The U.S. Department of Agriculture will grant funds to states that devise practical approaches for furthering "electronic marketing" of farm products.

The concept is similar to an auction, with many buyers and sellers at distant locations particiapting in price negotiations. Computers and high-speed communications devices link them together.

USDA has invited state departments of agriculture to submit proposed projects for possible funding under its federal-state marketing improvement program. Barbara Lindemann Schlei, administrator of USDA's Agricultural Marketing Service (AMS), said other organizations–should channel their project ideas through the state agencies.

Ms. Schlei cited examples of electronic marketing now in use including an advanced computerized trading system for cotton in the southwestern United States, teletyped auctions for butcher hogs in Canada, and telephone auctions for market lambs and feeder pigs in several parts of the United States.

She explained that electronic marketing can broaden competition in the marketplace by allowing distant buyers and sellers to participate. "Prices of completed sales reflect the demand of many buyers and the supply of many sellers, rather than the bargaining strength of just a few traders," she said.

In addition to funding projects, AMS is planning a national symposium on electronic marketing. Its purpose, Ms. Schlei said, will be to bring together people interested in exploring various methods of electronic marketing, and to provide a forum for debating pros and cons of the concept.

A copy of USDA's policy on funding electronic marketing projects, including guidelines for submitting proposals, may be obtained from Dennis R. Henderson, staff economist, AMS, Rm. 3063-G, U.S. Department of Agriculture, Washington, D.C. 20250. Phone: (202) 447-7191.

Md. beef sale today

COLLEGE PARK, Md. – The eighth annual statewide sale of performance tested beef herd sires will be held today, April 22, at the Trout Indian River Farm salebarn. It is located two miles north of Walkerville on Dublin Road, Md.

The all-breed sale will begin at 1 p.m., with selling of the tested bulls expected to begin about 2 o'clock. Auctioneer duties will be handled by Morris Fannon of Pennington Gap, Va.

There will be only 13 tested bulls in this year's sale – eight Angus and five Simmentals. All are purebreds or otherwise eligible for registration in the herdbooks of their respective breed associations.

The 13 sale bulls are being consigned by nine breeders. Three of the consignors are Pennsylvania residents; the others hail from Maryland.

To find the sale site, one can proceed north of Frederick on U.S. highway 15 (Emmitsburg Pike). When seeing the Rhodeside Dairy Bar, turn right toward Walkersville on Biggs Ford road. After corssing the Monocacy river bridge, watch for a left turn onto Dublin road at the west edge of Walkersville.

An alternate route for Carroll and Baltimore county residents would be to head west on highway 26 (Liberty road) toward Frederick. At Ceresville, turn north through Walkersville on highway 194 (Woodsboro Pike). At Israel Creek cemetery, turn west on Devilbiss Bridge road. Follow this route to its intersection with Dublin road. Then go ¼-mile north to the salebarn at Indian River Farm.

One should not attempt to come from the west of Devilbiss Bridge road, as the bridge across the Monocacy river has never been replaced since it was washed out in 1972 during tropical storm Agnes.

Bob Butera has a ten year "perfect record"* of opposition to gun control

*Jim Spicer, columnist for Pennsylvania's *OUTDOOR PEOPLE*, reports in the April issue that Bob Butera has a "perfect record" of opposition to gun control.

The Pennsylvania Rifle and Pistol Association has released a letter announcing their "unanimous" opposition to the candidacy of Richard Thornburgh.

Bob Butera knows that the solution to the crime problem is in stiff, mandatory sentences for crimes committed with a deadly weapon.

Bob Butera is the one Republican candidate for Governor who has consistently fought for the sportsmen. Bob Butera — the one man with a "perfect record."

Purchase of development rights considered by conservationists

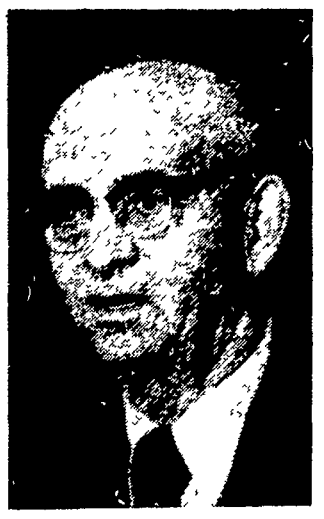
HARRISBURG — The Pennsylvania Association of Conservation Districts has called for a state policy to protect and preserve productive farmland, maintain family agriculture and its traditions of family life, conservation of the state's natural resources and preservation of open space for recreation.

It has proposed creation of a State and Municipal Agricultural Open Space Commission so that state and local governments may cooperatively administer an agriculture and open space program.

A key component in the proposal would be assignment of a $15 million half share of the state's one per cent real estate transfer tax to the commission for use in purchasing development rights of prime farmland. Half of the two per cent transfer tax goes to local municipalities. About $3 billion in sales are recorded annually.

Another component would be prohibition of the use of eminent domain in duly constituted land-use districts.

Lancaster County farmer and conservationist Amos Funk, a leader in the fight to preserve farmland, strongly favors the purchasing rights policy. Although the measure is controversial, Funk's viewpoint is gaining support. Joining him in favor of the idea are two Lancaster County legislators, Reps. Noah Wenger of Stevens and Gibson Armstrong of Refton. Both have come out stating that they will consider the proposal to use state real estate transfer taxes to buy development rights of prime farmland.



Amos Funk

Wenger is a member of the House Agriculture Committee.

Now is the time

(Continued from Page 10)

addition, beef prices are very favorable at this time and a good outlet for cows that have passed their best years. If this culling process could be done on a voluntary basis, it might be one way to help the surplus problem, and maintain the good price for the milk that is to be marketed.

TO TAKE THE PROPER TIME

According to the calendar, some farm operations are a bit behind schedule, but nothing real serious at the moment. I realize that it is quite normal to get in a hurry under these conditions and rush to get the work done. However, we point out that this extra speed might be a safety hazard and also, does not give farm machinery a chance to perform as it was designed. Too much speed on tractors and trucks is surely a safety hazard. Also, too much speed with grain drills and corn planters will surely result in poor stands and reduced income per acre. We urge that farmers take the time to do the job properly in the first place; good planning and good management is timely in order to avoid serious accidents and dissatisfaction with crop stands.

Letters to the Editor

Continued from Page 10

badly. The products we raise have been replaced in many diets by "low chloresterol substitutes." There is now a large body of expert opinion which believes that the diet-heart disease question is in disarray. In fact, the weight of eveidence seems to show that high sugar, low roughage food intakes may be the real culprit. Think how our cattle would do on this kind of diet. We seem to know more about feeding cattle than about feeding humans.

There is also considerable evidence to suggest that cancer rate is lower among people who do eat eggs.

I believe that the answer to improved prices for farmers is honest information regarding wholesomeness of farm products. Natural foods are better for humans than synthetic substitutes. when the consumer knows this, he will buy more of what we sell. Then we will have more profitable farm operations. We don't need more hand-outs, which in the long run mean more taxes, more regulations and lower profitability.

Sincerely,
Norman Aamodt
Coatesville

TRIPLE SUPER-POTASH

Pre-emergence tank-mix controls grassy and broadleaf weeds without carryover

Banvel®+Lasso®*

a giant first step toward total weed control in field corn

Successful on millions of acres where corn is the major crop, the Banvel + Lasso herbicide combination can give you "near perfect" control of a wide spectrum of grassy and broadleaf weeds, when used according to label directions.

Banvel + Lasso herbicide is compatible with most fluid fertilizers. It needs no incorporation. There is no carryover.

Take a giant step toward total weed control. Call about the Banvel + Lasso combination. Remember, the "near perfect" herbicide is the one you build...starting with Banvel herbicide...from Velsicol.

*The combination is effective on all major soil types, except light sandy soils. Lasso is a registered trademark of Monsanto Company.

To achieve best results, be sure to read, understand and follow the label.

Corn post-emergence
When it's down to:

Which are you using?

For post-emergence weed control in corn . . . what if 2,4-D doesn't work? Like on smartweed.

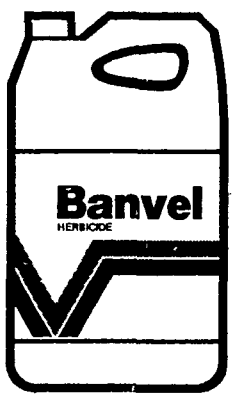
Banvel herbicide, used alone or tank-mixed with 2,4-D, controls more broadleaf weeds than 2,4-D used alone.

So think Banvel:

. . . When you first see smartweed, velvetleaf, ragweed, cocklebur, pigweed, sunflower, morningglory, lambsquarters, Canada thistle seedlings.

. . . When you're planning to rotate to wheat or oats in the fall or soybeans next spring . . . because BANVEL DOES NOT CARRY OVER.

Your ag chemicals dealer has your supply. Any questions? Call free of charge on the Velsicol Herbicide Hot Line: 800-621-4129 (Illinois callers: 800-972-8381).



Before using any pesticide, read the label.

Brock exclusive features enable you to store grain until the price is right, without danger of rain spoilage, wind, or snow damage, or bird and rodent infestation. Brock bins are safer, stronger, more durable . . . and good looking too!

Grange fears milk production costs

HARRSIBURG – The Pennsylvania State Grange has warned that spiraling production costs could eventually have "harmful effect" on milk production in Pennsylvania, the nation's fifth largest milk producing state.

In testimony presented at a Milk Marketing Board hearing, Feryl Treichler, of the State Grange dairy committee, pointed out that the spread between production costs and the price paid Pennsylvania farmers for milk has narrowed from $2.05 a hundredweight in 1975 to 65 cents a hundredweight at the end of 1977.

"That is just a little more than a penny a quart," Treichler told board members who heard testimony regarding producer prices in Area 6, the Board's West Central Milk Marketing Area.

In his testimony Treichler explained that the dairy farmer's margin between price received and cost of production is an average for the entire state. He added that the spread "varies considerably" in the three milk sheds of the state.

Last year in the Philadelphia milk shed, the spread was $1.02 a hundredweight, down from $2.53 in 1975; in the New York milk shed it was 23 cents last year compared to $1.51 in 1975; and in the Pittsburgh milk shed the spread between costs and price was eight cents a hundredweight compared to $1.34 in 1975.

The figures he added, were based on statistics on the Special Dairy Report published quarterly by the Pennsylvania Crop Reporting Service.

Treichler also included cost comparisons submitted to the Grange by dairy farmers in Area 6. He also explained that, in addition to recognized increases, "hidden costs" are causing additional trouble for dairy farmers.

As an example, he cited a dairy farmer who reported the price he paid for 10-20-20 fertilizer this spring - $146 a ton - is the same as he paid in 1976. But in 1976 the fertilizer was delivered to his far; this year he had to truck it to his farm from a plant 50 miles away.

In concluding his testimony, Treichler stated that the Grange "fears that continuation of these trends could have a harmful effect on future milk production in Pennsylvania. We hope that you will give serious consideration to all of these factors in reaching a decision that will be beneficial to producers and consumers alike."

If your stomach is a bubble
Stay away from chemistry
try with milk - the natural way.
Parties sometimes make you sick
Get some milk - it helps you quick.
Acid makes your stomach sick
Milk for fast relief is slick.
Milk will make you so much better
In the changing April weather.

Farmers want highest land prices

LANCASTER – One group of both farmers and developers in Lancaster County gave planners the same message at a meeting this week. They agreed that farmers should be allowed to sell their land to the highest bidder.

The meeting took place in Manheim Township, Lancaster. Again and again, farmers said they would not consider selling their land at a reduced profit if the sale was to a young farmer rather than a developer.

Developers at the meeting stated that the undeveloped acres located within the township's boundries are needed to house the growing population of the area.

The meeting was held to consider how to use the township's "open space", most of which is farmland.

"People who choose to live in a suburban area should pay for their benefits," said Gerald Fox, a former Manheim Township commissioner.

Fox and several other residents objected to suggestions that farmers sell their land for lower prices just to insure that the agricultural areas continue.

"This is their retirement," Fox said of the farm sales.

Nelson Rohrer, a young farmer from Hinsecker Road, commented, "Basically, it comes down to one thing – money.

"When farming pays, you won't have to worry about the land; there won't be all these people in the township," he said.

Fruitville Pike farmer John Crider said, "I'd like to see my farm locked into agriculture. In protecting farmland, you're also protecting pure water."

The county's purchase of development rights of farmers may be a solution, Crider said.

If the county could pay him for keeping the land agricultural, Crider said, he could afford to sell his farm to a farmer rather than a developer.

When one township woman asked if farmers would consider taking a reduced profit for their land, a farmer replied, "Probably about as much as the average homeowner."

Builders also spoke for development of what they admit is prime agricultural land.

"We need housing," said one developer, who asked the planners to revise zoning requirements that "take up a lot of space."

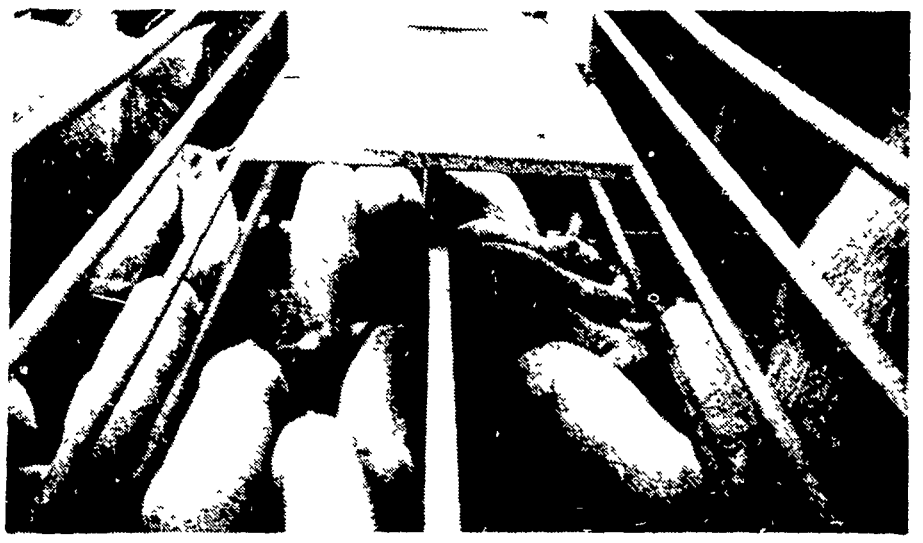
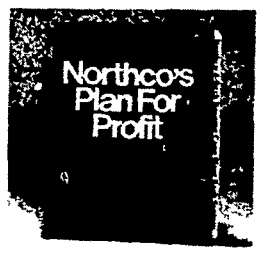
HOW LONG SHOULD A FARROWING CRATE LAST?



Over the years, there's one thing in particular farmers have told us they want from a confinement system: DURABILITY to last long enough to return their investment many times over.



So we've built our systems to do just that. We installed the farrowing crates pictured in this ad six years ago. They ought to be good for at least another six We set up our first confinement farrowing systems in the 60's. They're still in operation today.
When you price a confinement finishing, farrowing, or nursery system, remember this·
WHAT A SYSTEM COSTS DEPENDS UPON HOW LONG IT LASTS.
Send for your free copy of "Northco's Plan for Profit." It contains complete information on Northco's hog confinement systems They're built to LAST.

Life on the farm

By Dieter Krieg

Two Guernsey bulls were on the farm Dad rented during my mid-teens. The older one, named Dynamite, had been herd sire for several years. The younger one, not yet fully matured, but old enough to earn his feed, was named Firecracker. Both were creampuffs most of the time and usually went back into their corner at the sound of "boo". But there were exceptions, especially with Dynamite, who had a voice which lived up to his name and muscles which could if he felt brave.

My Dad, who has lots of experience in raising and caring for bulls, including numerous "close contacts", occasionally lectured us on the dangers involved in handling these animals. But at the same time he always stressed how important it was not to ever show fear in their presence.

Whenever Firecracker or Dynamite decided to go courting in the Holstein pasture, (that was a definite no-no) they were promptly chased out. We raced around until I'd finally caught his tail and left him pull me along. Usually he would cross back over to the Guernsey pasture about the time I ran out of breath.

Besides my not showing any fear, what Dynamite and Firecracker didn't know was that they were dealing with the young buck who during later years in high school became known as the long-legged German. That doesn't necessarily mean this individual was faster than a speeding bullet, but he had plenty of endurance.

One day the neighbor's bull came to visit our cows, and seeing that, I kicked off my boots and put my legs in gear. As usual, the intruder acknowledged my superiority - even though it was nothing but a bluff. This psychological strategy always worked.

The bull and I took a few laps around the pasture - it was merely routine anymore. We jogged along the fence, following it for huundreds of yards at a time. No sweat. Muhammad Ali should see this kid on his feet.

All of a sudden that horned beast in front of me decided to call for a showdown. Within a wink I faced his head instead of his rear. I dove through the barbed wire fence, tearing my shirt and pants. Luckily, the neighbor's bull decided not to follow.

Looking back at such idiotic experiences today, I wonder how I was ever stupid enough to chase a bull in the first place. My guess is it's a part of life on the farm for the teenager who is eager to test and prove his abilities.

Farm Calendar

DIAMOND AUTOMATION
AND
E. M. HERR EQUIPMENT CO.
INVITE YOU TO ATTEND
A SPECIAL EXHIBIT
OF
POULTRY EQUIPMENT
IN THE LANCASTER AREA

In response to the heavy interest in our new cage systems which were introduced at Southeastern in Atlanta for 1978, we thought you would be interested in hâving a chance to see them in a relaxing atmosphere closer to home.

Particularly, you might be interested in viewing the new 4 high Compact Reverse Cage System or the new, Triple-deck Layer Unit having no mechanical chute scrapers or outdated metal dropping boards. For Diamond's new cage systems, you now have a choice of four different feeding systems.

With the present popularity of Diamond's 3-Tier Starter/Grower System in the Pennsylvania area, this system will also be shown. Its unique design features which take advantage of the most economical energy saving, heating system may be of particular interest to you.

A new low profile 35 C.P.H. Farm Packer will also be shown as well as our popular 80 C.P.H. unit along with a slatted elevator for raising or lowering eggs on a cross egg collection system.

WHERE AND WHEN:

THURSDAY, APRIL 27, 1978 — 9:00 a.m. until 8:00 p.m.

Dwarf tomato becoming popular plant

UNIVERSITY PARK – Dwarf tomatoes are becoming one of the most popular plants for home gardeners–offering fruit and ornamental value both indoors and out, Says John W. White of the Department of Horticulture at Penn State.

Dr. White has studied dwarf tomatoes as food-producing potted plants over several years at University Park. He said the key ingredients are sufficient sunlight and warmth, a proper container and good soil, adequate moisture, and fertilizer.

"For many hobby gardeners, success with dwarf tomatoes has come with new varieties, prepackaged soil mixes, peat and plastic pots, time-release fertilizers, and lighting fixtures," Dr. White commented.

He noted that several dwarf tomato varieties are suited to containers. These include ones such as Sugar Lump, Patio, Pixie Hybrid, Lollipop, Small Fry, and Tiny Tim. Depending on the variety, mature dwarf tomato plants range in height from 12 inches for Tiny Tim to three feet for Sugar Lump and Small fry. The others are in between.

The best ornamental effects in hanging baskets, as well as good yields, are possible with varieties such as Yellow Pear, Sub-Arctic Cherry, and Toy Boy.

A dwarf tomato plant, he said, needs the soil volume of at least a half-gallon milk carton, a two pound coffee can lined with plastic, or a half-gallon plastic bleach container. All containers need some type of drainage for excess water to run off. If a container does not have drainage holes, punch holes in the bottom and put a one-half inch layer of small stones or gravel in the bottom.

In most cases, the best soil is a top-grade, name-brand potting mix, Dr. White suggested. As next best, he recommended a mix of equal parts of coarse builder's sand, peat, and vermiculite–with a pinch of slow-release fertilizer added.

Drawf tomatoes should be started in shallow containers such as egg cartons and then be transplanted to the half-gallon containers mentioned earlier, after the first true leaves appear.

Watering of the seeds and tiny seedlings should be done from a saucer or basin, using warm water. The water should move up through the drain holes to saturate the soil. If commercial potting mixes are difficult to wet, add two drops of liquid dishwashing detergent per quart of water. The detergent makes the water "wetter," he explained.

Like all tomatoes, dwarf plants need plenty of sunlight. This generally makes a southern window the best location for tomatoes grown indoors. If the plants are tall and spindly, they are not getting enough light. A florescent lamp of cool-white 40 watts, located about eight inches above the plants, can substitute for sunlight over a 12 to 18 hour day.

"A well-prepared soil mix contains the fertilizers that plants need for the first three or four weeks of growth. Then nitrogen and potassium should be added, either with water each week as a time-release pellet or as an organic fertilizer. Follow the instructions on the container," he advised.

"If the leaves become smaller and lighter green as a plant ages, then nitrogen is lacking. On the other hand, if a plant wilts when the soil is moist, too much fertilizer may have been added."

The most important step in watering full grown drawf tomato plants, he declared, is to add enough water at the top for some to run through the bottom of the container. The excess water keeps unused fertilizer salts from accumulating in the soil. If a mold or green slime develops on the soil surface, it is being kept too wet. If the plants wilt or the soil shrinks away from the sides of the container, the soil is too dry. Where soot or dirt accumulate on the leaf surfaces, the leaves can be sprayed occasionally with lukewarm water.

As for insects and diseases on dwarf tomato plants grown indoors, check pesticides recommended for tender ornamental plants for suggested use on tomatoes. Where dwarf plants are grown indoors, one should apply standard pesticides. All instructions on pesticide labels should be followed carefully. A four page leaflet, "Growing Tomatoes and Eggplant in Home Gardens," is available from county offices of the Cooperative Extension Service or from the Mailing Room, 112 Agricultural Administration Building, University Park, Pa. 16802.

New 4-H program started in Berks Co.

LEESPORT – More than 20 Berks County teenagers will participate in a new 4-H public affairs leadership program beginning today, April 22, 1978, at the Berks County agricultural center. The all-day Saturday session will be the first in a series of three public affairs workshops sponsored by the Berks County Cooperative Extension Service of Penn State University. The overall goals of the program are to teach a process of group leadership, to develop an awareness of community services and operations, and to motivate participants to become future community leaders.

Participants representing all areas of the county will spend the Saturday morning session learning leadership skills. The afternoon will be devoted to community and local government operations including a simulation exercise entitled "Our Town."

The 4-H public affiars leadership program for older Berks County teenagers is the pilot program in the state. If the project is successful in Berks County, it will become the model for similar programs throughout Pennsylvania.

Farm brings $5200 per acre

NEW HOLLAND – A 40-acre farm with a milking parlor and tobacco shed was sold here Thursday for $208,000 or $5,200 per acre.

The farm is one block north of Route 23 and borders on North Kinzers Avenue and East Bruce Road.

It was sold by John E. and Mildred M. Campbell to John Z. Lapp of New Holland.

Auctioneers were Robert E. Martin of New Holland R3 and Frank L. Steller of Leola.

have a nice weekend...

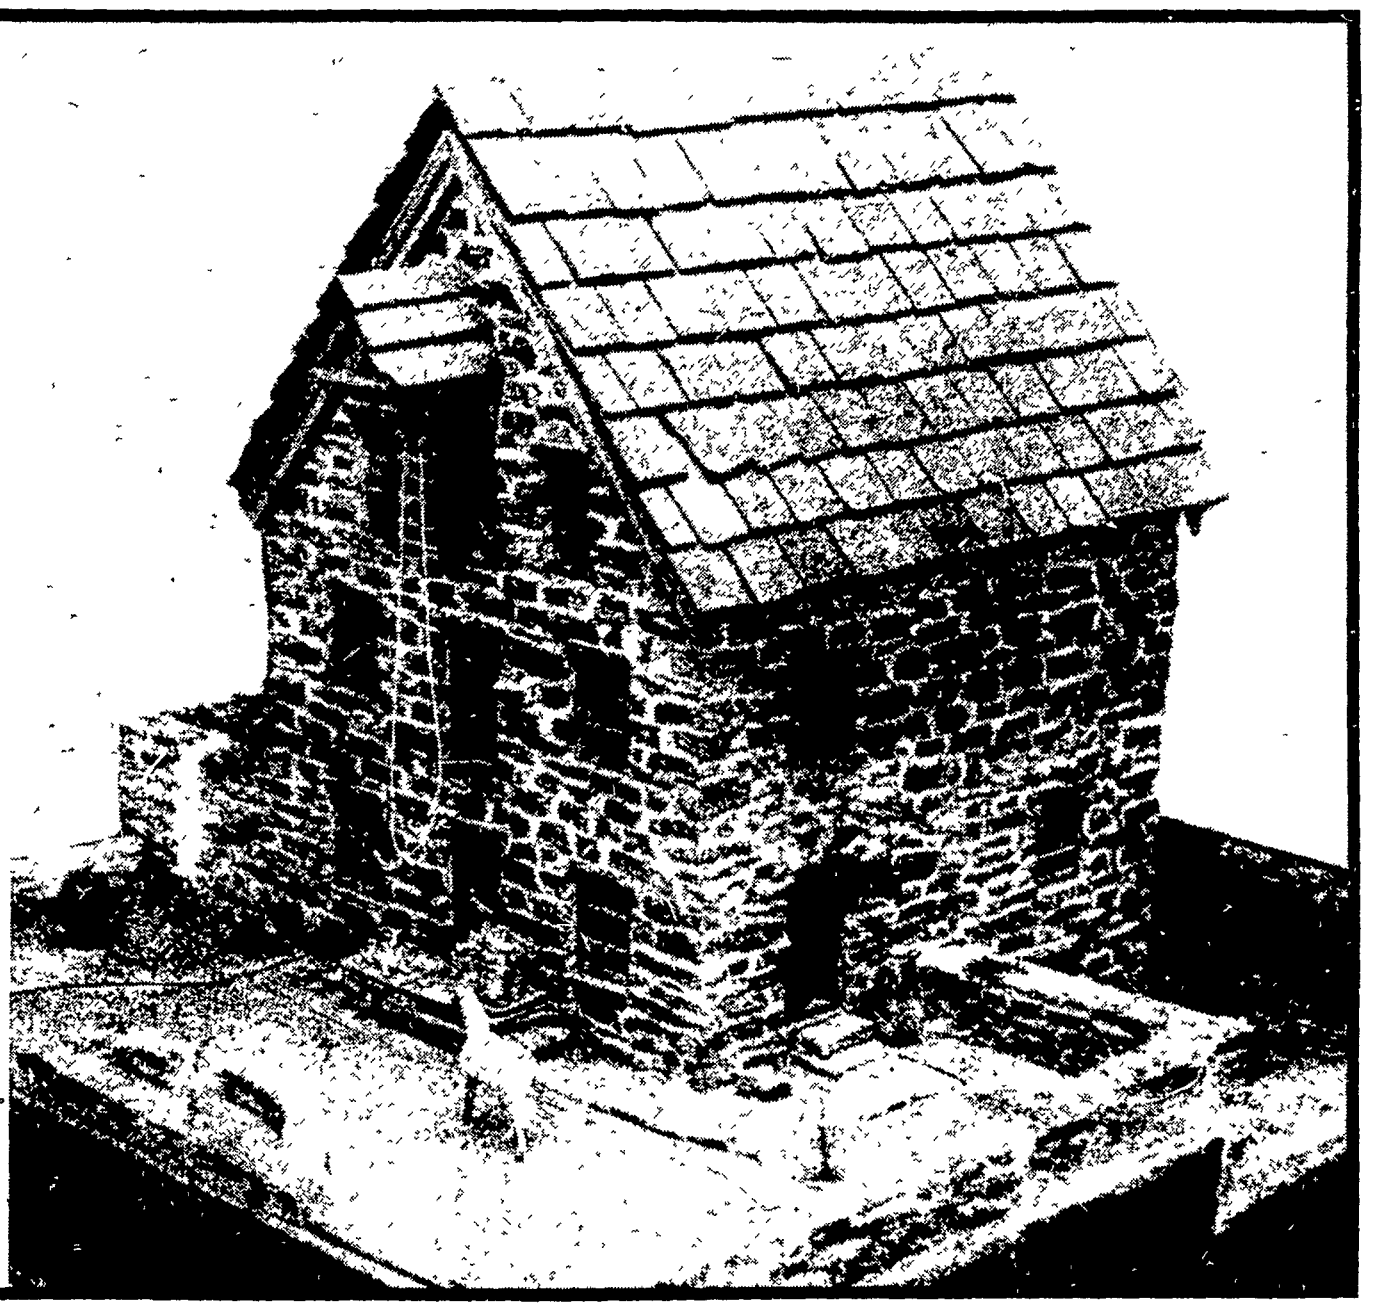
This replica of the original Eshelman Mill was built by a "Red Rose Feeds" customer in Ohio, and is on display at the Red Rose Feed Store in Quarryville.



Replica at Quarryville feed store

Old Eshelman mill of historical value

By DIETER KRIEG

LANCASTER – An old stone building which was used for the manufacturing of guns in the late 1700's and a half century later was turned into the first John W. Eshelman Mill, has been described as being of "outstanding historical significance for Lancaster County." According to a study done by the Lancaster County Planning Commission, the site and structure are worthy of highest priority for restoration and preservation. Efforts are consequently being considered to keep the presently badly deteriorated structure from going into ruins entirely.

Lancaster County Central Park, which adjoins the old Eshelman property, may consider annexation of the historical grounds and a fund of $25,000 has already been established to help with incurred costs. The money will be made available by the Redevelopment Authority of Lancaster County, and has been earmarked for purchase of the site and basic rehabilitative work. A firm proposal on the matter has not been made yet, however.

The old stone building was reportedly in use as the William Henry Gun Factory in the late 1700's. The structure itself is believed to date back to the 1780's. John W. Eshelman began his milling business in the stone structure in 1842, an enterprise which later spread to the Midwest and as far south as Georgia. The trademark was the red rose - and the name, of course, Red Rose Feeds.

Although the old mill is all but forgotten today, its historical significance was known to a few people for decades already. One such individual is an Ohioan whose name has been forgotten but whose contribution to local history is displayed in the Red Rose Feed Store, Quarryville.

There, for all to see, is a replica of the old mill, complete with tiny electric lights, hinged doors, a working water wheel, and realistically looking millers. Built of stone, slate, wood, and plaster, the replica has been on display here for a little over a year. The Quarryville feed business received it from an Eshelman mill in York County when it changed ownership. All of Eshelman's mills, incidentally, were purchased by the Carnation Company in 1974.

Although the old replica was damaged somewhat and in need of a thorough cleaning, the management at the Quarryville store recognized the historical significance of both the model and the original site and went to work on the replica.

According to Jack Eshelman, a great grandson of the milling business' founder, the replica in Quarryville is not exact, but "it is well done." He estimates it was made in the late 1930's. The occasion, he believes was probably the 100th anniversary of the company. An Ohio customer made it, he told Lancaster Farming.

Lancaster County's historical organizations and interested individuals claim there's a need to restore the original property. The purpose, they explain, is to provide the community with an example of what water power was used for a century or two ago and how it was used to produce rifle barrels and feed.

To get the restoration project underway, the Lancaster County Planning Commission will need sponsoring businesses of or organizations.

Located on the banks of the Conestoga Creek, southeast of Lancaster, the old Eshelman Mill is gaining attention from the public because of its historical significance. The structure dates back to about 1780, although John W. Eshelman didn't begin manufacturing his famous "Red Rose Feeds" there until 1842.

Popularity of soil fumigation growing in area

Harvey Sauder, New Holland R1, custom applicator of methyl bromide, applies the chemical near New Holland.

By JOANNE SPAHR

LITITZ – If they don't get to it in the Fall, tobacco and strawberry growers in Lancaster Farming's coverage area have been busily steaming or fumigating their seed beds and fields during the past few weeks. By now, the majority of the ground preparation is complete with most crops planted.

However, due to a wet Fall last year and periodic rainfall this Spring, some fumigation and steaming processes are still being carried out, especially in the case of strawberries.

The preparation of ground for this crop is done by chemical fumigation, as are the majority of the tobacco seed beds in Lancaster County. Once the sole domain of steamers, more and more tobacco beds are now fumigated due to the decline of area steamers. And, as the number of steamers has lowered, the popularity of fumigating has sharply risen over the past five years.

Soil fumigation has one major advantage over steaming – there is less time involved. In some cases, the cost is lower, but on the whole, applicators indicate that the prices are about equal. As an estimate, soil fumigators say they can do two tobacco beds, each 150 feet long, in about 20 minutes. Another average is 7200 square feet in 10 hours if the soil is well prepared and conditions are right.

Two types of soil fumigants are used in Lancaster County – methyl bromide and vorlex. Both are applied in either Spring or Fall, although vorlex for tobacco beds is normally applied in the Fall due to a 30-day waiting period after application. Methyl bromide has a two-day waiting period on the average.

To prepare for soil fumigation with methyl bromide, the farmer need only to work the ground into fine, loose friable condition to the depth of eight to 10 inches. The soil should be as free of clods as possible.

In the case of methyl bromide it is important to

WHY

UNIPEL® 21-7-14

is an ideal fertilizer for silage-corn fields:

Whole-plant corn silage for beef or dairy cattle removes two to three times as much Potash as Phosphate from the soil, and a lot of Nitrogen Compensating for that removal can be the crux of your fertility program for fields that were or will be in silage corn

A UNIPEL Single Application of UNIPEL 21-7-14 is well-suited for such fields can provide N, P and K in a ratio to help restore a good fertility balance for continued top crop production

Give us a call We'd like to tell you more, personally

Soil fumigation

(Continued from Page 38)

avoid excess non-decayed organic matter which absorbs the fumigant and serves as a reservoir for fungi and nematodes.

The moisture and temperature of the ground are important variables in the application of a fumigant. The soil moisture should be neither too high nor too low with sandy soils slightly below field capacity and heavy clay soils at 50 to 75 per cent of field capacity. The temperature should be above 50 degrees F. at six inches of depth for methyl bromide.

Once the ground is prepared, the tobacco or strawberry grower has completed his part of the fumigation process. Instead of being required to help the applicator, he is free to do other work.

The fumigant is applied with a specially built applicator utilizing a three point hitch mounted onto a tractor. Using 30 pounds of pressure from dry nitrogen (in the case of methyl bromide), the chemical is chiseled into the ground. Following the application, it is immediately covered with plastic from a nine foot wide roll attached to the applicator. While this plastic is being rolled out, it is automatically glued to the piece beside it. Usually an applicator's assistant will walk over the glued seams to insure that the pieces adhere to each other.

After application, the plastic is kept over the ground for a designated period of time depending on which chemical is used, and after the removal of the cover an aeration period is needed.

John Yocum, superintendent of the Penn State Southeast Research Laboratory at Landisville, says there is a disadvantage with chemicals – steam does a better job on clover, although chemicals do a better job with a few tough weed varieties such as thistle. Yocum also noted that he would like to see more growers taking advantage of the Fall application if they are going to fumigate.

"In Fall they have a choice of materials", he says, adding that the grower wouldn't be delayed as long in Spring, either, if applications were taken care of in the Fall.

Along with tobacco and strawberries, tomatoes and any other crop that doesn't bear fruit for harvest the first year can be fumigated.

Lebanon County

Conservation-minded girl wins FFA speech contest

FREDERICKSBURG – Denise Krause, daughter of Mr. and Mrs. Dennis Krause, Annville R3, doesn't lve on a farm, but she's all enthused about her vocational agriculture studies at the Lebanon County Vo-Tech School, and the conservation of natural resources.

In a speech she gave Thursday afternoon at Northern Lebanon County High School, the 17-year-old spoke about her work as a member of the Youth Conservation Corps and how that experience has helped her to determine her goal in life. She's committed to working with forests and parks, she told a panel of three judges who rated her speech as the best presented. The occasion was the FFA public speaking contest, on conservation. Students from three Lebanon County FFA chapters participated.

Miss Krause's speech edged a presentation entitled "Our Nation and Soil Conservation," given by Marilyn Deaven of Northern Lebanon High School. The daughter of Mr. and Mrs. Mark Deaven of Fredericksburg, Miss Deaven lives and works on her parents' swine and dairy farm. Soil conservation practices are a definite part of her family's farming program, the 15-year-old told the questioning judges.

Third in the final placings was Dean Patches, who asked "Must We Lose the Soil War?" He, too, is a student at Northern Lebanon. David Noll of Cedar Crest placed fourth with his presentation, entitled "Today's Soil Uses and Tomorrow's Soil Improvements."

All participants were given seedlings by Clair Gerberich of the Lebanon County Conservation District.

BALDWIN COMPLETE

DISPERSAL

FRIDAY EVENING, MAY 5

6:30 DST

Located 2 miles east of Canton, Pa. on Rt. 414, 50 miles north of Williamsport, Pa. in Bradford Co.

For Dairy & Poultry Farmers - the new MARTIN V-MODEL semi-liquid spreader (patent pending).

"NEW" "NEW"

The new Martin Spreader is designed to handle manure from free stall barns, semi-liquid storage, barn cleaners and front end loaders. Available in three standard sizes - plus - customer built to meet special needs. Custom-built includes length, width, capacity and top opening to meet your requirements. All sizes are built to last.

THE FOLLOWING FEATURES ARE STANDARD EQUIPMENT ON MARTIN'S V1500 gal., V2100 gal., V2250 gal., V3300 gal. TANK SPREADERS:

- ★ Heavy duty internal chopper type auger.
- ★ Includes Hydraulic cylinder and all hoses.
- ★ Includes PTO shaft, jack and ladder.
- ★ Spreaders built and designed to handle manure from free stall barn without adding any liquid.
- ★ Rear fan built to handle spread of 45 to 60 feet liquid or thick manure.
- ★ Manure tank can be filled with barn cleaner — Scrape off Ramp — Front End Loader or Pump.
- ★ Large 12' opening from tank to discharge fan.
- ★ Special V-Shape design facilitates smoother flow of manure removal.
- ★ Braking System Optional, 4-wheel Hydraulic Brakes controlled from tractor.

Call us today to see the new MARTIN V-MODEL SPREADER and ask about other Martin products like liquid manure equipment - full line of free stalls - gates - and fences

Berks County DHIA Monthly Report

MARCH 1978

Kay, a 6-year old Holstein in the Zahncroft Farm herd, completed her recent lactation with 25,655 pounds of milk and 936 pounds of butterfat. The performance was good enough to win first place for the month on both counts. Runner-up in the milk collumn is Nora 26, owned by Mervin Brubaker. An 8-year old Holstein, she pumped out 24,636 pounds of milk and 763 pounds of butterfat. The 918 pounds of butterfat produced by 6-year old Segis in the Reu Hel Farms herd, stands as second-high in the butterfat report for the month. She had 21,863 pounds of milk. All of the above lactations were completed in 305 days.

The following is the Berks County DHIA report for the month of March, 1978. Only those herds averaging 1.5# per day or over are listed:

OWNER BREED	NO. COWS	% DAYS IN MILK	LBS. MILK	% FAT	LBS. FAT

Homemakers Day set

READING – The Berks County Spring Homemakers Day will be held on May 11 at the Berks County Agricultural Center. Activities begin at 9:15 and will last until 2:30 P.M. Theme for the day will be "Spring Encounters".

Topics for the day include: "Someone who cares", "Shape up for Spring", "Advances in breast cancer", "How can Women influence local government", and "The Hat Lady".

A hot-cold buffet will be served. Cost for the day will be $5. This includes program, speakers, and luncheon.

Reservations are limited to 200 persons and are due May 2. Checks can be made payable to the Berks County Extension Homemakers Fund. Reservations can be mailed to Mrs. Rita Lesher, 3825 Stoudt's Ferry Bridge Road, Reading, Pa. 19605.

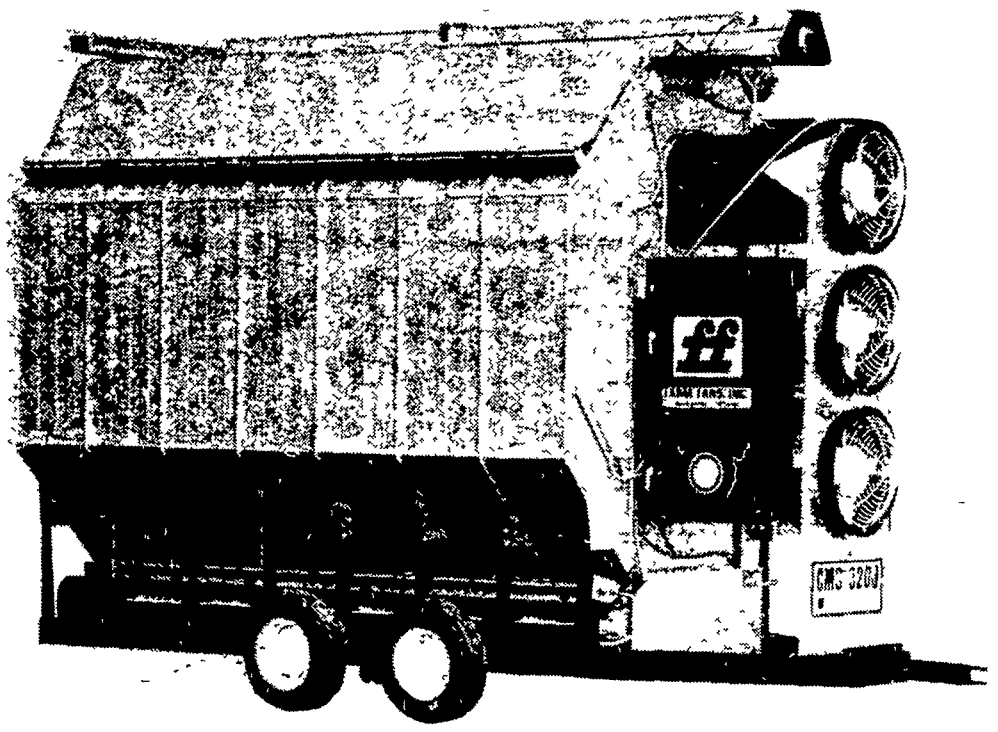
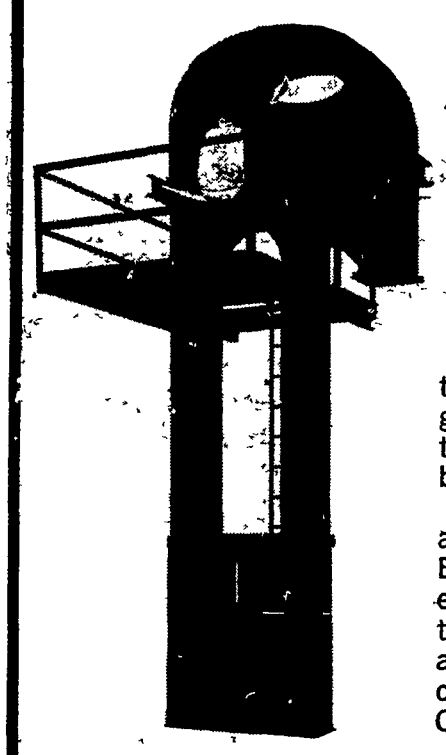
THE SYSTEM

THE MOST VERSATILE GRAIN DRYING, CONVEYING & STORAGE



THE ALL NEW J-SERIES

- Two models - CMS-320J, CMS-420J
- Choice of Continuous Multi-Stage or Continuous Flow drying.
- Exclusive Automatic System Control is weather-proof and tamperproof.
- "Temper Dries" automatically for premium quality grain.
- The J Series is specially designed to meet today's need to save energy.
- Big capacity drying for high volume grain operations
- Backed by almost 30 years experience in grain conditioning.

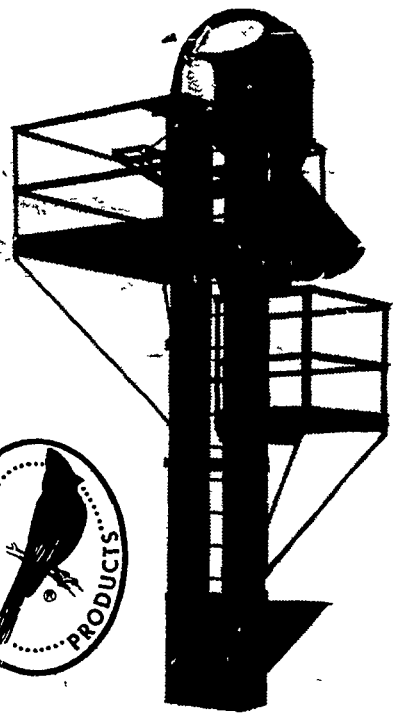


BUCKET ELEVATOR

MODEL 7000

High-volume agricultural and commercial grain and feed distribution of up to 7000 bushels per hour.

This largest, latest addition to the Cardinal Bucket Elevator line is engineered to perform the long-term, maintenance-free job you've come to expect from Cardinal equipment.

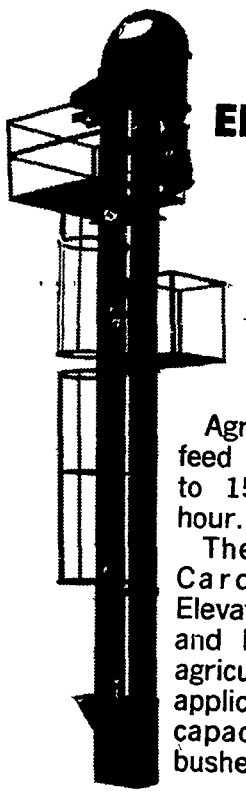


BUCKET ELEVATOR

MODEL 3000

Agricultural and commercial grain and feed distribution of up to 3000 bushels per hour.

The Model 3000 Cardinal Bucket Elevator is engineered and manufactured to provide long, heavy-duty service at even full capacity ... lower cost per bushel.



BUCKET ELEVATOR

MODEL 1500

Agricultural grain and feed distribution of up to 1500 bushels per hour.

The Model 1500 Cardinal Bucket Elevator is designed and built for efficient agricultural distribution applications, from small capacity to 1500 bushels per hour.

A GSI On-Farm Storage System. Now Priced Lower Than Ever!

GSI has the system to meet your demands. An on-farm storage system that lets you harvest when you're ready and sell when the price is right. From one bin to an entire system, GSI bins are priced right!

GSI manufactures farm bins up to 60 ft. diameters with capacities to 157,000 bushels. Sturdy construction for maximum grain protection, with important safety features. Easy field assembly.

To complete the system, GSI offers an entire drying package and a full line of grain handling equipment to match your needs. GSI on-farm storage systems .. the profitable solution.

- 2½" Pipe and Weld Structure w/Painted Steel.
- Fencing Welded Hog Panels.

Delaware searches for flood tolerant corn

DOVER, Del. – Without water, corn plants cannot live. But neither can they live with too much water. Young seedlings growing under bright sunlight have a hard time surviving heavy rains and flooding. The problem is, when corn plants are submerged they start to manufacture and accumulate a substance called ethanol alcohol in their roots. Even at best this causes a reduction in yield. At worst, most of the seedlings die within a few days, forcing farmers to replant. This results in tremendous losses of time, energy, money, and seed.

University of Delaware plant science graduate student Tom Lee is conducting a study which may lead to new, flood-resistant corn varieties. He's studying a variety of corn from Columbia, South America, which somehow survived after being in a flooded, low-lying area. The seed, which was provided by plant breeder Dr. Sue Sullivan, came from a Delaware Agricultural Experiment Station screening program for drought-tolerant corn.

Although Lee notes that the Columbian variety can't match North American hybrids in terms of yield, it has proven its ability to survive better than other corn varieties under flooded conditions in his greenhouse experiments.

Lee believes that the Columbian corn is less susceptible to flooding because it does not accumulate ethanol as rapidly as other varieties. He is using modern analytical procedures to test his hypothesis.

Lee takes corn extracts and passes them through positive and negative exchange resins. With these resins he can separate out the amino acids, the organic acids, and the carbohydrates for further study. He then measures the carbohydrates with a colorimetric procedure, and analyzes the organic acids by using gas chromatography.

When it comes to measuring the amino acids in his corn samples, Lee relies on reseach assistant Caroline Golt. She is responsible for te Experiment Station's Analytical Laboratory, where the amino acid analyzer is maintained.

Expensive as it is impressive, the amino acid analyzer is computer-controlled, fully automatic, and capable of working around the clock. It is Ms. Golt's job to feed in the samples, help interpret the data, and keep the temperamental equipment humming along smoothly.

The machine is capable of running 20 samples consecutively. On any given day, Lee's corn extracts might be sharing the machine with samples of rat blood, lima bean extract, horse urine, seas chitin, or anything else made of protein.

The machine automatically separates out each amino acid by pH. The computer automatically graphs each of these, giving its findings in the form of a teletype print-out. The data, which is extremely accurate, must be interpreted by Golt and Lee. Each amino acid is recognizable by its characteristic shape and by the time at which it appears on the graph.

Within a few weeks Lee should know if his hypothesis is correct. Once he knows why the Columbian corn can withstand flooding, he will be able to look for the same trait in hybrids from this country.

Lee says it's not likely that anyone will produce a corn plant that really likes excessive water. But it may be possible to breed one which can withstand a Spring flood. This may be enough to reduce yield losses, save many farmers from costly replanting, and even enable them to plant corn in areas where they had never dared to before.

WHAT'S NEW

PICKUP COVER

A unique new pickup cover has been developed by Brammall, Inc., called EasyRiser. The cover protects cargo, tools, etc. from theft and weather, yet rises entirely up and out of the way as effortlessly as raising the hood on a car. The patented design uses counterbalancing springs to exactly compensate for the weight of the all-fiberglass cover. One simple motion raises the entire EasyRiser cap – not just one end – out of the way for easy access to either side or rear of the cargo area. In the down position, a single latch at the tailgate end securely locks the cover. Its low, streamlined profile on the road is said to save fuel by offering no wind resistance, while enhancing the looks of the vehicle.

The new Easy Riser design has been developed and proven in over seven years of actual field use on a commercial truck fleet. In fact, the first unit ever made is still in daily use and has outlasted three trucks. The mechanism is constructed of rugged low-carbon steel which is zinc-plated for corrosion resistance. The cap is of heavy-duty dent-proof, fiberglass. For more information on the unique new EasyRiser write National Sales Office, Suite 1212, 111 East Wacker Drive, Chicago, Il. 60601 or call 312-644-1248.

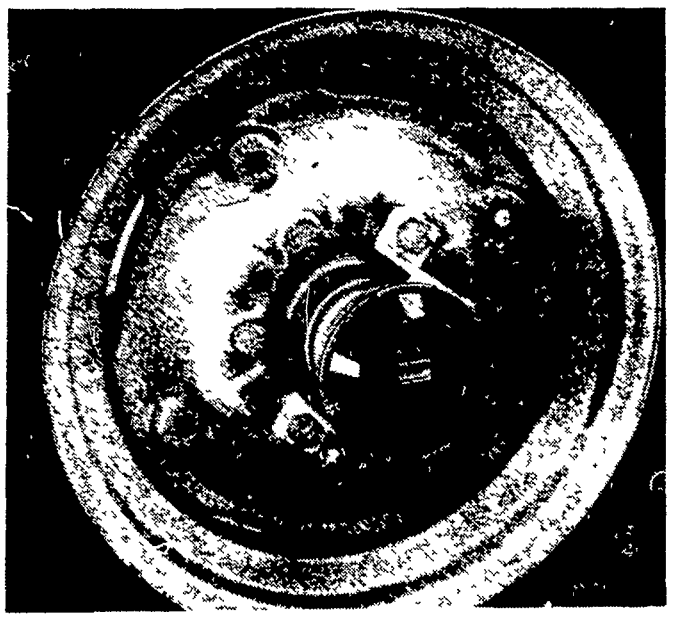
WHAT'S NEW



REVO COUNTER

Known as the "SAM" Revo Counter, this device attached to a wheel hub can be used by farmers, contractors or home owners to keep track of tractor, truck or wheeled implement usage. It's now available from Massey-Ferguson as an aid in determining daily field operation, acres covered, fuel economy versus work performed, rate of seed, fertilizer or herbicide application, yield per acre, and maintenance scheduling. SAM revo counter comes with slide rule for direct conversion of wheel revolutions into square feet, acres or miles, or metric measurements.

STATIONARY CONVEYOR

A new stationary conveyor box that smoothly synchronizes forage hauling with the unloading operation is being introduced by the Koehring Farm Equipment Division.

The new Fox 1016 stationary conveyor acts as a connecting link in the forage handling system receiving an entire load of hay or corn silage at a time and then feeding it at a uniform rate into the blower. Because the hauler spends less time unloading, he is able to haul more loads in a day. As a result, Fox engineers explain, farmers and ranchers may find that they will need fewer forage wagons or trucks for hauling.

The large capacity Fox 1016 Stationary Conveyor Box is ideal for the farmer or rancher who hauls silage or hay silage long distances. With the Fox 1016, forage wagons and trucks spend less time unloading and more time hauling.

It has four heavy-duty apron chains with a two speed apron transmission which moves material forward to the beaters and then can be shifted down to a slower speed to properly feed ensilage into the forage blower. With the hydraulic flow-control valve, the conveyor has an infinite number of speeds to properly meter the ensilage into the forage blower.

Pintle chains are used throughout with heavy worm drive for minimum maintenance, says Fox. The conveyor is designed to be driven with tractor hydraulics.

The operator can bring the entire operation to a halt by pulling the safety rope which runs around three sides of the box.

The two wheel axle and the tongue design make it easy to handle when moving, says Fox.

The Koehring Farm Equipment Division, headquartered in Appleton, Wis., is a major manufacturer of farm implements including forage harvesting and handling equipment and tillage tools.

PAFC cites Robinson

Don Robinson

CARLISLE – Donald M. Robinson, adult farmer instructor in the Eastern Lancaster County School District, was honored recently by the Pennsylvania Association of Farmer Cooperatives for his educational contributions to cooperative business.

Mrs. Robinson received a digital clock at a special awards luncheon held here in Carlisle.

According to Harold F. Doran, cooperative business education coordinator at The Pennsylvania State University, he was cited for innovative teaching concepts on the effective use of farmer cooperatives.

He also is author of a new teacher's guide for a high school course, "Cooperatives–Serving Our Community."

Mr. Robinson has been a vocational agriculture instructor in the Eastern Lancaster County School District the past seven years.

Bob Butera is the only Republican for Governor with a plan for rural Pennsylvania.

From agricultural research to the development of a new agricultural financing program, Bob Butera has a 15-point program for progress in rural affairs in Pennsylvania. He is the only Republican candidate for Governor who thinks enough about rural Pennsylvania to propose a complete rural affairs program for his Administration as Governor.

Bob has a program which calls for better maintenance of secondary roads, review of the effectiveness of the Clean and Green law, land use planning, support for the Milk Marketing Board . . . but, most importantly, Bob's entire concept of state government is to "get government off our backs and out of our lives."

Bob is counting on rural Pennsylvania to help win the election and then counting on us to help him return pride and common sense to Pennsylvania government.

Cordell outstanding Young Farmer

FAYETTEVILLE – Roy M. (Butch) Cordell, Chambersburg R5, recently received the 1978 Outstanding Young Farmer Award of the Chambersburg Young Farmer Chapter at a joint banquet held with the Franklin County Future Farmers of America.

Cordell has served as vice president and president of the local Young Farmers chapter and of the 4-H Dairy Council of Franklin County. He has served on the Franklin County fair board, the Franklin County 4-H advisory council, the Franklin County Farmers Association dairy committee, and the Franklin County Holstein Association membership committee.

To qualify for this honor, an individual must excell in community leadership, chapter leadership, meeting attendance, soil and water conservation practices, dairy cow management, livestock management, and farm mechanics practices.

Distinguished service award went to Terry Martin, Chambersburg R10, who has served as chapter president and vice president, regional vice president, and treasurer of the state Association.

Newly elected president of the Young Farmer organization is Carl Allison; vice president, John Moore; secretary Alvin Meyers; treasurer, Clay Henninger; public relations, Larry Twigg; and chaplain, Fred Rice.

Star chapter farmer of the Franklin County FFA is Larry Rosenberry, with star greenhand honors going to Billy DeHart.

Scholarship awards were presented to Dale Nolt, Senior High award; Kirby Shoemaker, Junior High award; Billy DeHart, leadership award; and John Jakubic, Larry Rosenberry, Curtis Talhelm, and Greg Williams, leadership awards.

Terry Martin

Roy M. Cordell

FFA Foundation Awards went to: Nancy New and Curtis Talhelm, ag sales and service; Billy DeHart, Denny High, Larry Rosenberry, John Jakubic, and Gary Akers, public speaking; Eugene Hammond and Willis Hull, ag mechanics; Mike Goldsmith and Larry Rosenberry, livestock production; Tim Egolf and John Jakubic, beef production; John Moore, dairy production; Robert Decker, ag electrification; Greg Williams, placement in ag production and poultry production; and Sidney Wilson, swine production.

Clay Henninger, Shippensburg R4, has received the American Farmer Award. Winners of the Keystone Degree are Larry Dice, Steve Kendig, and Tim Knoll. Sidney Wilson won the Dekalb Award issued for the most outstanding senior.

Double lambing possible with Polypay ewes

WASHINGTON, D.C. – According to a report issued by the USDA, doubling production without a proportionate increase in overhead costs is the "impossible dream" of every business person. Only such a dream is no longer impossible for sheep producers as SEA-developed Polypay ewes promise to make twice-a-year lambing a viable reality.

The name "Polypay" means "multiple paychecks" and that is exactly what these ewes can mean to sheep producers for they are potentially capable of conceiving and raising twin lambs twice a year in addition to a wool crop.

Today's market price for lamb is rising because demand is high while supply is low. U.S. producers currently market less than three pounds of lamb per person per year. Consequently, we import nearly $20 million worth of lamb each year. Polypay ewes could help our producers better meet domestic needs, stabilize market prices and also increase their net profits.

Polypay ewes originated from crosses of Targhee x Dorset and Rambouillet x Finnsheep breeds which in turn were crossed to form the final, four-cross breed. The synthetic breed was developed under the leadership of SEA animal physiologist Clarence V. Hulet.

Polypays are a part of a plan to develop an intensive lamb production system. The need was for a breed of sheep possessing a relatively short gestation and postpartum interval (the interval between lambing and conception) as well as a long breeding season.

Polypays are well endowed with each of these characteristics. From the Rambouillet and the Targhee breeding they obtain hardiness, herding instinct, size and the long breeding season. Dorset breeding contributes carcass quality, milking ability, short gestation and, again, the long breeding season.

Finnsheep breeding adds early puberty, short gestation and postpartum fertility as well as high lambing rates.

Initially, hormone treatments were used to induce twice-a-year lambing. Prior to the Polypays, the best hormone-induced conception rate in lactating ewes within 6 weeks of lambing was 44 per cent. Following hormone treatment after Spring lambing, Polypay ewes have achieved a 56 per cent lambing rate in the Fall plus an 85 per cent rate in the following Spring with no additional hormone treatments.

Also, it appears possible to achieve twice-a-year lambing in Polypays with hormones. They can lamb in February and a considerable number will, and breed naturally in March, lamb again in August and breed quite successfully in September. Continued careful selection will be required to achieve a high level of success without hormones at the March breeding.

Furthermore, 85 to 95 per cent of the Polypay ewes possess the ability to breed at the age of 6 to 7 months and give birth to one or more lambs at 12 to 13 months. This ability to breed at such an early age enhances the Polypays' potential for putting more U.S. lamb on the dinner table of consumers.

For more information, Dr. Clarence V. Hulet's address is U.S. Sheep Experiment Station, Dubois, Id. 83423.

Daily compounding will be of interest to you!

Farmers First's daily compounding of interest provides an even greater return on your investment. Just decide how long you have to save and choose the certificate that's best for you. Certificates of Deposit may be purchased in any amount you choose with a $1,000 minimum.

TERM	RATE		EFFECTIVE ANNUAL RATE
1 Year	6.00%		6.272%
3 years	6.50%	Plus daily compounding equals	6.812%
4 years	7.25%		7.627%
6 years	7.50%		7.900%

Interest is payable annually, semi-annually, or quarterly on amounts of $1,000 or more. On certificates over $5,000, interest may be paid monthly if youu wish. Your interest may be paid either by check, or by an addition to a Farmers First Checking, Statement Savings, or Statement Gp Account. If you would like your interest added to the certificate, this can be accomplished on an annual basis. Stop at any Farmers First office today.

Questions on grain storage not easy to answer

By JERRY WEBB
University of Delaware

NEWARK, Del. – On-farm grain storage is a subject that is getting considerable attention these days. Many farmers have it listed high on the list of things to do between now and harvesttime.

Perhaps the low prices of 1977 have forced them to think of better ways to market their crops as they recall quite bitterly the low prices and discounts forced on them when they sold at harvesttime.

Grain marketing experts feel that on-farm storage capacity may become more important in the years ahead because of the new three-year grain reserve program and the increased carryover of feed grains. There's definitely going to be more grain that will need storing. The question remains, is it more economical for a farmer to build his own storage facilities or to store at the local elevator? Carl German, Extension crops marketing specialist at the University of Delaware, says there's no single answer to this question. It varies so much with the individual farmer's method of operation.

He believes a farmer must look at a variety of factors, including the distance he must haul to the local elevator, the length of time he stores grain, whether the grain will be processed and fed on the farm, the income tax consideration–particularly investment credit, and whether or not he plans to participate in the grain reserve program. Other considerations include the farmer's own marketing strategy, the normal waiting time at the local elevator, the farmer's annual storage requirements, and his ability to manage stored grain.

Under the U.S. Department of Agriculture's grain reserve program farmers will receive an annual advance payment of 25 cents a bushel for corn and wheat. To get that, however, a farmer must sign a price support loan or purchase agreement.

If a farmer has a long-term need for additional storage space the marketing specialist says the farmer who plans to participate in the grain reserve program would probably be better off constructing his own storage. On the other hand, those farmers who usually store their grain for six months or less probably could store more economically at a nearby elevator.

German estimates the annual ownership cost for a new on-farm storage unit excluding drying equipment, between 8.7 and 12.5 cents per bushel. The cost declines as the size of the bin increases. These figures are based on a life of 12 years for the bin and a salvage value of two per cent. It also assumes ASCS financing, at seven per cent interest. Taxes, repairs and maintenance on the bin are not included in these annual ownership costs. They do include the foundation, bin and construction costs, aeration fans, and a tube for unloading the bin.

Farmers using on-farm storage are going to rack up additional costs from extra drying and the resulting shrinkage necessary for safe storage, German points out. Also, there may be some quality deteriation and shrinkage during storage and there's the matter of interest income that is lost because money is tied up in a grain inventory.

The cost of new storage is only one consideration, the specialist points out. The other is the potential returns from such on-farm storage. He says that over a period of years storing corn and soybeans into the following summer has been a profitable market strategy. But it does involve a sizable financial risk.

Farmers say deciding when to sell their crops is one of the most difficult and painful tasks associated with farming. Even the best of marketers who has followed price trends faithfully is apt to sell one day and see a tremendous price increase the next. Or, he's apt to wait a day too long and catch a falling market–one that just keeps on falling and never makes it back to that peak again.

The question of on-farm storage remains an important one. It would seem to me the farmer with no storage is at the mercy of the marketing system. If at all possible some capacity should be developed as quickly as possible, considering other financial requirements. But whether a farmer wants to go is another consideration. That's one he should consider very carefully with his banker and a qualified marketing expert.

This Mower Is In Your '78 Budget

Independent dual lever directional control of drive wheels instantly positions the fully visible mower deck exactly where you want it.

You want hydrostatic maneuverability and you intend to have it in '79 or '80 . . . right?
We think you can afford this mower in '78.

- Mower deck is shaft driven to assure consistent blade-speed throughout any cutting assignment
- Drive shaft plus two pin attachment affords quick, easy deck removal
- 12 or 16 H P. Kohler engine creates outstanding power-to-cutting-width ration for maintaining blade-speed dependability
- Direct power imput to hydrostatic units eliminates cumbersome belt drives and leaky hydraulic lines
- Rugged, compact design, with low center of gravity, places operator directly above wheels for stability and traction on slopes
- Rigid lateral bracing prevents abrupt downward scalping action when single wheel passes over low spot
- Cutting width 44", 52" and 61"

With Rigidply Laminated Rafters you get a lot more than a quality farm building. First, all of your inside space is useful, with a clear span from floor to ridge. Second, you have maximum resistance to wind and snow — because laminated rafters are far stronger than the wood itself. Third, the attractive arches provide all of the roof support, while providing you with complete freedom for a more efficient interior designed to your very own needs.

Fully guaranteed, the perfect shape and accurate size of every Rigidply Laminated Rafter results in a stronger structure — and a better looking building in which you can take much pide for many years to come

The Tractor Specialist sells more "up-time"

case

When the land is ready, a farmer's tractor had better be ready to go That's why a Case dealer franchise just makes good common sense

As a Case dealer, you're a tractor specialist Everything you do — selling, servicing, parts — has one target the best in farm power You and your tractors are backed by an industry "first" a sound marketing program Assured Availability It tells your customers that if, for any reason during warranty, the tractor they bought from you isn't ready to go, they'll have a free replacement And Case backs you up!

Case backs you up with other strong marketing help including the Demo/Rental and Commitment to Quality programs

If the franchise is open in your territory, you may also be eligible to sell and service light construction power For information on the full potential of a Case franchise in your area, write or call

FARM EQUIPMENT

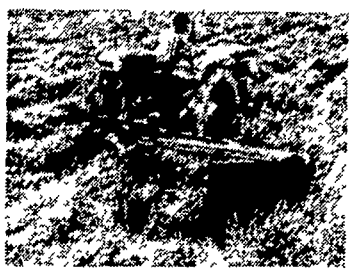
Vicon doublet/mower conditioner

New concept in cutting and conditioning grass



The New Vicon Doublet/Mower Conditioner offers a new concept in grass conservation The Vicon Doublet/Mower cuts, conditions and produces a light airy swath, reducing valuable time required to produce good quality hay and wilted silage Conditioning at the same time as cutting is accomplished by incorporating the same cutter bar as the Vicon Discus disc mower with a conditioning rotor mounted above The sucking action picks up the cut grass and delivers it to the back of the machine in light, fluffy swaths

Vicon fertilizer spreader

The most accurate fertilizer spreader you can buy

The Vicon Spreader uses an exclusive fast-action spout moving back and forth at 540 times per minute to give even, rectangular coverage instead of the usual circular pattern
That means increased profit because you get uniform fertilizer coverage, resulting in better stands and higher yields

Give the Vicon fertilizer spreader a try It costs no more than others But it's better

Vicon the better idea from Holland

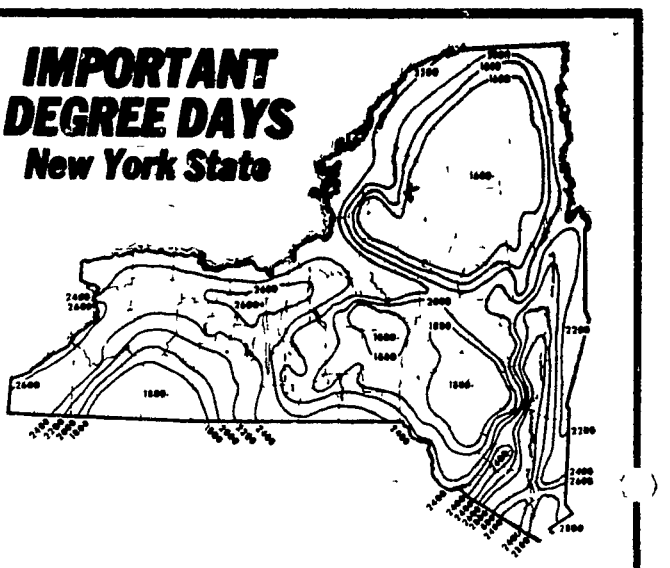
CHRISTIAN M. MOSEMANN

724 Main Street, Akron, PA
Dial 717-859-1664 or 733-1224

IMPORTANT DEGREE DAYS
New York State



Lake Ontario is 246 feet above sea level and it's cooling effect is why the degree days decrease from 2600 plus as you go north toward the lake. The Finger Lakes drain north, not south, towards Lake Ontario. Land rising to over 2000 feet above sea level at it's southern sources. The best high lime Ontario and Honeoye soils are located within and about 25 miles surrounding the 2600 degree plus area. The longest growing season and best high lime soils are in the same territory and snowfall averages about 70 inches.

All our offices are centrally located here. Our farm division broker was a farmer (300 acres cash crop and dairy) here for 50 years. Sold his farm in 1974 and is now a **full time farm only broker.** We have over 100 farms in this territory (over 200 throughout the state). Since our farm division was established three years ago, our asking commission rate has been no higher than 6% on farms (IRS definition) with cattle and machinery by private treaty. Every little bit helps. For the best farm and area information at reasonable rates, call or write:

BEACON SILAGE PRE-SERV*

PUT UP MORE PROFITS!

Beacon Silage Pre-Serv* increases silage value!

Treating haylage or grass silage with Silage Pre-Serv will retain more protein and energy than untreated silage. Formation of lactic acid is increased dramatically! And that means less feed to buy!

Treating corn silage with Silage Pre-Serv means you can harvest and start the fermentation process immediately. The result is a highly palatable corn silage crop with much more feeding value. And that means more milk per ton!

Apply it at the chopper or blower. For haylage, haycrop silage or corn silage, you'll get great results for little cost.

Beacon Milling Company, Inc.

Her allegiance is at home with family and sheep

By Sally Bair
Staff Writer

LANCASTER – Family and lambs are the two things which dominate Mrs. Clyde Brubaker's life, and she wouldn't have it any other way. Dorothy, who lives at 2418 Harrisburg Pike. Lancaster, feels there is nothing more important than being at home supporting her family. "I am not involved in anything that takes me away from home in the evenings," she says, "We are too organized, with too many meetings away from home."

It is not surprising to hear her talk about their sheep operation as a family occupation. "We have a home life where everybody helps each other. When we get ready for a show, we all help, and when we are at a show we all work together. Our accomplishments are enjoyed by all of us."

"All of us" includes not just Clyde, but the Brubaker children Kenneth, 19, and Sarah, 16. Kenneth is a freshmen at the York campus of The Pennsylvania State University, majoring in animal production, and Sarah is a sophomore at Hempfield High School.

Bottle feeding lambs is fun--especially for 2 - and 3-year-olds. Mrs. Brubaker occasionally takes groups of children onto the farm and shows them her lambs--a great experience for everyone involved.

The Brubakers also raise a few goats for market along with their sheep.

Homestead Notes

Dorothy views a small portion of her flock of Hampshire sheep.

Driving school bus twice daily "breaks up" Dorothy's day, but allows her freedom to be at home with the livestock. She enjoys the twice-daily chore, saying, "I enjoy children."

The farming operation includes about 50 tillable acres which support corn, alfalfa and wheat. The Brubakers have 50 brood ewes, registered Hampshires and nearly that many young animals. They began their enterprise with a "small flock" of six ewes and have grown by "adding a few each year."

Since Clyde holds a full time job as field manager for Vigortone pre-mixes, most of the daily checking of the livestock falls to Dorothy - and she doesn't mind it one bit.

"My biggest time is lambing time," she said. Lambing runs from September to May 1.

She explained that they time their breeding program so that very few lambs give birth in December, but added, "Our biggest block of lambs will be born in January because we want them born to be right for the age classes in shows.

Lambs also are born anytime, night or day. Because of this, there are occasionally nights of little sleep, but Dorothy feels that's just part of the obligation of having sheep.

"There are always a few who can't do it themselves. It is all in where you put your priorities. The more time and effort you put in the more reward you'll have," she explains. And as she points out, with lambing the reward can be monetary: "If you lose one it is out of your pocket."

Showing their lambs is very important to the Brubaker family.

"It is a fun experience to meet and learn to know people from across the country at shows. Showing helps to know what improvements you need in your flock." They keep about 10 animals for fairs and other shows, and often will take four or five animals to breeding stock shows and sales.

While they are in the business of selling stock, occasionally they purchase a ram. "When buying a stud ram it is important to keep improving the breeding stock. We like to bring in different bloodlines. But it is not necessary to buy the first or second place animal in a class when you select a new sire."

The whole family is enthusiastic about 4-H. Both Clyde and Dorothy Brubaker showed lambs and steers in 4-H, Kenneth just "graduated" and Sarah currently active. Clyde is a leader, and Dorothy is a supporter and helper in many ways.

"I think the 4-H club is important if it works out for the whole family program. You must be as interested in the program as your child. It is the parents' responsibility to help. The child wants to learn and the parent should learn with them," she states.

Her alligiance

(Continued from Page 82)

Dorothy said she knows there is criticism of the 4-H program from some people who suggest that parents do all the work for the children. She counters by saying, "Parents must be close by. 4-H is not just a child's project. Parents should be enjoying it with the children. They need encouragement and must be taught to follow through."

A school bus driver for six years, Dorothy said she does it partly to supplement the income in a way that allows her to be home most of the time and because "I also enjoy children." Her eyes have been opened to the plight of some children. "I realize that we as adults have a lot of responsibility to our children. As a mother and a parent, I feel our children are a God-given gift. They are our responsibility." A bit wistfully, she adds, "I wish I had a farm big enough to take children and teach them about nature."

The Brubakers are involved in one organization, the Pennsylvania Hampshire Sheep Association. Clyde is presdient and Dorothy is secretary, so she gets involved in sending out announcements about some of the association's activities.

Real boosters of the sheep industry, Dorothy says, "The sheep industry is improving. Wool prices are improving and the price of market lambs is steady." Wool is making a comeback, and so is readily sold at area wool pools. Although they have breeding stock, Dorothy said they always save some sheep to lamb in April, a traditionally good market month for lamb. Also, she said, in any flock there are always a few which don't meet standards and these must be sold as market lambs.

Although many people express a distaste for lamb, she said it often means they have eaten only mutton and not good fresh, high quality lamb. "I can't keep enough lamb on the table. We really like it." There is a ready market for all the market lambs currently being produced, Dorothy said, and it is often difficult to find local lamb in the market - much of it is imported from Australia.

The Brubakers live on the farm on which Dorothy was raised. Her father, Elmer Stehman, raises about 30 head of beef cattle a year, mostly to be sold for 4-H and FFA projects. The farm has been in the family for 69 years, and Dorothy recalls that when they raised tobacco, early in their marriage, they had four generations working in the field on the tobacco crop.

In the old double house which they share with her father, Dorothy has many antique pieces which were handed down through her family. She and Clyde have done the refinishing on some of the furniture. Among her antiques, Dorothy has acquired a spinning wheel, complete with all workable parts. She has not yet tried her skill at it, but is determined to use it so she can spin some of her own wool.

Another family interest is collecting lamb pictures in many different forms. Latch hooking is an interest of Dorothy's, and with Clyde doing the actual drawing, she has created many pictures of lambs. The one most recently completed is a likeness of a Hampshire ram's head, to be used either as a pillow cover or as a hanging.

The support of the lamb industry is a continuing interest to Dorothy "I welcome anybody to come and look. I enjoy talking about sheep and helping people understand more about it."

There are more and more people becoming interested in sheep, according to Dorothy. Lambs make good 4-H animals because they are fairly small and young children can handle them easily. She allows small groups to visit the flock, she has taken lambs to school classes, and she has a talk planned for a Farm Women group. It is also not uncommon for 4-H judging teams to come to the farm for practice on short notice. All of this is a pleasure for Dorothy, and she is happy to share her experiences and knowledge.

Dorothy is deeply committed to her family and to her chosen way of life on the farm. She said she feels most farm families have a supportive kind of life together and help each other as necessary, with the home being the central part of their lives. She sums up her feelings by saying, "We all need to be a part of somebody, and I think my role is in the home."

World of preschooler visited thru seminar

CARLISLE – The "World of the Pre-Schooler" is a challenging and rewarding time for both parents and pre-schoolers. To support the growth of the pre-school years, a special meeting has been designed by parents for parents to share ideas, resources, and experiences.

The session, sponsored and conducted by the Cumberland County Penn State Cooperative Extension Service, will be held at Thornwald, 850 Bicentennial Drive, Carlisle, on May 2 at 7 p.m. and May 3 at 9:30 a.m.

The panel topics will include "The Kid's Kitchen Take-Over", "Kindergym in The Home", "Children and TV: Who is Responsible?", and "There's Always Time for a Story." Panel members are Mary Jane Spencer, Barb Henneman, Jim Parson, Jill Davis, Sue Bousliman, and Sally Smith.

Myrna Kappler, Extension home economist, Cumberland County, says that the pre-school years are the important ones in setting the stage for a child's future learning. She urges county parents of pre-schoolers to attend this free program.

To register for the "World of the Pre-Schooler" call or write the Cumberland County, Penn State Cooperative Extension Service, 1100 Claremont Road, Carlisle, or phone 717-249-7220 by April 28.

For those parents wishing to bring their small children, a nursery and babysitting service will be provided at the meeting location.

On being a farm wife

—And other hazards

By JOYCE BUPP

Our lending agencies periodically require that we fill out and submit to them a list of farm assets.

We dutifully identify property, buildings, livestock and machinery, held by the loan people against the considerable debt that we, like most farmers, have accumulated to stay in business.

But we don't tell it all.

Our best assets have never been listed on a collateral basis. You can't categorize a price to put on the wealth we hold in loving and supportive family, friends and neighbors.

Mention that a porch needs to be painted, or the plow is a bit behind schedule, and a Grandpa will appear at your front door. Not only is he dressed in his work clothes, but he's probably brought along his own tools as well.

And how do you put a value on grandmothers who offer to babysit at the mere mention of a meeting, who call frequently just to check that your family is well, and who serve as an unending source of support and guidance.

Uncounted are the friends and neighbors (even the police, occasionally) who keep a constant watchful eye on animals and barns, and who hurriedly give us a call at the first sign of a black and white heifer high-tailing it over the hill.

These wonderful folks can be found helping to harvest hay and corn, making repairs around the buildings and just recently, crawling over the barn laths to put down tin roofing throughout a very windy Saturday afternoon.

If we go away for a short time the pets are fed, the freezer checked, the mail brought to the house and the plants watered – all by a most devoted friend.

Maybe they don't count in the bank book. But they're the greatest riches this farm family could ever want.

Gingerbread houses demonstrated at YWCA

LANCASTER – A step by step demonstration of gingerbread house making will be held on Wednesday May 10 at the Lancaster County YWCA, N. Lime Street, Lancaster. The demonstration will take place from 9:30 a.m to 11:30 a.m. and again at 7 p.m. to 9 p.m.

Held for the benefit of the YWCA's town fair, the fee will be a donation of $5. Included in the cost is a booklet, patterns, and complete directions.

Anyone interested should call the YWCA at 717-393-1735 for further information.

U.S. Is Auto-mated

There are more than 100 million registered automobiles in the United States An average American-owned car has a fuel economy of about 13 miles per gallon, travels almost 10,000 miles each year and uses more than 700 gallons of gasoline annually

She's wrapping Christmas presents, already!!!

By JOANNE SPAHR

MANHEIM – If anyone had wanted to, they could have found Gloria Althouse wrapping Christmas packages this week. In fact, she could have been found doing the same thing periodically since January.

Until she's done, in early Fall, Gloria expects to prepare 15 or 16 such packages, and when she finally gives them away, she doesn't expect to see any of them torn apart – not even by her three over-eager granddaughters.

Is she crazy? Only if you call a well organized craftsperson and demonstrator insane.

Gloria, a Manheim resident who in January retired from secretarial work after 20 years, is getting into crafts at full tilt now, one of her first loves. The other "loves" of her life include family, dolls, other people, public sales, and antiques. Fortunately for her, now that she's no longer working as a secretary, she has been able to interweave many of these loves into her part time jobs and hobbies.

For example, she's now in the process of revamping a craft demonstration program she began 12 years ago – one on creative Christmas package wrappings. At that time, she was well known in church and neighborhood circles for her Christmas package creations.

"It all began at class meeting at the Zion Lutheran Church in Manheim," she says. Each Christmas the members exchanged gifts and had a contest which included the categories of prettiest, most original, and most Christmasy. For a number of years in a row Gloria earned a prize for the most original and when she decided not to compete in that category any longer, and just wrapped a box in the normal fashion, she won a prize for "the prettiest." After this, she retired from the contest and is now doing the judging duties.

Gloria Althouse displays some of her creative gift wrapped packages.

But, through her God-given talent to be creative, many of her co-workers and acquaintenances noticed her work, and she was asked to speak at the Women's Christian Association, and her career was launched. Unfortunately, a full time job kept her from doing it regularly, but she's now in the process of getting started again.

"My Christmas packages are unusual Christmas gifts made out of junk such as oatmeal boxes, salt boxes and ribbon and thread spools," she explains. Created in a way so that the package never needs to be torn apart, these gifts can be used as centerpieces, wall hangings, or door hangings when the holiday season is over.

Ceramics is another talent which Gloria Althouse enjoys. These figures are only a few of the many she has made since the beginning of the year.

For instance, one such package she has made up is an elaborate church in which the roof lifts off and the Christmas gift is placed inside Another is a train engine in which one of the many parts (made from a salt box) lifts out and the gift is placed inside.

"Part of the fun of these packages is to find where the gift is located," she says. "They're sort of a mystery to open."

To make these junk packages, the creator has to be a "pack rat" of sorts and must have about seven hours of spare time.

"Nothing gets thrown out in this house," laughs Gloria "We find a use for everything" As a result, the Althouse attic and cellar space is utilized to its fullest.

Another way Gloria combines her love of fraternizing with people and her talent at ceramics is through an informal ceramic class she holds on Monday evenings in her home.

"Friends and neighbors drop by and I teach them how to clean and paint ceramics," explains Gloria. "I don't sell greenware, or anything like that, but they come over and we work on our pieces."

She has her own kiln, as well, a piece of expensive equipment that shows her dedication to a hobby she's been doing for seven years.

In those seven years she has made four large 17-piece nativity sets, one of which she has donated to the church.

"It takes about a year to finish one of these sets with

BIG CAPACITY, LONG REACH, HIGH PERFORMANCE!

NEW IDEA 177 FLIGHT ELEVATOR

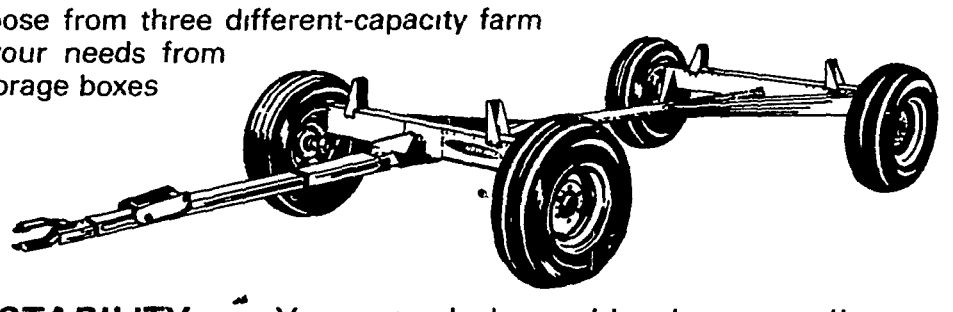
Whatever you want to elevate, the Avco New Idea Flight Elevator can handle it: ear corn, shelled corn, baled hay, beans, small grain or ensilage. It's available in the length you need from 31 to 51 feet. Both the regular and long trucks feature a 96 inch wide tread for extra stability. All sections are made of galvanized steel with steel angles at overlapping joints for extra strength. Choose from PTO, gas or electric motor drive. It's the flight elevator designed for big capacity.

NEW IDEA FARM WAGONS GET THE JOB DONE!

THREE TOUGH WAGONS TO FIT YOUR NEEDS.

Now you can choose from three different-capacity farm wagons to suit your needs from hauling grain to forage boxes

6-Ton
8-Ton
10-Ton



MAXIMUM STABILITY . . . You get a balanced load across all kinds of terrain with extra-wide tread widths, from 70 to 75 inches.

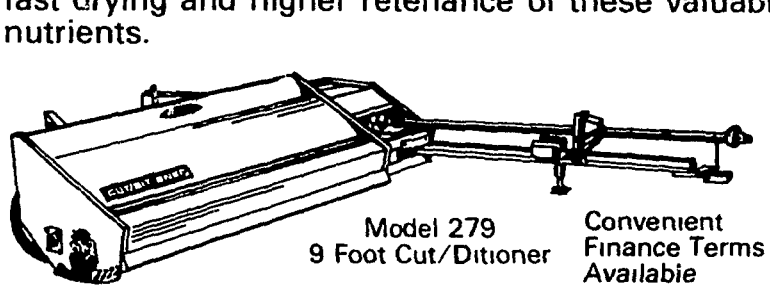
MAXIMUM MANEUVERABILITY . . . The short turning radius and automotive-type steering of these wagons lets you pull them through tight spots with ease.

MAXIMUM SPEED . . . Large, sturdy, heavy-duty spindles with tapered roller wheel bearings provide a rugged foundation for all of your hauling needs.

THE BIG MACHINE FOR REALLY BIG JOBS!

NEW IDEA MODEL 279 9 FOOT CUT/DITIONER WILL HANDLE THE TALLEST AND HEAVIEST CROPS UNDER THE TOUGHEST CONDITIONS.

Combine high-capacity, trouble-free non-plug operation with low maintenance and low initial investment. Cut and condition your hay the Cut/Ditioner way for fast drying and higher retenance of these valuable nutrients.



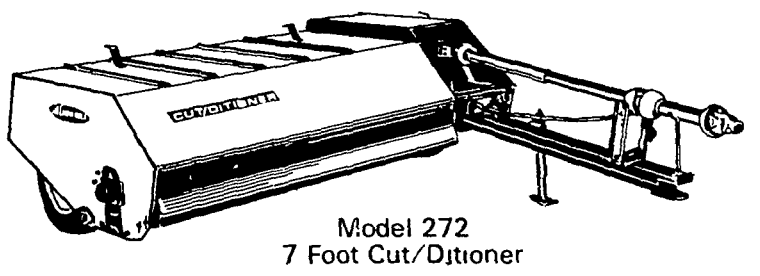
Model 279
9 Foot Cut/Ditioner

Convenient Finance Terms Available

FAST, NON-STOP HARVESTING!

NEW IDEA MODEL 272 CUT/DITIONER VIRTUALLY PLUG FREE MAKES QUALITY HAY FOR LESS COST

It's a rugged, plug-free 7 ft. machine that produces fast drying, high quality hay at lower initial cost No cutter bar or reel means less maintenance costs, too.



Model 272
7 Foot Cut/Ditioner

Home on the Range

Sassy Spring Salad Dressings

As we all can finally see, Spring has sprung. And, now, in preparation for those hot Summer days when we can no longer hide under our Winter clothing, "Home on the Range" is featuring salad dressings for the low calorie salad meals many of us will want to be eating.

Lancaster Farming received 13 recipes for either on salad greens or in potato and macaroni salad. Hope you and your family enjoys eating them.

And, don't forget to check out the new recipe themes for the month of May. If you have any recipes which you think belong under these themes, send them into us with your name, address, and phone number on each page of recipes. For your effort, we will send you a little gift as a token of our appreciation. And, don't hesitate to take part - - we **always** need more contributors. Send those recipes to "Home on the Range," **Lancaster Farming** newspaper, Box 366, Lititz, Pa. 17543.

CREAMY FRENCH DRESSING

1 tablespoon paprika
1 teaspoon salt
1 teaspoon sugar
⅓ cup vinegar
1 egg
1 cup salad oil

Combine dry ingredients. Add vinegar and egg; beat well. Add oil in slow stream, beating constantly with electric mixer or in blender, till thick. Makes 1⅔ cups.

RUSSIAN DRESSING

¼ cup sugar
3 tablespoons water
1½ teaspoons celery seed
½ teaspoon salt
½ teaspoon paprika
2½ tablespoons lemon juice
1 tablespoon Worcestershire sauce
1 tablespoon vinegar
1 cup salad oil
½ cup ketchup
¼ cup grated onion

Cook sugar and water till mixture spins a thread (232°). Cool. Mix remaining ingredients; beat in syrup. Chill. Makes two cups.

NOTE: The Russian dressing takes a little more work than other dressings, but is well worth it. The above two recipes are the cook's favorites on her home grown lettuce.

MAYONNAISE

1 teaspoon salt
½ teaspoon dry mustard
¼ teaspoon paprika
2 egg yolks
2 tablespoons vinegar
2 cups salad oil
2 tablespoons lemon juice

Mix dry ingredients; blend in egg yolks. Add vinegar and mix well. Add salad oil, one teaspoon at a time, beating with electric mixer or in blender, till ¼ cup has been added.

Add remaining oil in increasing amounts, alternating last ½ cup with the lemon juice. Beat in one tablespoon hot water to cut oil appearance. Makes two cups.

Above three recipes by:
Mrs. Doris Huddle
Boyertown, Pa.

xxx

EASY SALAD DRESSING

2 tablespoons vegetable oil
¼ cup vinegar
½ cup water
¾ cup sugar
¾ teaspoon salt

Mix thoroughly. Chill. Toss lightly on salad greens. Garnish with sliced and hard-boiled eggs. NOTE: This recipe is good on watercress.

Mrs. Paul L. Hess
Drumore, Pa. 17518

xxx

CREAM DRESSING FOR CUCUMBERS

1 large cucumber
½ cup sour cream
1 tablespoon vinegar
Paprika and salt

Pare cucumber and slice very thin; place in bowl. Add salt and place in the refrigerator After two hours, rinse thoroughly two or three times in ice cold water, pressing the cucumber slices between the hands each time to remove the salt. After the last rinsing, add the dressing. Combine the sour cream with the vinegar and paprika. Mix well. If desired, chopped chives or sliced onions may be added.

MAYONNAISE DRESSING

2 hard-cooked yolks of eggs
1 raw yolk of egg
½ teaspoon mustard
½ teaspoon salt
2 teaspoons vinegar
Juice of ½ lemon
½ cup olive oil
Paprika
1 tablespoon mayonnaise

Mash and work smooth the hard-cooked yolks of eggs; stir in with tablespoon the raw yolk of egg and mustard. Work smooth. Add the oil by the tablespoonsful and when half of the oil has been used, add vinegar and lemon juice, working them in very slowly. Add salt and paprika and slowly work in remaining oil and mayonnaise.

Recipe Theme Calendar
MAY

6	"Fresh Trout Creations" Deadline April 29
13	"Mom's Favorites" Deadline May 6
20	"Hearty Hot Supper Sandwiches" Deadline May 13
27	"Mushroom Marvels" Deadline May 20

Recipe themes listed for May

LITITZ – It might not seem possible, but a new month is just around the corner, and with it comes another set of recipe themes for our "Home on the Range" contributors to enjoy.

In honor of trout season, which just opened last Saturday, the week of May 6 will be dedicated to "Fresh trout creations." Although the typical method to prepare this food is to fry it in butter, there have to be other ways connoisseurs can have this meal served up to them. If your family prepares trout in any other fashion than frying it in butter, send in your contributions by April 29 and we will publish them with all the other recipes we receive. We will also send you a small gift as a token of our appreciation.

And, since May 14 is Mother's Day, on the Saturday before this date (May 13) "Home on the Range" will feature a theme called "Mom's favorites." No matter what type of recipe you might have, if it is your mother's favorite, send it into us and we will publish it. Make sure, however, that you indicate on the recipe that it is for "Mom's favorites." The deadline by which those recipes must reach our office is May 6.

May 20 will hopefully be a good day for "Hearty hot supper sandwiches." Since many farm families eat their biggest meals at noon, a hot sandwich supper is often a nourishing, easy cornerstone around which to build a satisfying evening meal. And, for the families on a budget, stretching out an expensive cut of meat can be done with this type of meal. Any contributions for this theme should be in the **Lancaster Farming** office by May 13.

In support of our blossoming mushroom business in Chester County, May 27 will be dedicated to "Mushroom marvels." Send us any recipe utilizing mushrooms as a main ingredient. Deadline for those recipes is May 20.

Send all recipes to "Home on the Range," **Lancaster Farming Newspaper**, Box 366, Lititz, Pa. 17543. Make sure to print your name, address, and phone number on each sheet of recipes.

SWEET TART SALAD DRESSING
(For fruit salads)

1 cup sherbet, softened
1 (3 oz.) can frozen lemon or limeade, thawed
1 cup mayonnaise (homemade or commercial)

Stir together until smooth. May be stored for later use. Choose flavors to best complement fruits, or experiment with unusual combinations.

Mrs. Harold Moore
Franklin, Pa.

xxx

HOMEMADE DRESSING

1 egg, beaten
1 cup sugar
½ cup water
½ cup vinegar
1 teaspoon mustard
1 tablespoon flour
Lump butter
Salt to taste
Mayonnaise

Cook the ingredients until mixture thickens. Cool. Add two or three tablespoons of mayonnaise. Stir until smooth. Yields two cups. NOTE: This dressing can be used for hot or cold potato salad and macaroni salad.

Mrs. Nita Dodrer
Littlestown, Pa.

xxx

HOT CABBAGE OR TURNIP SLAW DRESSING

1 egg
½ cup sugar
½ cup vinegar (diluted, if desired)
1 teaspoon flour or cornstarch
Salt and pepper to taste

Mix all ingredients and pour into pot or pan containing a tablespoon or two of bacon fat, oil, or margarine. Cook until thick and pour over hot cooked turnips, cabbage, beets, or potatoes. Garnish with celery seed, parsley, or fried bacon, if desired. Especially delicious served on lettuce hot or cold, especially if made with bacon. Leftover dressing can be stored in refrigerator.

Mrs. Carl S. Bacon
Felton, Pa.

xxx

SALAD DRESSING

8 eggs
4 cups sugar
3 tablespoons flour
16 teaspoons wet mustard
4 cups milk
2 cups vinegar
2 cups water
8 tablespoons mayonnaise

Beat eggs. Add sugar and flour. Then add mustard, milk, vinegar, and water. Cook until thick and cool. Add mayonnaise and beat well. Makes one gallon.

SALAD DRESSING

2 eggs
1 cup sugar
2 tablespoons flour
4 teaspoons wet mustard
1 cup milk
½ cup vinegar
½ cup water
2 tablespoons mayonnaise

Beat eggs. Add sugar, flour; then add mustard, milk, vinegar, and water. Cook until thick and cool. Add mayonnaise. Beat well. Makes one quart.

Above two recipes by:
Mrs. B. Frank Allen
Mardela Springs, Md. 21837

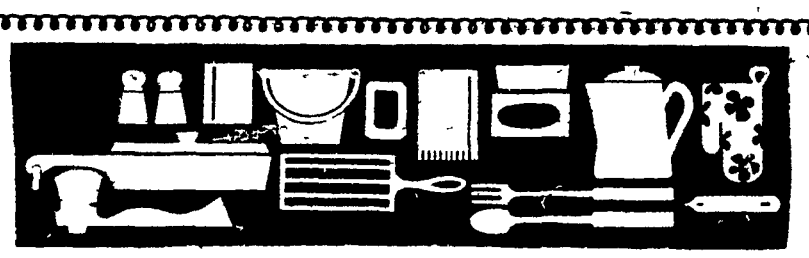
xxx

ESCOFFIER DRESSING

⅔ cup mayonnaise
3 tablespoons hot water
Grated rind of ½ lemon
2 teaspoons sugar
Juice of one orange
2 teaspoons paprika
Juice of one lemon
4 drops tabasco sauce
3 tablespoons chopped chives

Beat the mayonnaise with the hot water, lemon rind, and juice, orange juice, sugar, tabasco, and paprika. Add the chives to the dressing and stir well. Serve chilled with salads such as pepper, cooked meat, sausage, fish, and pasta. Makes 1¼ cups dressing. NOTE: This dressing may be stored in a covered container in the refrigerator for three to four days. This goes especially well with a cold meat and fruit salad. Try chicken with peaches or ham with pineapple served with the dressing and accompanied by a rice salad.

(Turn to Page 98)



Junior Cooking Edition

Mostly cakes is the theme for the Junior cooking Edition this week as five of the seven recipes are for cakes. We have three chocolate cakes, a handy made cake, and a butter pecan crumb cake. Also included are a recipe for a vanilla pie and a graham cracker pudding.

Since cookies seem to be a favorite of junior cookers we are looking for some special favorite cookie recipes to publish in the column. Send your favorite recipe to:- **Lancaster Farming**, Junior Cooking Edition, Box 366, Lititz, Pa. 17543.

CHOCOLATE CAKE

2 cups flour
2 cups granulated sugar
2 teaspoons baking soda
1 teaspoon baking powder
pinch of salt
¾ cup cocoa
½ cup vegetable oil
1 cup milk
1 cup coffee
2 eggs

Mix ingredients and beat until well mixed. Pour into greased cake pan and bake at 350°F. for 35 minutes or until done.

Shirley Martin
Age 14
Mount Joy, Pa.

xxx

HANDY MADE CAKE

2 cups granulated sugar
½ cup butter
1 cup milk
2½ cups flour
3 teaspoons baking powder
3 eggs (beaten)
pinch of salt

Cream shortening and sugar. Add eggs. Sift flour and baking powder together and then add alternately with milk. Pour into greased cake pan and bake at 350 degrees F. for 35 minutes or until done.

Mabel Reiff
Age 9
Lewisburg, Pa.

xxx

EASY CHOCOLATE CAKE

1 heaping cup sifted flour
1 rounded tablespoon cocoa
1 teaspoon baking soda
1/8 teaspoon baking powder
1/8 teaspoon salt
1 egg
¼ cup shortening
1 cup granulated sugar
¼ cup buttermilk or sour milk
½ cup boiling water
1 teaspoon vanilla

Measure and sift flour, cocoa, baking soda, baking powder, and salt. Beat eggs. Add shortening, sugar, and cream well. Mix alternately with dry ingredients. Add buttermilk, water, and vanilla. Batter will be thin. Bake in hot oven at 375° or 400°F. until done. Use 8 x 8 inch cake pan.

Etta Zimmerman
Age 7
Millmont, Pa.

xxx

BUTTER PECAN CRUMB CAKE

½ cup firmly packed brown sugar
½ cup all purpose flour
½ teaspoon ground cinnamon
¼ cup butter, softened
1 package (2 layer size) yellow cake mix
1 package (4 serving size) butter pecan instant pudding and pie filling
1 cup sour cream
⅓ cup vegetable oil
4 eggs
½ teaspoon maple extract (optional)

Combine sugar, flour, and cinnamon in a small bowl. Cut in butter to make crumbs, set aside. Combine remaining ingredients in large mixer bowl. Blend, then beat at a medium speed for four minutes. Pour into a greased and floured 10 inch tube pan. Bake at 350 degrees F. for 50 minutes, carefully remove partially baked cake from oven and spinkle immediately with crumb mixture. Bake ten to 15 minutes longer or until cake tester inserted in center comes out clean and cake begins to pull away from sides of pan. Do not underbake. Cool in pan ten minutes. Carefully remove from pan, finish cooling, crumb-side-up, on rack.

xxx

CHOCOLATE CAKE

3 cups brown sugar
4 tablespoons cocoa
lard the size of three eggs
1½ teaspoons vanilla
3 eggs
3 teaspoons baking soda dissolved in vinegar
¾ cup thick milk
3 cups flour
3 teaspoons baking powder
1 1/3 cup boiling water

Cream brown sugar, cocoa, lard and vanilla together. Add eggs. Then add other ingredients. Mix well. Pour into cake pan and bake at 350 degrees F. for 35 minutes or until done.

Ellen Zimmerman
Age 12
Leola, Pa.

xxx

VANILLA PIE

Bottom Part:
½ cup brown sugar
½ cup dark molasses
1 tablespoon flour
1 egg
1 cup water
1 teaspoon vanilla
Top Part:
1 cup flour
½ cup brown sugar
¼ cup shortening
½ teaspoon baking soda
½ teaspoon baking powder

Combine ingredients for bottom part of pie and mix well. Cook until thickened. Pour into an unbaked nine inch pastry crust. Top with top part of pie, which forms crumbs. Bake at 375 degrees F. for 40 to 45 minutes.

Jere Martin
Age 12
Fleetwood, Pa.

xxx

GRAHAM CRACKER PUDDING

1 quart milk
1 cup graham crackers
1 cup brown sugar
2 teaspoons vanilla
2 eggs

Heat milk to lukewarm. Beat eggs. Add to lukewarm milk, then add other ingredients. Stir well. Cook about five minutes.

Irene Oberholtzer
Age 14
Narvon, Pa.

She's wrapping Christmas presents

(Continued from Page 86)

all the figures," Gloria computes, "but that's just doing it in your spare time."

In her basement she has taught as many as nine individuals at once, and says she does it mainly for the friendship and fun of it.

But, she warns, she's a perfectionist. It's Gloria's belief that a person can learn to do any hand craft, but the teacher is a key figure.

"The teacher has to learn to say, 'Oh, that doesn't suit me,' sometimes, rather than to never criticize," Gloria states matter-of-factly.

"The girls have told me that I hurt their feelings at first when I would tell them their work didn't suit me, but now, when they see the kind of work they do, they're glad I was that way."

In the month of May, Gloria will be extending her hobby to outside organizations as well as her group of friends. At that time she will be teaching 23 women from a Lancaster County Farm Women Society how to clean and paint ceramics. She will teach them this process one week and then return two weeks later to paint the pieces.

Crafts have also added a new lustre to her family relationships. Every Tuesday her younger daugher, Cindy Drumm, arrives and the two spend the day making crafts. They now have quite a collection which they will be taking into a friend's home to demonstrate and sell.

"I just love getting together with my daughter and working on these crafts," she notes. "There's a togetherness there that's hard to describe."

Cindy's husband travels frequently because of his job, so the Tuesday get-togethers are fellowship for her, as well. Gloria's older daughter, Bonnie Hosler, also supplies a few crafts of her own.

The women have now placed a few of their items on consignment at Meadowbrook Farmers Market, Leola.

For further information on demonstrations or classes, Mrs. Althouse can be reached at 717-665-5681.

NZN®...a better way of getting zinc into plants.
NZN is a patented combination of nitrogen and zinc in liquid form. In foliar application, NZN has proven about four times more effective than other zincs Including expensive chelated zincs
In addition, NZN supplies nitrogen So besides getting zinc into plant tissues faster than ever before, you're getting nitrogen in as well
Test NZN against any other zinc You'll be convinced before the season is over, that for getting zinc into plants, nothing comes close to NZN

Nursery school not too good too soon

By SALLY BAIR
Staff writer

LANCASTER – The preschool years are the most plastic, critical and life-shaping years of a child's life, and because of this, Mrs. William Grove thinks parents should not be sending their children off to nursery school when they are two to three years of age.

Julie is the mother of four children, and was speaking her convictions at a parenting seminar sponsored by the Lancaster County Extension Service last week. She is one of the organizers of a parenting group in Landisville which meets regularly to discuss common problems of parenting, and has organized a play group which includes her 2-year-old daughter.

Julie said, "Many mothers are feeling pressured in to sending their children to nursery school, and as a result there are some 2- and 3-year-old children going regularly to nursery school. If you really want them to go, send them one year before kindergarten - not for three years."

When children are forced into nursery schools at early ages, Julie contends, "They become disinterested in school and are no longer excited about formal education. The whole thing is being distorted." In our society children have 13 years of structured education to look forward to. "It is no wonder children become bored with school."

Julie said she feels there are some excellent nursery schools, and added that the staffs of these schools and day care centers have a "lot of knowledge, a lot skill and they love children." What is lacking, however, is the love for one child. "Who is more skilled than a parent in understanding the needs of their child and in proving a sustaining atmosphere at home" Julie questions.

"We must put our priorities in order and you must decide what is best for you and your child and your family." Julie said it is her personal belief that the existance of day care centers is pushing some women back to work when they may really prefer to stay at home. Just as some children may lose their identity in a large family, they may become lost in a large group at a school or day care center.

Julie Grove tells alternatives to nursery school at a recently held parenting seminar in Lancaster.

"You are your child's first teacher," Julie said. "A parent should create an environment for learning but not feel they must teach reading or other academics.

In your home, teaching should not fit a time schedule. Do things when they are right for you. Parents have an enormous opportunity to influence children." Julie said that even a simple act like sorting laundry can be a learning experience for the pre-schooler.

Julie pointed out that 80 per cent of a child's intelligence is decided by age eight, and their personality is shaped by age five. "Are you willilng to have someone else share in these moments?" she asked.

As a former elementary education teacher, Julie had several concrete ideas to share with women as they prepare their children for the rest of their life. "The most important thing to develop in a pre-schooler is a good self-image, so they feel positive about themselves and others." At the pre-school age they need to learn to respect others and the property of others, she said.

Patience and understanding are important things to be learned in the formative years, according to Julie. For instance, she said, "Bright children must learn how to bear with slower children."

It is helpful to develop an attention span. "Let them keep playing if they are involved, and if you must take them away from their play, give them a five minute warning. Discourage older brothers and sisters from interupting their play so they can develop patterns of staying with a project."

Developing good listening habits will help the child learn to take directions and could be important for his safety, Julie said.

Reading to young children

Nursery school

(Continued from Page 90)

will teach them an appreciation of books and teach them as well.

Julie said she feels it is important to have lots of paper, crayons, paint, and felt tip markers available to children. "Look for scrubbable and non-toxic things," she said. The backs of paper that has served its initial purpose can be used, and teaches economy too. "At this age they are at their most creative stage in life," Julie said and their creative instincts should be encouraged.

To develop your child's greatest potential, Julie says it is important to talk with your child. "They may not understand everything you are saying, but they'll learn. They are intelligent from the moment they are born."

Julie is a firm believer in using simple household items for learning. "The kitchen is a super place for learning," she said, citing examples of the many ways children can use ordinary utensils.

Magazines and catalogues are great sources for cutting pictures and learning. Julie suggested that mothers consider making books for children with pages they have cut and pasted from magazines, having each page deal with a color or an activity.

Discarded clothing can be used by the pre-schooler for dress-up, and will bring hours of amusement. Having picnics together-indoors in winter-and taking walks can be learning experiences. Planting seeds will bring joy and wonder to a pre-schooler. With gardening time here, don't by-pass opportunities for education whle working together outdoors.

Julie cautioned mothers, "Don't be so tidy and neat. Let your chld experience mud." Sand and water play, which some mothers may consider too messy, offer a world of excitement to the pre-schooler.

So if you don't send your child to nursery school, who will he play with? Sunday church school offers interaction with other children, as do classes such as swimming and ballet. Many schools and branch libraries have story hours for small children and offer them the group experience as well as introducing them to the whole world of books and the education they offer.

Play groups, organized on an informal basis, can involve children in many of the same activities as a nursery school. In a neighborhood it can be inexpensive and a very positive learning experience. Julie told mothers not to hesitate to take pre-schoolers to industry, farms, or other community institutions which would offer a learning experience.

Julie suggested that the mothers should take advantage of the formative pre-school years and contribute as much as they can to their child's mental and spiritual development

Farm Women Societies

Berks Co. Society 4

The monthly meeting of the Berks County Farm Women Society 4 was held at the home of Edna Angstadt, Earlville, on April 4. There were 12 members present.

The group will be purchasing a gift for the 18 members of Society 8, who will be celebrating their 10th Anniversary on April 25.

Upcoming events include the Volunteers' Tea at Berks Heim on May 10 and the Spring Rally at Hershey Center on May 17.

A work day was held at the home of Barbara Campbell, Earlville, on April 12, to start preparations for the annual Fall bazaar.

The next meeting will be held at the home of Georganna Fullerton on May 2.

Dauphin Co. Society 1

Dauphin County Farm Women Society 1 held their April meetin at the home of Jean Janssen with Ruth Oberholtzer and Ruth Rife as co-hostesses. President Pat Baum called the meeting to order. Plans are being finalized for the May meeting, when the Society entertains Society 10, with JoAnn Stine and Barbara Fisher heading the committee. A letter of thanks from the Harrisburg State Hospital for clothes that ladies of Society 1 have donated was acknowledged by President Baum.

On June 12th Society 1 will be entertained by Society 9, Chambers Hill, in the Chambers Hill Fire Hall.

President Baum also reported on the Dauphin County Farm Women Board Meeting which she attended. Several items from this meeting were discussed by Society 1.

Lancaster Co. Society 3

The members of Lancaster County Farm Women Society 3 entertained the members of Society 23 on April 15 at the Salem Lutheran Church, Ephrata. A luncheon was served by the program committee.

The business meeting was in charge of the president, Mrs. Miriam Moore. It was reported that 101 bed pads, 4 pairs of slippers, a pressure pillow, and a lap robe were made by members of the society and delivered to the Cancer Society in Lancaster.

Members of the society will spend June 24 on a cruise of Tangiers Island.

Speaker for the meeting was Noah Wenger, representative to the General Assembly in Harrisburg. He talked of his duties and responsibilities as a representative to the state government

The next meeting of the group will be on May 20 at the meeting room of the Coca Cola Building, Lancaster. Mrs. Suzanne Hoffman will be hostess. Mr. and Mrs. Jay Smoker will show slides of their recent trip to Africa.

Lancaster Co. Society 8

Lancaster County Farm Women Women Society 8 met in the home of Gladys Ney, Marietta, on April 15.

Mrs. Roy Eshelman, from the Lancaster area presented the special feature of the afternoon as she spoke on quilts. This has been her work and hobby for twelve years. Many pointers on the history, of the making and the care of these pieces of handwork were given. The various kinds of quilts from the year 1750 to the present day were described. Several of her own quilts and pillow tops were shown.

Hostesses Gladys Ney, Anna Mae Derr, Sylvia Warfel, Ruth Felty, and Anna Chapman provided refreshments.

The next meeting will be held May 20, at 2 p.m. at the home of Grace Bixler, Marietta R1. Barbara Walsh will tell of her experiences while staying in New Mexico.

Lancaster Co. Society 9

At the April meeting of Lancaster County Farm Women Society 9, the group entertained Society 29 with a covered dish luncheon at the Conestoga Pals Community Center. Three county officers also attended.

For the program, Mrs. Helen Eshleman gave a book review on a book called **Special People.**

A short business meeting was held.

The next meeting of the group will be held May 11 with Mrs. Oram Hager acting as hostess.

Lancaster Co. Society 18

The April meeting of the Lancaster County Farm Women Society 18 was held at the home of Mrs. Willis Esbenshade, Lancaster.

The business meeting was conducted by Evelyn Brubaker, president.

It was announced that the Welsh Mountain Medical Center will be the project for the year. A donation was given to the Easter Seals. The Spring Rally will be held at the Hershey Convention Center on May 17.

Mrs. Judy Frederick provided the program for the meeting. She spoke on macrame.

The next meeting of the group will be held at the home of Mrs. Christ Greider, on May 22, starting at 7 p.m.

Lancaster Co. Society 19

Lancaster County Farm Women Society 19 met at the home of Rhoda Hollinger, Lititz, for their recent meeting.

After refershments served by the hostess, the group heard a talk given by Lt. Spangler of the Lancaster Fire Department. He stressed the value of having heat and fire detecters in homes.

The Society is presently working on carrying out its goodwill project for 1978. Each Wednesday morning, three of its members work in a public school classroom. These people make it possible for some children to have a learning experience by helping them prepare a simple breakfast. Sitting down for breakfast with the children is proving to be a pleasant experience for all involved.

Lancaster Co. Society 22

Lancaster County Farm Women Society 22 met at the home of Mrs. Lester Landis, Lancaster on April 11. Co-hostess for the day was Mrs. Clarence Rohrer.

Mrs. Clare Witmer, president, conducted the business meeting. A decision was made to donate $200 to the Robert Schultz family. Twelve members are

planning to attend the Spring Rally at Hershey.

Aggie Arnold-Norman, home economist with the Lancaster County Extension Service, presented the program "Cooking with Crepes". Members were given recipes and watched a demonstration of Crepes Florentine, Mushroom & Ham Crepes, Black Forest Crepes, and Flaming Crepes. The results were served and enjoyed by all.

The May meeting will be held at the home of Mrs. J. Harold Ranck, 1717 Hans Herr Drive, Willow Street.

Lancaster Co Society 26

On March 30, Lancaster County Farm Women Society 26 met at the home of Lorraine Cassel, with Irma Esbenshade acting as cohostess. A report was given on the group's project of the year, visiting nursing homes.

Program for the evening was a talk on nutrition, given by Ruby Esbenshade.

Before the meeting, members met at Conestoga View to sing hymns for the guests residing there.

The next meeting of the group will be April 27 at the Farm and Home Center. Society 15 and county officers will be entertained.

Refreshments were served after the meeting.

Lancaster Co. Society 29

Lancaster County Farm Women Society 29 met April 17 at the home of Marcella Myer, Manheim R5. President Marty Bixler presided over the meeting. Roll call was taken having 14 members present.

After brief committee reports, the president installed three new members to the society. They were Sue Bixler, Sande Ober, and Joyce Wagner.

The program was turned over to the evenings speaker, Trudy Hamm, of Eileen's Health Club, Manheim. She gave a talk on resting, dieting, and exercising. Society members then participated in 20 minutes of exercises.

The Hostess and cohostess Lois Wells served refreshments to the members.

Next month's meeting will be May 15 at 7 p.m. at the Lehman's Nursing Home, Rheems. Dot Forry will serve as hostess and Genia Ziegler as co-hostess.

Lancaster Co Society 31

The Lancaster County Farm Women Society 31 met April 18, at the Mechanic Grove Brethren Church. A short business meeting was held.

The group entertained Society 20. For the program Mrs. Miriam Layman spoke about "The Seasons of Women". Also Mrs. Robert Wagner sung two songs.

The group will be entertained April 27, for a noon meal at Mechanic Grove Brethren Church by Society 17.

Our next meeting will be held May 22, at the home of Mrs. Kenneth Rutt, Quarryville R2.

Lebanon Co. Society 5

The Lebanon County Farm Women Society 5 held their April meeting at the home of Janice Light. Twenty-one members and one guest attended.

President Minerva Lentz conducted the business meeting. Members received their tickets to the Spring Rally to be held at the Hershey Convention Hall, Hershey.

Bus trips were discussed at the meeting and the group decided to tour the western part of Pa., including the West Mooreland Glass Company and the Bedford Village. Cost of the trip is $12. The bus will leave on May 24 at 4:30 a.m.

Northern Lebanon student Jill Walmer will receive an award of $10 for being the outstanding home economics student.

Essays are wanted from girls between the ages of 14 and 18. They should be entitled "The advantages of being a farm girl over a city girl". The winner of the contest will be named the Farm Girl Queen.

Safety posters were judged by the program committee. Phyllis Himmelburger spoke on "Is your farm a safe place?"

Games were conducted by the game committee and refreshments served by the hostess.

Next meeting of the group will be held at the Kimmerling Grange Hall. Society 15 and Berks County Society 2 will be entertained.

York Co Society 1

On April 5, the York County Farm Women Society 1 met at the home of Mrs. Mary Decker, York. The meeting was in charge of President Mrs. Pauline Rishel.

During the meeting, Mrs. Iva Craft, Mrs. Mabel Rishel, and Mrs. Jessie Gross were honored for their outstanding activities in the community.

Future activities of the Society include the State Farm Women Society Spring Rall in Hershey on May 17; tne W.S.B.A. Cooking School

on April 24 at the Wisehaven Hall, East Prospect; the York Hospital Fete, May 19 and 20 at the York Fairgrounds; and a bake sale to be held at a date to be announced in the future.

Entertainment for the afternoon was a talk on cancer given by Mrs. Jean Kiem, of the York County Cancer Society.

The next meeting of the group will be on May 3, in the Community Room of the York Bank and Trust Co., Mauchester. Hostess will be Mrs. Grace Bentzel.

York Co.

Society 2

York County Farm Women Society 2 celebrated the 38th birthday of the April 9, 1940 founding with a Smorgasboard lunch at Washington House, Wrightsville, Pa.

Two still very active charter members, Viola Innerst and Estella Stump were honored by a "This is Your Life" program prepared by Blanche Sechrist. The two charter members received gifts of scarves.

Society 2 will entertain Society 5 at a June 14 picnic at Lake View Park. Society 2 will be entertained by Society 19 of Glen Rock. The group still has a few seats left for the May 23 Bus Trip to Washington, D.C.

Some members plan to attend the WSBA's Homemakers' meeting at Wisehaven Hall on April 24 at 7 p.m.

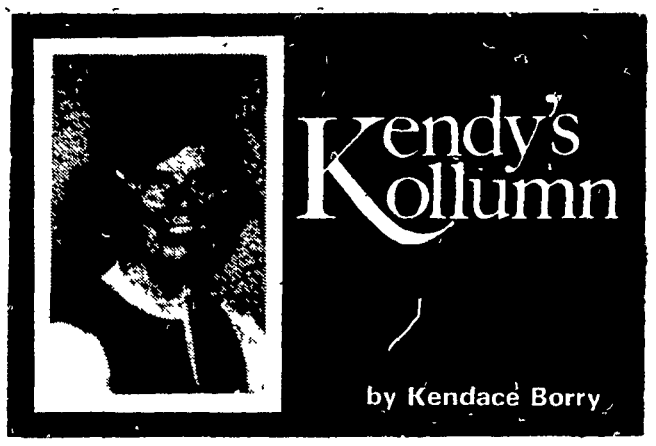
Mary Herbst to host the next meeting on May 10, at which there will be a plant exchange. A gift is also to be purchased for the York County Society of Farm Women's picnic on July 26.

York Society 7

Mrs. Robert Emsweiler hosted the April meeting of York County Farm Women Society 7.

The group discussed plans to entertain Society 27 in July. The 30th birthday party of the Farm Women Society will be held on June 14 at 6:30 p.m. at the Embers Restaurant.

A total of 352 pads were made by the group and donated to patients at Pleasant Acres.



"Have you ever thought of all the ice cream flavors that no one has ever made?" I asked my girlfriend Jean as we busily licked the cones we were eating." Here we sit, you and I, with our old faithful flavors, and a whole world waits out there to be explored."

She looked at me as if I was a little crazy, but I'm used to my friends looking at me that way.

"For instance," I continued. "Think of the possibilities of rubber flavored ice cream. Not only would it have a rather unique flavor, but if the scoop fell off the cone, it would bounce once and come right back up."

"There should be such flavors as lettuce ice cream, or spinach ice cream, for those people who like to stick to their diet. And grass flavored ice cream, for the nature lovers. Why, the possibilities are endless!" By now, I was totally involved in my idea of expanding the ice cream market.

It didn't take Jean long to catch on.

"Sausage-flavored ice cream!" she exclaimed. "Hamburger ice cream for those who can't make up their minds whether to eat lunch or dessert."

"Rose ice cream, chalk ice cream, or oppossum ice cream!" I added. This list was getting longer and longer as we both got into the act of thinking of the latest in ice cream flavors.

"How about cloud ice cream? Or maybe leaf ice cream, or even steel ice cream?" When Jean's imagination gets moving it goes wild.

"Baseball ice cream for the games, gravy ice cream, plastic ice cream..." on and on we went.

And then I had to spoil it all. "Skunk ice cream!" I shreiked. 'Yuuuuuuccccckkkkk!"

Jean looked at me and I looked at her and we both made faces. Then without a further word, we went back to licking our standard flavors.

Maybe the ice cream industry does have things well in control.

Ladies Have You Heard

By Doris Thomas

Lancaster Home Economist

WHERE SHOULD YOUR LAUNDRY ROOM BE?

Laundry day has become a shared experience in many households, with more and more women in the work force. Doesn't it make good sense to place equipment in a location convenient to everyone, and to provide time-saving features?

The location depends on family size, age, lifestyle, available space and where most activities take place. When buying a home or remodeling to make way for laundry appliances, bear in mind that proper plumbing fixtures, electrical outlets and/or gas connections, and ventilation are essential.

Laundry equipment placed near existing plumbing minimizes costs. The most convenient areas are the bedroom-bathroom or kitchen since most laundry comes from soiled clothing and linens. The kitchen is the most popular because it is the hub of family activities.

Other choices vary from basement or multi-purpose room to garage. Washer-dryer pairs also fit neatly in hallways, alcoves, under stairs and breezeways. Mini and stackable appliances are available. Check space and sizes before undertaking any major installation projects.

A well planned work area saves steps and time. This can be accomplished by centralizing equipment, supplies and arranging them in order of use.

Equipment should include a washer and dryer placed close together with some work area adjacent to them for sorting and folding clothes; a sink for pretreating and soaking; and storage space for laundry products, measuring utensils, spot and stain removal supplies. Location depends on the family household, e.g. if there are young children, supplies should be kept in cabinets or on a shelf out of a child's reach. Have equipment for ironing and mending nearby, if possible. Hanging space – a closet, portable garment rack, clothes pole, extension rod – is useful for placing articles on hangers to be dried or put away. A clothes line is necessary if a dryer is not available.

Be "hamper-wise." Instead of storing everything in one hamper, why not teach the family how to sort laundry and also help lessen the work load? Provide bins near laundry equipment labeled whites, colors, special care, etc. If all the laundry goes into one hamper, at least make it portable – carts on wheels are available as well as canvas hampers which can be mounted on a cart. A basement laundry area may mean extra up and down steps. A chute can be installed with a basket at the bottom to accept soiled items.

After washing and drying is completed, sort clean clothing into personalized bins. The family can pick up their own duds and linens. A ready-to-use ironing board and iron close by may even encourage do-it-yourself touch-ups!

Plan a dual purpose work area, if space permits. A combination laundry-sewing-ironing area is helpful. Other duos include a child-care, gardening, freezing and canning, craft or toolshop center coupled with laundry facilities. More efficient use will be made of counters, sinks and storage space.

Choose ways to lighten your laundering chores in overall planning. Easy-to-clean counter surfaces which are stain and mar resistant; washable wall coverings and flooring; carpeting that can be shampooed are a few suggestions. Countertops 36 inches (90 cm) above the floor allow a person of average height to maintain correct posture and avoid fatigue while working. Wall cabinets should be low enough for easy access to frequently used items.

A convenient location and peoperly situated equipment can make the laundry area work for you, not to mention saving valuable time!

INGREDIENTS IN NEW FIBER PRODUCTS

Sawdust in your bread? That's what some people think comprises the fiber in some of the new "fiber" breads on the market.

It isn't sawdust as you normally think about it–the residue left over from sawing a board or the huge piles at the local sawmill you would buy to mulch plants or bed a stable.

Cellulose--the fiber component in the breads–is an organic chemical, the most common one found in nature. It is the structural framework of all plants and can be isolated from any plant source. The question then becomes, what is the most economical source of cellulose for commercial food production.

The cellulose added to fiber breads is essentially the same as found in lettuce, celery, carrots or bamboo shoots–the source is merely different.

Alpha cellulose, the technical name for the fiber added to some of these new breads, is derived from wood pulp, an economical and replenishable source from which cellulose can be isolated. Alpha cellulose is a highly purified food grade cellulose when dry, and virtually free of lignin, fat, ash, and protein.

Alpha cellulose is quite safe for human consumption and has passed extensive testing for safety conducted by the Food and Drug Administration as are all additives used in foods.

High-fiber breads will have an ingredient lable-listing giving the ingredients in order of decreasing amounts.

Farm Women's Calendar

Today, April 22

Lancaster Co. Society 4 meeting, entertaining Society 24, county, and state officers; at the Farm and Home Center, Lancaster. Begins at 12:30 p.m.

Ida's Notebook

Ida Risser

Children in high school today learn a lot more than just the subjects that they study. Yes, they master physics, chemistry, calculus and learn to converse in other languages. But, sometimes the other activities also teach a lot. There are many clubs which help them achieve skills in music, hand crafts, rifle, and even chess and cards.

And a field unto itself is sports. The time and effort spent by track and wrestling teams is difficult for me to condone. When our son decides to run five or eight miles on a Sunday afternoon, just to keep in shape, it seems a waste of effort in my mind. Now, if he wanted to go shopping, and instead of giving him the car, I said, "Oh, you can run to Lancaster and get your things," I'll bet there would be a sad face.

However, what I really started out to tell you about was the four political parties that were organized at Manheim Township High School to elect officers for Youth Day in Government. Both of our children were very involved and worked quite hard to have their candidates elected. Several mornings they got up at 5 a.m. to be at school by 6:15 in order to make and hang posters. They even used regular voting machines and learned how to operate them.

Finally election day came and they were lucky enough to have their party sweep to victory! But, now, another problem surfaced after the election. As a few of their members lost to other party candidates, somehow they had to be rewarded and placed in appointed offices. The patronage system really gave them trouble there were more prospective candidates then there were offices to be filled. Does one give the job to a hard worker? Does one give the job to a friend? Or, does one give the job to the best qualified? Live and learn.

Plant lovers' corner

Commercial fruit course offered

UNIVERSITY PARK – The best time to prune fruit trees is early Spring after the worst of the Winter weather has passed and before leaves come out on the trees, advises Marshall Ritter, professor of pomology and Extension specialist in pomology. Ritter, in his correspondence course on commercial fruit growing, cautions not to prune trees while they are frozen because wood is more liable to split and is also more subject to Winter injury.

Ritter also details steps to rejuvenate old trees (25-years-old) so that they will have five to 10 more years of life. Other lessons in the course cover location, planting, soil management, pruning, packing, and marketing of commercial fruits. Apples, peaches, pears, plums, cherries, and quinces are the fruits emphasized.

This 12-lesson course, intended for those interested in growing tree fruits as a business, is available from Box 5000, University Park, Pa. 16802. Specify "Commercial Fruits," and make your check for $6.50 payable to Penn State.

A companion course, "Diesease and Insect Problems in the Commercial Orchard," covers the major diseases and insects of apples, pears, peaches, cherries, plums, and other deciduous tree fruits. Written by Donald H. Petersen, professor of plant pathology Extension, and Stanley G. Gesell, professor of entomology Extension, the course does not give specific chemical controls but gives other planting and sanitation practices used to control disease and insects and includes symptoms of damages.

To order this five-lesson course, write for "Disease and Insect Problems," Box 5000, University Park, Pa. 16802. Make your check for $3 payable to Penn State.

Steppingstone Museum to open

BEL AIR, Md. – On Saturday, May 6, Steppingstone Museum in Harford County, Md., will open for its ninth season.

Steppingstone Museum is a unique Harford County institution, the largest and most active museum in the county devoted to America's past. It was founded by the late J. Edmund Bull "that we shall remember where we came from and that we shall be able to look intelligently into the future."

It is a non-profit organization dedicated to the preservation of rural Americana and its arts and crafts of the nineteenth and early twentieth century and is operated and staffed by volunteers, members of the Steppingstone Museum Association.

Five buildings house a collection of over 14,000 artifacts and depict how our forefathers lived and worked a 100 and more years ago. Rooms are arranged as in a turn of the century rural home and shops are open which contain the tools of the old-time broommaker, joiner and wood turner, leathermaker, cooper, plumber, tinsmith, slater, spinner, weaver, and other crafts.

The architect's office and carpenter's tools are from the original collection of the founder. Scale models of a nineteenth century farm house and barn show methods of construction and materials used.

Steppingstone Museum is open Saturday and Sunday, 1 to 5 p.m., May to mid-October, with members of the Association on hand to guide visitors through the various buildings and exhibits. Visitors to the museum are asked to make a small donation to help defray operational costs. The museum is located at the corner of Md. Rt. 136 and Macton Road, three miles north of U.S. Rt. 1, midway between Dublin and Whiteford.

Wool payments boosted

WASHINGTON, D.C. – Sheep growers will receive about $25 million in federal incentive payments on their 1977 marketings of shorn wool, according to Ray Fitzgerald, administrator of the Agricultural Stabilization and Conservation Service (ASCS). This compared with $7 million in payments made for 1976 marketings.

Payments for 1977 marketings will be sharply higher than for 1976 because the support price for shorn wool was increased from 72 to 99 cents per pound by the Food and Agriculture Act of 1977. The support level had been 72 cents a pound since 1970. The 1977 national average market price for shorn wool was 72.0 cents a pound, 27.0 cents under the support price. Therefore, the payment rate for 1977 marketings of shorn wool – the amount required to bring the average price up to the incentive price – will be 37.5 per cent, compared to 9.6 per cent in 1976. At the 72 cents a pound support price, there would have been no payments on 1977 marketings of shorn wool.

The wool program is intended to encourage a grower to improve the quality of wool with a grower's incentive payment determined by multiplying the payment rate times the net dollar return received from sale of the wool.

Mr. Fitzgerald also announced the payment rate will be $1.08 per hundredweight on unshorn lambs sold or slaughtered in 1977. This payment is to compensate growers for wool on live lambs they market. The payment is based on the shorn wool payment rate, the average weight of wool per hundredweight of lambs, and the price of lamb's wool relative to the national average price for shorn wool.

Deductions of 1½ cents a pound from 1977 shorn wool payments and 7½ cents per hundred pounds of liveweight from 1977 lamb payments will be made to finance advertising, sales promotion and related market development activities. These deductions, provided for in the National Wool Act of 1954, were approved by an 85.5 per cent favorable vote by sheepmen voting in a November 1974 referendum.

ASCS will soon begin making payments to growers through its county offices.

No payments will be required on 1977 marketings of mohair as the average of $2.87 a pound received by growers was above the announced support level of 149.8 cents a pound.

Crop acreages change

HARRISBURG – Pennsylvania farmers plan to devote more acreage to soybeans, oats, tobacco and hay in 1978 than last year according to the Crop Reporting Service. Based on April 1 intentions corn acreage will be unchanged while acres of potatoes and barley are expected to decline.

Expected 1978 acreage and the change from 1977 are as follows: soybeans planted, 75,000 acres, up seven per cent; oats planted, 395,000 acres, up one per cent; all hay for harvest, 1,920,000 acres, up less than one per cent; tobacco for harvest, 13,500, up four per cent; corn planted, 1,615,000 acres, no change; potatoes planted, 27,000, down four per cent; and barley planted, 130,000 acres, down four per cent.

At the U.S. level, corn plantings are expected to total 80.2 million acres, three per cent below 1977 and one per cent below the January 1, 1978 intentions. Feed grain acreage (corn, sorghum, oats and barley) is expected to total 123 million acres, down four per cent from 1977. Food grain acreage (wheat, rice and rye) is expected to decrease 11 per cent to 70.9 million acres. Oilseed acreage (cotton, flaxseed, peanuts, soybeans and sunflower seeds) is expected to total 81.8 million acres, nearly five per cent above 1977.

Expected 1978 acreage by crop and change from 1977 are as follows: all corn planted, 80,237,000 acres, down three per cent; oats planted, 16,408,000 down eight per cent; barley planted, 9,998,000, down six per cent; all wheat planted, 65,492,000, down 12 per cent; soybeans planted, 63,664,000, up eight per cent; all hay for harvest, 60,831,000, up one per cent; all potatoes planted, 1,374,100 acres, down one per cent; fall potatoes planted, 1,157,600 acres, down one per cent; and tobacco for harvest, 1,329,200 acres, up four per cent.

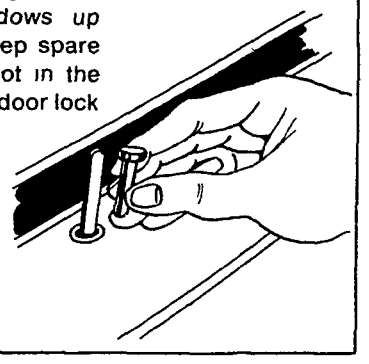
Some tips to protect your car from theft Roll windows up tightly as possible Keep spare keys in your wallet, not in the car Replace standard door lock buttons with slim, tapered kind which are difficult to pull up with a coat hanger



Home on the Range

(Continued from Page 88)

POTATO SALAD DRESSING

2 onions
2 to 3 teaspoons prepared mustard
1¼ teaspoons sugar
½ teaspoon black pepper
1 tablespoon chopped parsley
1¼ cups water
½ cup cider vinegar
1 teaspoon salt
1 teaspoon celery salt
½ cup oil

Peel and finely chop the onions. Bring the water to a boil in a saucepan. Add the onion, mustard, vinegar, sugar, and salt, celery salt, and pepper. Simmer for one minute, then remove from the heat. Stir in the oil and parsley. Dress cooked sliced potatoes while they and the dressing are still warm, then allow to cool. Serve at room temperature. This dressing can also be used for celery, tomato, green bean, beets, beet sausage, and fish salads. Makes two cups of dressing. NOTE: Tiny new potatoes are ideal for the potato salad. Cook in their skins for maximum flavor and toss in the dressing while still warm.

'Perfect mother' concept a myth, says expert

By SALLY BAIR
Staff writer

LANCASTER – There are many myths surrounding the image of what the "perfect" mother should be. The myths include such things as keeping an immaculate house, never working outside the home and forgoing any identity as a person. These myths are simply that, according to Marilyn Ferguson Priest, and mothers should not become trapped into always sacrificing their wants for their children.

"It is important for mothers to begin to say, 'I am a person; I need time for myself,'" Marilyn told a group of young mothers attending the parenting seminar sponsored last week by the Lancaster County Extension Service.

Maryilyn is an instructor of parenting classes at the Young Women's Christian Association in Lancaster, co-author of "Practical Parenting," and co-ordinator of a parenting program at Millersville State College.

If mothers do not allow themselves some personal time, anger and frustration start to build. "Parenting rights are important, and if you learn to take time for yourself, children will also learn to develop a private self," she said.

Reading from "A Child's Memo" prepared by the Adler Institute in Chicago, Marilyn told the mothers that children want to know the limits which are expected of them. "They need you to be the leader - and prefer it. You do not need to be an authoritairian, but you must be a leader."

"Don't make me feel smaller than I am," the memo states. Marilyn said parents should use more positive statements in the course of interchange with their youngsters. Most commands and discussions are couched in negative terms - count how many times you say "no" or "don't" during one hour with your young child.

Marilyn said it is hard to know the developmental stage children are in, but they should be given the chance to develop and do for themselves the things they can.

"It is better to ignore some of the bad habits which arise, because by giving them attention you encourage them to continue," Marilyn said.

Often, Marilyn says, parents tend to wait until the crisis happens and then try to use it as an opportunity to teach. Children do not want to be corrected in front of other people, but quietly by themselves.

Children do not want to be "preached" to, Marilyn stated. It is important in communicating with children to do more listening than talking. If you nag constantly, chances are the children will tune you out.

Marilyn said it is important that parents not turn children's mistakes into "sins." There is a difference between being bad and making mistakes; furthermore, it is probably better not to ask for explanations of their mistakes.

Parents should worry less about the small amount of time they spend with children. "How the time is spent is more important. You must make time to be with your children, individually and with good quality time," she says.

Perhaps the most important things a parent can learn in dealing with a child is to treat him like you treat a friend. If you do, your child will be your friend too.

Marilyn told the mothers not to be afraid to get help with problems they may be encountering in dealing with their children. "He may grow out of a stage, but it will be easier on you if you get help while he's going through it. There is a lot of support for you in the community."

Puzzled again this year?

This year you could take a chance on a bulk-blend fertilizer. Or, you could rely on a premium granular formulation from Farmers' Fertilizer.
Farmers' Fertilizer will mix a formulation especially suited for the type of soil on your farm, and for the crops you grow.
That way, you'll get exactly what you need in basic N, P, K. Plus you'll get these benefits from the new premium formulations.

- Important secondary plant nutrients to beef-up your soil.
- At least three forms of nitrogen for better yields.
- Low calcium carbonate content to protect soil pH and reduce liming costs.
- Starter row fertilizer contains 100% mono-ammonium phosphate for less seed damage.

When you visit Farmers' Fertilizer, you won't have to wonder if you made the right decision for all your spring fertilizer and ag chemical needs.

Consumer group defends farmers' antibiotics

STAMFORD, Conn. – Consumers will be paying higher prices for meat, poultry and dairy products without any added benefit if a Food & Drug Administration proposal to restrict use of antibiotics in animals feeds is adopted, the Consumer Alert Council has charged.

In comment submitted to the FDA, Consumer Alert President Barbara A. Keating said that nearly 30 years of experience using low levels of antibiotics in animal feeds has yet to reveal any apparent negative effect on animals or humans from the practice.

However, the same years have seen virtual disappearance of diseases once commonplace in cattle, hogs and poultry and increased productivity, she said.

FDA adoption of its proposal, Mrs. Keating argued, would represent "a scientific and social retrogression."

"It would seem today that we deal with two extremes," Mrs. Keating said, "the reckless use of chemicals or pesticides without concern about possible side effects...(and) a blind determination to rid the countryside of every trace of pesticide and strip our food of anything chemical or unnatural, regardless of proven safety and obvious benefits."

"We believe the FDA would do well," she continued, "to accept the recommendations of the National Advisory Food and Drug Committee to take no action other than to keep

Barbara A. Keating

apprised and ready to weigh any new developments should they be presented."

Mrs. Keating said restrictions on use of low levels of antibiotics in animal feed would have significant negative economic impact on farmers, which would result in higher prices for consumers.

Farmers, she said, see a real reduction in animal growth rates, reduced egg and milk production, and a slowing down in breeding of livestock if the FDA proposal is adopted. Use of the antibiotics stimulate animal growth and egg and milk production, and promotes increased fertility.

Action to restrict use of these antibiotics, she said, would require use of considerably more grain to try to compensate for these lost benefits of the antibiotics – a cost that would be borne by consumers at the meat and dairy counters of their grocery stores.

Still other factors, she said, would include increased loss of animals to disease – a circumstance now relatively unusual because of the "Preventive medicine" aspect of the use of antibiotics in feed – and higher veterinarian costs to farmers. These costs, too, would be passed along to consumers, Mrs. Keating said.

Consumer Alert, based in Connecticut, is a national organization of consumers aligned in their desire to preserve freedom of choice in the marketplace and in their opposition to government regulatory actions which result in needless costs for consumers.

Comment time extended on horse import rules

WASHINGTON – The U.S. Department of Agriculture has extended to May 1, 1978, the deadline for submitting public comments on proposed federal regulations that would specify conditions under which breeding horses over two years old (731 days) could be imported from countries affected by contagious equine metritis (CEM), a recently discovered veneral disease of horses.

The proposed new regulations would permit a horse over two years old to be imported under specified conditions from the United Kingdom, Ireland and France–where CEM has been reported. National veterinary officials would have to certify that specific training records show the horse never to have been bred and never to have been on a farm where horses are bred, and that three successive culture specimens taken from the horse at least seven days apart are negative for CEM.

Horses from Australia, where CEM has also been diagnosed, could not be certified under these proposed rules because USDA veterinarians have not been asked to make on-site inspections necessary to determine if Australian horses could meet these modified requirements.

Currently USDA regualtions only provide entry requirements for geldings, weanlings, yearlings, or horses imported under temporary permits-90 days or less–for non-breeding purposes.

Public comments on the proposed regulations should be submitted to the Deputy Administrator for Veterinary Services, Animal and Plant Health Inspection Service, USDA, 6505 Belcrest Rd., Hyattsville, Md. 20782.

Shoener named Extension dir.

UNIVERSITY PARK – J. Allan Shoener, Schuylkill County Extension agent on Penn State University's Cooperative Extension Service staff. has been appointed co. Extension director in Schuylkill County, effectiv. arch 1.

According to s. Ruth F. Funk, regiona assistant Extension director, Shoener will be in charge of educational Extension programming in the county in addition to carrying out his agricultural activities.

He was appointed to the position previously held by David L. Kantner who was promoted to assistant director for the Southern Allegheny Extension Region.

A native of Pottsville, Shoener was named to the Schuylkill County Extension staff in April 1977. He earned a bachelor of science degree in animal husbandry from Penn State in 1962.

Prior to being named to his present position, he was an administrative assistant for Agway, Inc.; assistant county supervisor for the Farmers Home Administration; and soil conservationist for the U.S. Soil Conservation Service.

Roadside marketing

Farm signs are silent salesmen

GETTYSBURG – Ohio State University's marketing specialist for horticultural products, Dr. R.A. Blakeley, considers signs to be very important if roadside marketing is to be a success.

According to a study conducted at Ohio State, nearly 75 per cent of customers surveyed at an Ohio roadside market indicated that highway signs were the means by which they had learned about the market. According to Blakeley, the content, appearance, location, construction, and visibility of the sign all contribute significantly to the sign's usefulness.

"Signs are silent salesmen," says the Ohio educator. With the season for fruit and vegetable production approaching rapidly, farmers may want to consider Blakeley's suggestions. They're applicable, incidentally, for not just fruit and vegetable sales, but for all types of roadside marketing.

To be really effective, Blakeley says, the "silent salesmen" must attract attention in less than 10 seconds. "They must tell who you are, where you are, and what you have for sale."

"Novelty attracts attention," the Ohio educator tells his audiences all across the country. "Along many highways, a bright, clean, neatly painted sign is a novelty in itself. Avoid blackboards, or messages scrawled in crayon on a piece of cardboard. They are hard to read and give the impression of a cheap, dirty market; not a place where you want to buy food. Avoid commercial signs for soft drinks, tobacco, etc., which destroy the farm fresh image. Signs which imitate highway department or traffic control signs in shape, colors, letter design and wording should also be avoided," Blakeley says.

To enhance their appearance and increase their effectiveness, Blakeley recommends that signs be painted every three years, or sooner if they become weathered, faded, or damaged. "Shabby signs imply a sloppy, poorly managed market," the Ohio researcher emphasizes.

In detailing proper sign making, Blakely instructs that signs should encourage the motorist to shop your market. "Listing a variety of products will attract more customers than having a sign which merely says "vegetables," he says. He recommends that roadside marketers use hand-separated product signs with hooks or snaps and eyes so that they can be easily taken down when that product is no longer available. "Leaving signs advertising 'grapes,' 'peaches' or 'strawberries' out all Winter is an easy way to lose customers next season," he warns.

"Give your market a

Farm signs

(Continued from Page 101)

distinctive name or trademark so customers can remember it," the educator from Ohio suggests. "Use this name or trademark in all your advertising, then put the market name on your highway signs so customers can recognize it. Finally, tell customers how to find your market. Give distances to your market in tenths of a mile rather than in feet or yards. Miles can be measured on the car's odometer. Other measures of distances are hard to relate to the landscape," he explains.

"Too much information can be as bad as too little," says Blakeley. "The more words a sign has, the less apt the motorist is to read it entirely. In fact, some signs are so wordy only the fastest readers traveling at the slowest rate could be expected to get the full message. The skillful use of symbols, such as a large picture of an ear of corn, or a big apple, can often convey the name of the item, and an impression of freshness and quality much faster and better than mere words. If local ordinances limit the size and number of signs, it is best to limit what you say, and say it in letters large enough to be easily read," the marketing specialist advises.

"Highway signs are no place to mention prices. Low prices only attract bargain hunters. The quality conscious customers you should be seeking will be driven away by mention of low prices, for low prices imply low quality. Stress a quality image in your signs by their neat, fresh appearance and restrained wording. Let the customer wait to learn the price until she can see for herself what fine quality merchandise she is getting for her money," Blakeley advises.

"One sign to shun like poison is the "Open" sign. The "Open" sign is the sign of a business in trouble. It doesn't offer the customer anything. Instead it's a thinly veiled plea for charity. You can't expect to build a good following of loyal repeat customers by hanging out an "Open" sign whenever you feel like playing storekeeper. A prominent display of merchandise, or a listing of the items you have for sale will attract far more customers than the fanciest, gold striped, fluorescent orange "Open" sign ever made," Blakeley says.

How far a sign can be seen depends in part upon the colors and size of letters used. The most legible color combinations suitable for roadside markets are bottle green on white, scarlet red on white, black on white and navy blue on white. Colors should also be selected to contrast pleasingly with the background against which the sign will be viewed, Blakely says on visibility of signs.

The Ohio State researcher also recommends that sign painters avoid using more than two different sizes or styles of lettering on any one sign. "Check to make sure the sign can be seen from as far away as needed for full readability, for tall grass, trees, fences, houses, and other signs can obscure your sign from view. Signs should be five feet above the roadway to be in the normal field of vision of motorists, and to be above weeds, grass, or merchandise which might obscure them. Of course, signs should be faced perpendicular to the highway, not parallel with it, and on the outside of curved sections of highway for best visibility. Put your signs out in the open where they will be well-lighted by Old Sol. Don't hide them in the shade of a tree or barn," Blakeley advises.

To help illustrate his point, Blakely has information available which tells how many words can be painted on a sign if the motorist is expected to read it at varying speeds. Distances from which signs must be visible to be fully read and minimum letter height have also been studied at Ohio State University. For example, a sign visible from a distance of 50 feet will allow no wording at all if the motorist is traveling 60 miles per hour. But from a distance of 200 feet, studies show that six words can be used. Minimum letter height in that case should be seven inches. At a distance of 500 feet, someone traveling by at 60 miles per hour will be able to read 18 words made with letters 17½ inches high. Slower traveling speeds increase the number of words a sign could be expected to convey. For example, at 200 feet, and 40 miles per hour, the sign could use 11 words.

The work done at Ohio State goes further in explaining optimum locations of signs. "Deciding to stop at a market takes time," explains Blakeley. "Bringing the car to a stop takes more time. When a motorist is traveling 50 miles per hour, each second carries him 73 feet closer to your market," the educator lectures. A way to help overcome this might be to post advance signs which alert motorists that roadside market is coming up.

"Next time you drive past your market signs, ask yourself 'Are they effective salesmen?' Are they really a sign of what customers will find at my market!'" Blakeley concludes.

4-H horse club meets

MANHEIM – The April meeting of the Boots and Saddles 4-H Club was held on April 14, at the Farm & Home Center, Lancaster.

The old business discussed included the club's open horse show at the Lower Hopewell Horse Center. There will be 25 classes in which money prizes will be presented, and three championships awarded at the end of the show. Also, there will be a used tack and clothing sale the day of the show. Items are to be brought to the club's tack stand and if sold, the club will keep 15 per cent of the sale price.

Also discussed was the club's clinic to be held on April 23 at the Fellenbaum farm, the 4-H Expo, and dates of importance.

After the meeting, Dr. Jeffrey Edelson presented a program on vaccinations, the coggins test, worming programs and "red alert" situations.

The next meeting will be held on May 12 at the Farm and Home Center at 7:30 p.m.

Messner delivers top FFA speech

BROWNSTOWN -- A speech entitled "What Do I See in the FFA" won first-place honors Wednesday afternoon for 17-year old Maxine Messner, a junior at Garden Spot High School. She competed against six other contestants from a three-county area.

Receiving top marks from all three judges, the young lady edged Lampeter-Strasburg's Clayton Shenk and Penn Manor's Janie Peiffer, who placed second and third, respectively. The same trio of Lancaster Countians last week shared in the top three placings in the Lancaster County FFA Public Speaking Contest. The area event brought in competition from both Chester and Delaware Counties and will be followed on May 2 by the Regional FFA Public Speaking Contest which encompasses eight counties.

Miss Messner, the daughter of Mr. and Mrs. Ronald White, Leola, delivered her 6-minute long speech with enthusiasm and confidence and displayed equal poise and knowledge during the 5-minute questioning period that followed. The result was a unanimous vote for first place from the judges – Donald Collins, press relations supervisor at Sperry-New Holland; Allen Tate, public relations supervisor for Victor Weaver Quality Eggs, Inc.; and Dieter Kreig, editor of

Top FFA speeches in a 3-county area were given Wednesday by, left to right, Clayton Shenk, Janie Peiffer and Maxine Messner.

Lancaster Farming. Miss Messner had placed third in the Lancaster County contest a week earlier. She plans to take up a career in veterinary medicine.

Runner-up in the contest was Clayton Shenk, 17, the son of Mr. and Mrs. Harold Shenk, Willow Street. A junior at Lampeter-Strasburg High School, the young man presented a dramatic speech entitled "It's Up to Us." Concerned with hunger in the world, Shenk had given the same speech in the Lancaster County contest, where he also placed second. Although he does not live on a farm, he works on one and has strong ambitions of becoming a diary farmer.

The contest's third-place finisher was the winner of the Lancaster County event a week earlier. Janice Peiffer, like Clayton Shenk, shared her concerns on world hunger with the group of fellow contestants, judges, and guests. Delivering her speech in eight minutes, 22 seconds, which is slightly longer than what is called for in the rules, she gave her reasons on why and how "To Feed a Starving World." The 16-year old daughter of Mr. and Mrs. Frank Peiffer, Mt. Nebo, the young lady lives on a farm and has hopes of going into a partnership with her father. Her specialty, she says, would be swine production, an enterprise with which she is already involved.

Others who competed in the public speaking contest held here on Wednesday afternoon were Danny Brooks of the Oxford FFA Chapter, Arnold Favinger and Jim Peters, both of the Green Thumb Chapter in Delaware County, and Daryl Shafer of the Owen J. Roberts Chapter.

N.Y. Hereford Show and Sale held

ITHACA, N.Y. – Good weather, quality consignments and good prices combined to make the 34th annual Spring Sale of the New York Hereford Association April 8 at Ithaca a banner event.

The number of cattle offered was down but the sale grossed $5,000 more than it did last year with the 26 females averaging $494 and the four bulls averaging $846.

For the first time in many years a show was held in conjunction with the sale which featured both Polled Herefords and Herefords from Virginia, West Virginia, Pennsylvania, Massachusetts and New York State.

Bob Dillner of Ace Polled Herefords, Millbrook, N.Y. was the show judge. He gave the grand champion bull, reserve champion bull and champion female honors to the Still House Hollow Farm, Hume, Va. entries.

Dom Sam Donald A 12, a June 1976 son of Dominion Donald 14 and a grandson of Sam Donald was grand champion and high selling animal. The buyer at $1,375 was Gary L. Baker, Baker's Pride, Castile, N.Y.

The reserve champion bull was Dom Sam 68, son of Sam Donald and was bought at $800 by Bob Sullivan of Dundee, N.Y.

The champion female was Dominion Sammie, a September 1976 daughter of Sam Donald. The buyer at $700 was Walker Moody of Newman, Ga.

The reserve champion female was SF Haze Howden an April 1975 daughter of Sir Howden K4. She was the high selling female and the buyer at $720 was Royce Herralla of Geneva, N.Y.

Other high selling females were Victorious Lady, a September 1976 daughter of SV Victorious 357 consigned by Donna Stape of Geneva and bought for $650 by Rocky Notch Farms of Struck, Pa.; KWA Vicky H8, a March 1976 daughter of RWJ Victor 212 FF 19 consigned by Kemara Hereford Farm of Memphis and bought for $650 by Elm Farms of Richmondville, N.Y.; KWA Victorian H 16, a June 1976 daughter of RWJ Victor 212 FF19 consigned by Kemara Hereford Farm of Memphis and bought for $685 by Tim Teed of Morris, N.Y.; and CHE Lamp Anxty RD45, a March 1976 daughter of RCC Perfect Anx 353 consigned by Ed Huxtable of Clay, N.Y. and bought for $640 by William Tenney of Groton, N.Y.

Herb Bambeck of Dover, Ohio was the sale manager and Theodore Kriese of Liverpool was the sale chairman.

The New York Hereford Association will have a summer Field Day July 15 at the Cornell University Livestock Teaching and Research Center at Harford.

The 1978-79 Membership Directory of the New York Hereford Association is ready for distribution. It contains member listings for both the senior and Junior associations as well as educational articles about herd health, marketing, and how Hereford breeders can receive help with specific problems.

Copies of the Directory may be obtained from the New York Hereford Association secretary Neil Bonter, 17214 Howard Road, Holley, N.Y. 14470.

Refinishing workshop set

WEST CHESTER – A free class on a new, more efficient method of furniture refinishing will be conducted by Eli F. Young, at the Extension office, 3rd floor, 235 W. Market Street, West Chester. The class is being sponsored by the Chester County Penn State Cooperative Extension Service on May 11, 1978. The sessions will be held from 9:30-11:30 a.m. and repeated from 1 to 3 p.m.

Those interested should register by calling the Extension Home Economist's office at 215-696-3500, by May 4, 1978. People whould indicate which workshop they will attend, morning or afternoon. Accommodations will be on a first come, first served basis.

Participants are encouraged to bring a small piece of furniture (example, a drawer) for on-the-spot consultation. Mr. Eli Young, representative from a nationally known refinishing company will demonstrate a product now on the market which elminates sanding and stripping by simply melting down the old finish.

In addition to refinishing furniture, the demonstration will include how to remove white water rings and cigarette burns, clean brass, remove wax build-up, fill dents and scratches and other hints for the care of fine furniture. A question and answer period will follow the class.

Refinishing classes are gaining popularity on a national scale, due to the increasing do-it-yourself market. Many reports state these do-it-yourselfers are expected to increase in mumber by approximately 20 per cent yearly during the next decade

At church service

Noah's Arc filled with live farm animals

By KENDACE BORRY

ELIZABETHTOWN – The dramatization "100 Per Cent Chance of Rain" brought the members of St. Paul's United Methodist Church, Elizabethtown, in contact with farm animals as the young livestock was brought into the church sanctuary as part of the Sunday morning program.

Instead of the usual Sunday church service, on April 16, the Children's Choirs, under the direction of Mrs. Jean Morris, Elizabethtown, took charge of the service, presenting the musical. The song and narrative tells the story of Noah and the Flood.

The day had been designated as a day of music in the church and the children had been practicing their parts since last August. The presentation included, besides the use of live animals, instruments, costumes, and creative movement.

The service started with a hymn sing in which the congregation participated. Then the creation story was told through responsive readings. After the morning offering and prayer, the musical began.

The part of Noah was played by the pastor of the church, Rev. Frank Nickel. Clothed in an Old Testament styled robe, and going barefoot, he gave a monologue telling how Noah learned of the impending flood.

Then the forty youth, mostly in grades one through eight, came onto the stage. Singing seven songs and participating in the drama, they retold the story of how Noah loaded the Arc, the rains came down, and the rainbow finally appeared.

When Noah loaded the Arc, the farm animals came into the picture. As part of the drama, as many live animals as possible were used.

The Farm animals were carried into the Sanctuary, checked by Noah, and then carried out the side of the church, presumably to the Arc.

The animals used included chickens, ducks, a lamb, and a five-week-old calf. The highlight of the show was when the 90 lb. calf made its entrance in front of the audience. Carried by its owner, Larry Garber, a member of the church, the calf took one look at the sea of faces, and tried to struggle out of its master's arms. Grimly holding onto the flailing legs, Garber firmly guided the calf through his role, until he disappeared out the side door of the church.

Orginally, a foal had been scheduled to be part of the performance, too, but Mother Nature foiled that plan by having the animal only be born two days before the performance.

After the animals were carried through, the youth again got into the act of performing, with some of them dressing as animals themselves. Lions, donkeys, doves, and hawks went across the stage among the youth who dressed as Biblical characters.

According to Douglas Smith, Director of Youth and Music at the church, the musical came from the Cloister Guild and is about five years old. The youth of the church will present the play again on April 30 at the Cornwall Manor Retirement Home, and a final presentation will be made on June 25, at the Elizabethtown Borough Park Amphitheater.

At the park production, more live animals will be used, due to the open air theater. Hopefully, Smith added, a wide and long column of animals will parade before Noah to be inspected and sent to the Arc.

Children participating in the production included: Alex Helm, Guy Hilton, Staci Kaylor, Shawn Reed, Matthew Royer, Aimee Achorn, Scott Coble, Lisa Fanus, Susan Fullerton, Nicole Grove, Rafe Grove,

(Turn to Page 107)

Some of the youth participating in the production included: in the back, Stefanie Good and Dennis Rosenberry, as Biblical characters, Diann Longenecker, Lisa Fanus, Scott Coble, and Becky Massa, as animals in the second row, and Cindy Greenly, Bob Cunard, and Vicki Zechman, as more animals, seen in the front row.

ALL AIR-COOLED DIESEL ENGINES ARE NOT CREATED EQUAL.

It s easier to call an engine 'heavy duty" than it is to build it that way Superior performance and long life are the result of special alloy heads integral lube coolers oil cooled pistons and the Deutz highly efficient axial flow cooling blowers These features plus 100% direct air cooling result in substantial fuel savings — 20 to 40% according to users — and far less pollutants Deutz air-cooled diesels — 5 to 500 bhp

Innovative farmers keep agriculture progressive

By JERRY WEBB
University of Delaware

NEWARK, Del. – Two men, as old as the average Delmarva farmer, are drawing on their years of experience and mechanical know-how to assemble a giant machine that will have great impact on the way they farm. Two men, who themselves planted corn with a two-row planter and a team of horses in earlier times, are going to the field this Spring with a 24-row planter that will cover a full 60 feet in one pass. The thousands of dollars spent on this mechanical marvel will cut in half the time needed to plant their acres. Or, looking at it another way, will eliminate the need for a second planter rig that would be required to do the same work under last year's setup.

As they hurried to harvest two-dollar-a-bushel corn last Fall they calculated the acres and yields needed to pay for such an expensive new machine. But with the faith so typical of most farmers they decided that things would get better, that prices wouldn't always be that low and that they would be ready to do the best job possible when the new crop year rolled around.

All Winter they worked, getting machinery in shape, shopping for supplies, making management decisions. All of their thinking has been geared to that magic day when it would at last be time to start tilling the soil again. Only this time they would do it even better with an efficient new machine that will allow them to plant thousands of acres of corn and soybeans in the few suitable days provided by Mother Nature.

As they toiled in the heated shop last February away from wind and biting cold, they knew the exhilaration of the challenge ahead. They knew it was them and their machines and their skills and their helpers against the world. They would have to be ready on that special day in Spring to pit their resources against nature, against the American economic system, against the Environmental Protection Agency, the Chicago Board of Trade, the European Common Market and the Russian minister of agriculture. It would be that small group of men and few big machines racing against everything that can go wrong between then and the time when the crop is marketed. It would be a race run so many times before – first with horses then with awkward tractors and now with the most sophisticated of machines. But the challenge has always been there and it's surely no easier now to earn a good living from the farm than it was 50 years ago.

So on into the day the two men worked as the sun made its arc and started to settle in the west. There was more to do before the monster would be complete and before they could get on to other preparations.

The thought must have crossed their minds from time to time – was this a good decision? Will farming be good enough in the years ahead to pay for such an expensive machine? Was the old way good enough? But then they remembered the horses and the two-row planters and the few acres they were able to farm in the early days. And they remembered the many other changes they've seen and been a part of. And they knew this change was necessary also. Perhaps not as significant as that first tractor or first combine, but no less a part of an attitude that has kept them on the forefront of American agricultural progress.

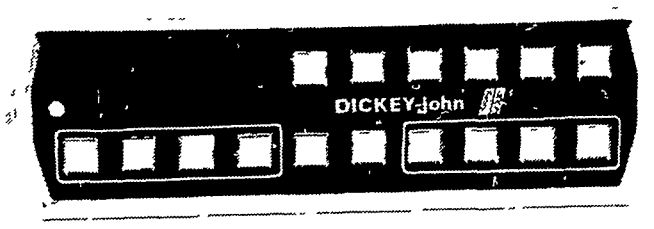
WHAT'S NEW



TRACTOR PERFORMANCE MONITOR

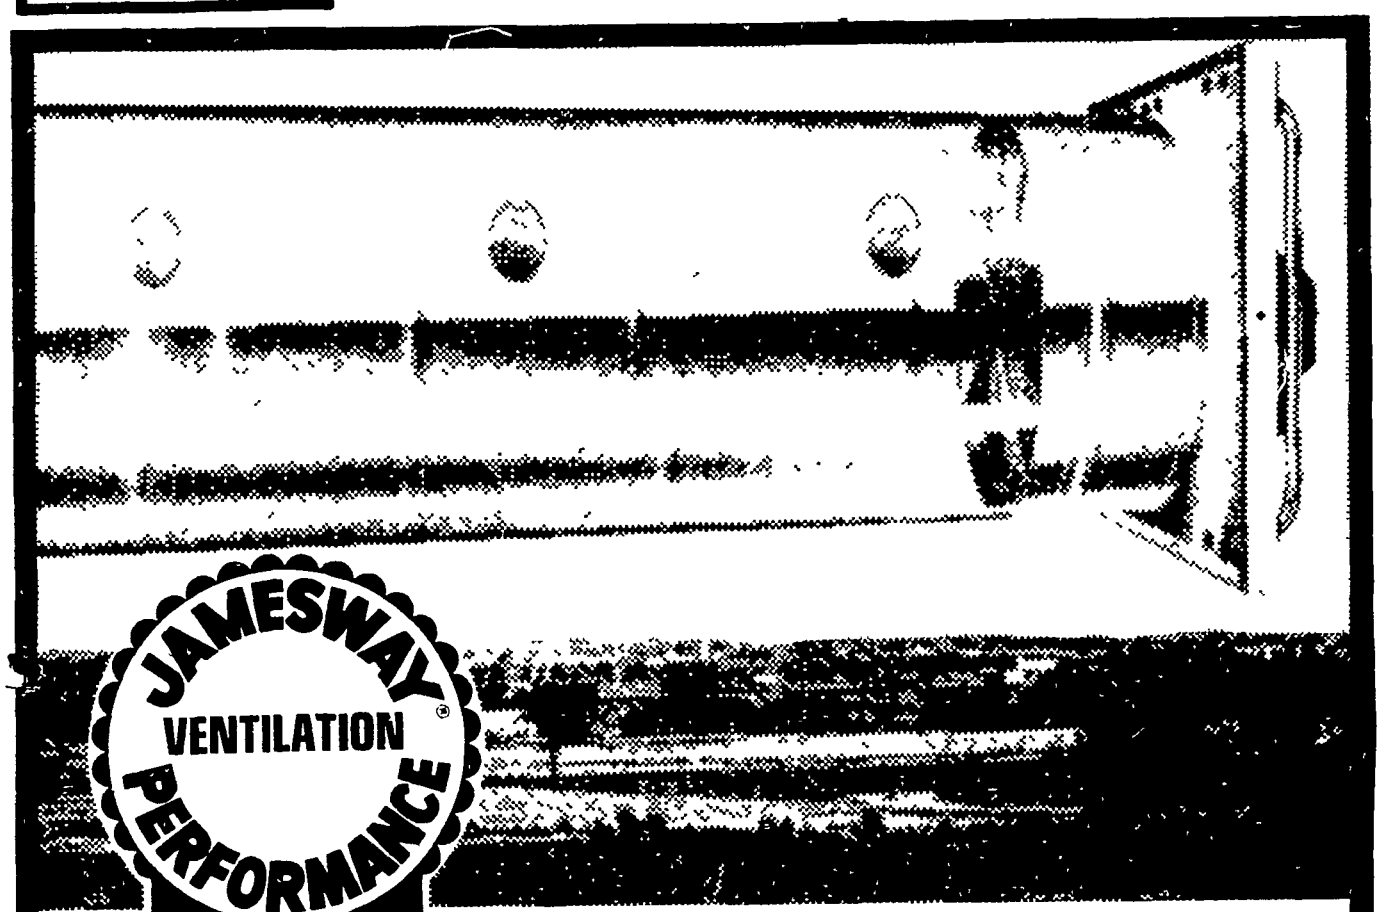
Dickey-john's new Tractor Performance Monitor is designed to help farmers operate his four-wheel-drive tractor more efficiently. The system gives him one-console monitoring of his tractor's vital functions.

The console of the Tractor Performance Monitor is a miniature computer that can store and analyze information. The console consists of a single digital readout and a series of selector buttons. At the touch of a button, the console delivers a direct digital readout of engine RPMs, PTO speed, battery voltage, true ground speed, acres worked, distance traveled, elapsed engine hours or percentage of wheel slip.

The console mounts in easy view on the tractor's hood or fender and the single display is bright and centrally located.

The Tractor Performance Monitor also has three programmable alarms. One to warn of excessive wheel slip. One to indicate excessive ground speed. And one to remind the farmer of elapsed engine hours when critical maintenance checks are due.

The Tractor Performance Monitor operates on the tractor's twelve volt battery, but it has its own automatically recharging power source that allows it to retain its memory when the tractor is shut down or when the battery is disconnected. The Tractor Performance Monitor is easily installed on most four-wheel-drive tractors.



KEEPS BARNS FRESH

You get the freshness of all outdoors all year 'round with a Jamesway All-Season ventilation system in your livestock building. Fresh air intake, foul air exhaust, and circulation are all automatic.

We also install silage distributing-unloading, feeding, and manure-handling systems.

Pa. State Jersey Convention held

CHAMBERSBURG -- Diane Moore, Volant, the daughter of Mr. and Mrs. Jesse Moore, was crowned the 1978 Pa. State Jersey Queen at the State Jersey Convention held recently at Chambersburg. The eighteen-year-old high school senior has two head of cattle herself and helps with the 125 head of Jersey cattle kept on her parents' farm.

Runnerup in the contest was Lisa Gsell, Chambersburg.

The calf sale was held as part of the activities of the convention. Top calf, selling for $550, was an August 77 Spring Run Q.S. Mandate daughter consigned by Robert and Helene Dreisbach, Hamburg. It was bought by Lida Gsell, for a 4-H project.

Second highest calf was also consigned by the Dreisbachs. This was a December 77 calf, sired by Willrich Mercury, and bought by John Kennedy, Coal Center. Average price of the eleven calves sold was $346.80.

Awards were presented at the organization's buffet luncheon.

The Distinguished Service Award was given to Dexter Putnam of Penn State. The H.C. Fetterolf Award for FFA production and achievement went to Calvin Watson. The youth received a check, a trophy for his school, and a trophy to keep.

Brunges production awards were given to Junior Jersey members. Included were: Carol Dreisbach, Cindy Waltemeyer, Lori Sollenberger, Denise McConoughey, Patty Dreisbach, Brian Watson, Calvin Watson, Darlene McConoughey, Kelly Robinson, and Ann Robinson.

Certificates of merit for high production were awarded to: Senior yearling: milk, James Byer; senior yearling, fat, Wallace Mellott; 2-yr.-old, milk and fat, Wallabe Farms; 3-yr.-old, milk and fat, William and Susan Dietrich; 4-yr.-old, milk and fat, Wallabe Farms; 5-yr.-old, and 6-to-7 yr.-old, milk and fat, Dick Moose; and 8-yr.-old, milk and fat, Bob Moose.

High ranking herds, each receiving a certificate for milk production were: 1 to 24 cows, Stephanie Locher; 25 to 49 cows, James Kelly; 50 to 99 cows, Robert Dreisbach; 100 or more cows, Elmview Jerseys.

Herds receiving awards for fat production included: 1 to 24 cows, Penn State,; 25 to 49 cows, James Kelly; 50 to 99 cows, Wallace Mellott; and 100 or more cows, Clyde and Robert Robison.

Receiving an award for highest classified herd was Mildred Seeds.

It was announced that the 1978 national meeting will be in New York, and next year's Pa. meeting will be held in District 1.

Wilderness Mandate Goldetta, the top-selling heifer at the 1978 Pa. Jersey Calf Sale, is seen with her new owner, Lisa A. Gsell, Chambersburg. Miss Gsell plans to use the heifer for a 4-H project.

WHAT'S NEW

BOTTOM DRAW STORAGE BIN

A new Bottom Draw Storage Bin which allows the purchase of economical bulk feed supplement for grinding and mixing of rations has been introduced by Ideal Livestock Equipment Co.

The new unit is available in two models – one with a hopper capacity of 159 bushels and another with a capacity of 179 bushels. The diameter of both is 66-inches. Fill height is 12-feet-six-inches for the 159 bushel unit and 13-feet-7-inches for the 179 bushel unit. A 31-inch center-fill opening facilitates bulk order or grinder-mixer filling.

The new unit offers a number of advantages, says the company. The bottom draw feature allows feed to flow easier with less bridging and prevents its collecting in the bottom. And because the auger is clamped on the outside, there's more storage space available inside, Ideal spokesmen explained.

Heavy galvanized steel, angle iron legs and a one-piece spun cover provide durability.

For more information, write: Ideal Livestock Equipment, P.O. Box 458, Jefferson, Iowa, U.S.A. 50129.

4-H teen leader retreat held

YORK – Fourteen York County 4-H'ers recently attended a regional 4-H teen leader retreat with seven neighboring counties at the Doubling Gap Center, Cumberland County. They were Cindy Dise, Glen Rock R3; Laruie Dobrosky, Glen Rock R2; Charla Janney, Brodbecks R1; Maria Leto, Dallastown R1; Ann Miller, Seven Valleys R1; Jonathan Miller, Seven Valleys R1; Jonathan Myers, Thomasville R1; Brooke Palmer, Shrewsbury; Tom Perry, York; Steve Trostle, Red Lion R2; Brian Utz, Hanover R2; Christy and Judy Waltersdorff, York; and Joey Welsh, East Berlin R1.

The theme for the retreat was "Close Encounters with Nature." These 4-H'ers attended workshops and events on backpacking, wood survival techniques, outdoor cooking, wildflowers orienteering, biking and leadership games. They developed leadership skills in these areas to be utilized in their local community or county clubs.

USDA hopes for more roadside markets

WASHINGTON, D.C. – Do you long for the good old days when you could travel out into the country and buy locally grown produce at a roadside stand – or do your own picking of tree-ripened fruit at a farmer's orchard?

Those days may be back if federal and state agricultural officials have anything to say about it.

The U.S. Department of Agriculture has been paying grants to states that devise innovative ways to encourage sales of agricultural products direct from farmers to consumers. Federal funds are granted under the Farmer-to-Consumer Direct Marketing Act of 1976, which runs through 1978.

By mid-April, USDA's Agricultural Marketing Service and Science and Education Administration will have paid out nearly $2 million under the Act in grants to 23 states and the Commonwealth of Puerto Rico. The grants will fund 22 projects.

Here's just a sampling of the projects underway:

Arizona is organizing producers to sell their farm products directly to consumer cooperatives. Small producers are being organized to sell through roadside markets, and consumer groups in Phoenix and Tucson are being organized to buy directly from producers.

Georgia and South Carolina have teamed up to establish farmers' markets in Savannah, Ga., and Charleston, S.C. The plan is designed to bring small farmers and low-income consumers together at inner-city markets.

Colorado is working to set up open-air markets.

New Jersey is encouraging pick-your-own farms, where city people can pick fresh produce and pay by the size of the container – maybe even picnic while they enjoy crisp country air.

Florida is looking into ways to develop a produce market on wheels to serve heavy-populated areas of the state, like Dade Country and Miami.

On April 11-13, officials from 23 states and USDA gathered in Kansas City to discuss progress in carrying out projects funded late last year and prospects for the projects funded this year.

Holding the lamb is Mrs. Kenneth Borry, portraying Noah and holding the dove of peace is the Rev. Frank Nickel, and supporting the calf is Larry Garber. All took part in the production "100 Per Cent Chance of Rain".

Noah's Arc filled with live farm animals

AGRISPON™

AGRISPON the farmer's proven way for more profit, nature's way. AGRISPON stimulates the nitrogen cycle which takes nitrogen from the air, converts it to a useable form and stores it in the soil until needed by the plants.
AGRISPON assists in the decomposing of all organic matter turning them into readily available plant nutrients. This process also generates organic acids which converts inorganic minerals into plant nutrients. Plants treated with AGRISPON grow as well as or better than those treated with chemical fertilizer
Can be used on all crops, pastures, fruits and berries, gardens and lawns

Inter-State requests milk price boost

HARRISBURG – Dr. Paul E. Hand, economist and assistant general manager for Inter-State Milk Producers' Cooperative, urged Class I prices be increased to $10.60 per hundredweight for dairymen in PMMB Area 6 at an April 18 hearing Inter-State requested before the Pennsylvania Milk Marketing Board.

PMMB Area 6 encompasses 17 counties in west central Pennsylvania which includes Inter-State members in Bedford, Blair, Cambria, Centre, Clearfield, Huntingdon, Mifflin and Somerset counties.

Dealers in Area 6 have been paying $10.20 for milk utilized as Class I during March through July and $10.60 for milk produced in August through February, for an average monthly price of $10.43. The Southampton, Pa. – based cooperative is requesting the price be increased to $10.60 for the entire year, an average increase of 17 cents per month for 100 pounds of milk. On a quart basis, this would equal increasing the price from 22.4 to 22.8 cents, less than one-half cent per quart.

Inter-State's request is based on increases in the cost of production and marketing conditions in the area. The nationally acclaimed dairy economist testified that a compilation of cost of production data for Area 6 indicates it costs $1.29 per hundredweight more to produce milk in December 1977 than it did in 1975. He noted the average increase in production cost has been about 4 per cent from 1976 and 1977, while the requested increase is only 1.63 per cent.

Dr. Hand also testified that unless Class I prices in the PMMB areas remain at competitive levels with surrounding Federal Order prices, the supply of milk for local dealers in these areas, "will be seriously threatened." He said producers would shift to supply the Federal Order markets.

Area 6 is bordered on the East by Federal Order 4 Milk Marketing Area, which similarly sets price levels for 14 southeastern Pennsylvania counties in addition to certain counties in Maryland, Delaware, New Jersey and Virginia. To the west of Area 6 is Federal Order 36, which includes much of eastern Ohio and western Pennsylvania.

Traditionally, Inter-State has taken the position that PMMB Class I prices set in areas under Federal Milk Marketing Orders should be established by the same method used to determine Class I prices for the Federal Orders. Although marketed under Federal Orders thus constituting a certain relevance, contended Dr. Hand.

Feryl J. Treichler, an Inter-State member from Kutztown, Pa., also testified at the hearing in behalf of the Pennsylvania Grange. He told board members that increases in his cost of production necessitates an increase in the price he receives for milk.

Inter-State annually markets about 1.9 billion pounds of milk from its 2,900 members who reside in Pennsylvania, Maryland, New Jersey, Delaware Virginia and West Virginia.

WHAT'S NEW

THREE MEDIUM-RANGE HARROWS WITH HEAVY-DUTY FEATURES

A new disk harrow series introduced by White Farm Equipment Company, Oak Brook, Illinois, features three units with big performance capabilities packed into a medium-range line of disks. White Farm Equipment Company is a subsidiary of White Motor Corporation.

White's new 254, 255, and 256 disk harrows offer hydraulic as well as manual folding wings. With the hydraulic option, the folding wings may be operated, safely and conveniently, right from the driver's seat, providing a real time savings when preparing the unit for transport, says White.

On the 255 and 256 models, the wings fold over center, providing a lower transport height. In that position, they also add more working weight to the unit, if desired. A hydraulic check valve positively locks the folding gangs during transport and when in the working position.

Heavier, stronger gang frames and triple-sealed relubeable bearings are other features of the new harrows, according to the manufacturer. A new gang angle frame design eliminates the need for pull-angle tie bars between the front and rear gangs. The semi-flexible frame design allows the individual gangs greater freedom to follow ground contours.

White's new 250 series harrows also can be leveled, front and back, quickly and easily. When a change in cutting angle or bite is desired, a convenient screw crank allows the operator to adjust gang angles from 14 to 20 degrees.

The new White 254, on a narrow frame, is available in 9 ft. 3 in. and 10 ft. 4 in. cutting widths for 28 to 32 blades on the basic gangs (7 ½-inch spacing).

White's 255, on a medium-width frame, is available in four widths from 10 ft. 4 in. to 16 ft. 4 in. and accomodates up to 36 blades on the basic gangs (7-½-inch spacing), plus 16 additional blades on extensions.

White's 256, on a wide frame, comes in seven widths to 21 feet with up to 48 blades on the basic gangs (7 ½-inch spacing), plus 16 or 24 additional blades on extension.

Disk blades of 20-in. diameter are available in three types – solid, cutaway, and cutaway front/solid rear.

Attachments include a folding blade furrow leveler, a disk furrow leveler, a disk furrow leveler scraper, and a center spring tooth shank. Dual wheels, gang extensions, and gang connector drive are available on the 255 and 256.

For more information, write White Farm Equipment Company, 2625 Butterfield Road, Oak Brook, Illinois 60521.

The family system can make it -- with work

By JOANNE SPAHR

LANCASTER -- "Families are here, and we can make it," says William Z. Yovanovich, supervisor of direct service for the crisis intervention component of the Dauphin County Mental Health and Mental Retardation unit. Yovanovich, who is also a minister and foster parent, was the featured speaker at the Lancaster County Farmers Association Ladies Day Out held at the Landis Valley Resort Inn, Wednesday.

Speaking on "split level American families", Yovanovich told the group of women that although there are more marriages today than there were in their parents' and grandparents' generations, there are also more divorces to accompany that escalated figure. He also noted that less communication is taking place, today, in families and that children don't give as much respect to their parents as they once did.

In explaining the many differences in families across the nation, Yovanovich outlined three basic situation types – the "super family", the "okay family," and the "dangerous family."

According to this minister/social worker, the "super family" has a parental situation in which both the father and mother share leadership and power between themselves. The father, also, gives two things – himself and time. Other attributes of this type of family situation include a high degree of closeness, open affection, and individual respect.

Yovanovich also noted that the most healthy family situation type allows its members to express their real feelings and doesn't require members to keep emotions bottled up. Individuals also share and solve problems as they arise, and not "when Dad comes in or home from work." They are warm and affectionate, and the key to their success is gentle authority with a lot of empathy as well as an ability to share humor.

The "okay family," a step below the "super family" also has shared authority, although the equal roles are not clearly defined. And, while the father contributes to the family, he does not give as much as the father in the "super family." His lack of contribution often leaves the mother frustrated and disappointed.

The whole family, in general, in this situation, shows little affection but they are polite to one another. This is especially true in the case of the parents.

Models at the fashion show for the Lancaster County Farmers Association Ladies Day Out were: (left to right) Linda Kreider, Evelyn Hess, Dot Neff, Lou Ann Brenneman, Esther Lefever, and Helen Wivell.

William Yovanovich

On the average this family type is less expressive, less open, less trusting, and tends to form coalitions between family members. And, while problems may arise, the members won't admit to them.

The "dangerous" family situation – the type that is liable to split – has one stable, domineering family head. The members avoid open conflict, but have subtle inner conflicts among themselves. On the whole, they mask their feelings well, although there is a lot of anger and depression midst the group.

Family system

(Continued from Page 109)

One step beyond the "dangerous situation" is the type of family where there is open warfare and a complete lack of empathy. This is the worst family atmosphere of all four types.

There are ways to save the basic structure to keep a base on which to build. First of all, says Yovanovich, families must acknowledge the power of the dynamics in God's laws. "The structure of the family is secured by God," he says, "It is clearly defined in the Bible."

Seven elements which also contribute to the healthy lifestyle and compatibility in family life were also outlined by Yovanovich.

Initially, each person must re-evaluate and recommit himself as an individual in learning to share power and in learning to be equal with each other – not domineering. Secondly, Yovanovich warned that families must stop living beyond their means and stop being obsessed with material objects.

We must also, he says, get back to the land.

"The land is your life," he declared, "if you sell it, you sell your soul."

A fourth directive Yovanovich gave to the group was to pass on less education and more wisdom. "Wisdom is the sister to love," he says.

Fifth, he advised the women to "take time to live. Take time to say to the ones around you, 'you are important, and I care about you.'"

Sixth, he charged the women to take their faith more seriously and to stand up and be counted as individuals with ideas of their own.

The four factors he attributes with the erosion of the family system are: 1. communications, especially TV; 2. school systems and the advent of secularism in school; 3. Bad court systems; and 4. the church, itself, when it identifies itself with power and wealth, leaving out the masses of poor.

In conclusion he stated, "The family has been around for a long time. We can adapt, we can be flexible, but in doing so, we must consistently, with each generation, reinterpret the basic elements and foundations upon which the family rests. If we forsake them, we shall most certainly perish."

Talent contest

Also involved in Wednesday's Spring frolic was a talent competition. Rose Leininger, the daughter of Mr. and Mrs. Vernon Leininger, Denver R2, took first place with her dramatization of a farm wife's day. In second place were Don and Doris Neff, Ronks R2, with a duet; and third, Becky Wivell, Columbia R1, for a floor exercise routine.

Gloria Longenecker, former Miss Lancaster County, gave a musical presentation, and Dee E Gee Shop, Strasburg, staged a fashion show. Models for the show were LCFA members Lou Ann Brenneman, Marietta R1; Esther Lefever, Snapperdam Road, Lancaster; Evelyn Hess, 817 Waterfront Drive, Lancaster; Dot Neff, Ronks R2; Linda Kreider, Quarryville R2; and Helen Wivell, Columbia R1. Hairstyles were by Aaron's Studio of Hair Design, James St., Lancaster.

Order 4 base milk $10.71

ALEXANDRIA, Va. – Market Administrator Joseph D. Shine this week announced a March 1978 base milk price of $10.71 per hundredweight for the Middle Atlantic Marketing Order and an excess milk price of $8.99. The weighted average March price is $10.56 and the butterfat differential for the month is 11.6 cents. The March base milk price is down four cents from February but is 69 cents above the March 1977 base price. Order No. 4 prices are announced for 3.5 per cent milk f.o.b. plant location within 55 miles of Philadelphia, Pa. and also within 75 miles from the nearer of Washington, D.C. or Baltimore, Md. There is a six-cent direct-delivery differntial applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine reported that March producer milk receipts totaled 484.4 million pounds, an increase of 1.5 per cent from February, on a daily basis, but down 0.4 per cent from a year ago, the first time since April 1974 that pooled producer milk receipts have been below the previous year. Class I producer milk accounted for 59.24 per cent of total March producer deliveries, compared to 59.51 per cent in February and 60.08 per cent last year. Base milk represented 91.43 per cent of total March production. A total of 7851 dairymen supplied Middle Atlantic Order handlers during the month and the average daily delivery per producer was 1990 pounds, an increase of 2.4 per cent from last March.

Middle Atlantic Order pool handlers reported Class I in-area milk disposition of 7.73 million pounds per day during March. When adjustment for variation in calendar composition is made, March fluid milk sales were down 2.1 per cent from February and were 3.1 per cent below last March.

Farm drainage course set

UNIVERSITY PARK – If excess water is a problem during Spring thaws, Penn State's correspondence course on farm drainage, gives several methods to use to remove excess water, along with tillage practices which affect the surface drainage of soils

This eight-lesson course also gives directions on how to locate drains and select tile, construction information, and cost estimation of drainage options, tile installation, and terracing

To order a copy of this course, write "Drainage," Box 5000, University Park, Pa 16802 Make your check for $4 50 payable to Penn State By ordering this course, you automatically enroll in Penn State's College of Agriculture's correspondence course program You then have the option of completing question papers and working toward a Certificate of Accomplishment or using the course as valuable reference material

Farm Drainage Pays High Returns

Investment	Typical Annual Return
Land Drainage	21-46%
Farm Buildings	3-23%
Farm Land	11%
Stocks	7.4%
Bonds	6.1%

Even with the conservative figures shown above, it's obvious that land drainage should top farmer's lists of investment priorities.

✓-CHECK THESE BENEFITS ...

- Better soil aeration
- Better soil moisture conditions
- Longer growing seasons
- An increased supply of nitrogen to the plant
- Soils warm up more quickly
- Certain toxic substances and disease organisms are removed.
- Soil erosion can be reduced
- Deeper root development enables plants to better withstand summer droughts
- Valuable livestock water supplies are obtained.
- Increased crop yields and improved crop quality

Specter outlines ideas on agricultural issues

HARRISBURG – What's a Philadelphia lawyer doing out in the farmlands of Pennsylvania these days?

Arlen Specter is eyeing the state's gubernatorial spot. He traveled in the area last week, meeting with state farm organization leaders and addressing a fund-raising event at Hershey.

Specter was born in Kansas and worked on a farm there as a teenager. After marrying a Philadelphia girl, he sent up a law practice in that city. A growing interest in public service led him into the job of district attorney, the "first Republican to get elected in the city of Philadelphia in 25 years," he recalled. While holding the top legal office in the state's largest city, Specter administrated a five million dollar budget and ran an office of 160 assisting district attorneys.

During a meeting with key administrative people of the Pennsylvania Farmers' Association, Specter spoke to several issues of interest to the agricultural industry, second only to steel in economic importance to the state

One overriding issue in Specter's opinion is land preservation. He sees a need to keep the agricultural community intact, not only for the material value of insured food production but also because of the moral values basically inherent to the farming population.

A solution for vanishing farmland, says Specter's "A Platform For Pennsylvania" is the same as a solution to the problem confronting our cities: balanced growth.

He advocated expanding business and housing in the cities, where public services already exist, and would coordinate state agencies already in existence to use identical multi-county districts in long-range planning. The freedom for some necessary rural expansion would come through a system of development points.

When questioned on his possible choice for a secretary of agriculture for the Commonwealth, Specter replied that it was much too soon to begin making such decisions. However, he indicated that the office should definitely be filled by someone currently in the farming business. Assuring farm organization leaders that he would consult with them on a selection, Specter added that the present Secretary is well liked, "a rarity in the Shapp administration, where most are happy if they just haven't been indicted."

A tremendous overlap of regulatory measures is what Specter sees as the biggest headache in current migratory labor programs. His recommendations would include keeping the state out of the problem, except where absolutely necessary, and to demand high caliber people to carry out any programs kept intact.

"I hear tremendous complaints about inspectors coming into migratory situations," Specter told the farm group administrators.

Sunset legislation was termed by the gubernatorial hopeful as "an excellent idea." He believes that there are too many laws that stay on the books forever. Instead, legislation should be periodically reviewed and automatically ended, unless found necessary after careful examination

Restructuring of inheritance tax laws was another agriculture goal that Specter supports. To a marketing-bargaining query, Specter replied that he felt he did not have enough background on that subject to give a knowledgeable answer.

"We need some sensible standards for determining when someone is hurt," was his prompt reply to questioning about workmen's compensation insurance rates. Specter feels that the program has been abused to the point where even labor leaders are recognizing the need for overhaul. The Governor plays an important role in determining how insurance cases on medical injury may be handled, he says, because the judges making the legal decisions are often political appointees.

"Our economy has gotten out of whack, and the farther we stray from the free enterprise system, the more trouble we get in," admonished Specter as he detailed some suggestions toward solving the state's budget headaches.

One step he would suggest for cutting the eight billion dollar spending would be contracting out to private firms much of the work of the Pennsylvania Department of Transportation (PennDot). Private companies, he insists, would just do a much better job of the maintenance and building work.

Claiming that "welfare is eating us up," Specter indicated that there is much fraud in the present system, some of which he has helped to expose as Philadelphia's district attorney. An enforced system of identification would help cut down on some of that problem, he believes.

Arlen Specter considers farmland preservation to be among the most important issues facing Pennsylvania agriculture.

Administrative controls over the bureaucracy is another step that Specter would recommend for state government. If elected, he would like to take one hundred people immediately out into state run offices to investigate ways of cutting back spending.

It bothers him that civil service and unionized employees can't be fired. Given the choice of either knuckling to work or leaving, he believes some of the problem workers might depart.

"It's a gigantic task," he admitted, "but possible."

Much money must be spent in Pennsylvania to get the state's economy rolling again and Specter wants to see that investment in the form of private capitol, not public funds. Through the Pennsylvania Industrial Development Authority, he sees the government involved in business expansion only to the point of making available low-rate loan money.

Capital stock laws, he says, must also be made more fair. Today, incorporated farms pay an annual levy on their assets, while manufacturers are not required to do so.

In answer to a final question, Specter insisted that, if elected, he would do his utmost to get the death penalty reinstated in Pennsylvania as a deterrent to crimes of violence.

Adams County Extension executive committee members and their legislators met recently as part of Pennsylvania Extension Capital Days. Left to right, the individuals are: Assemblyman Kenneth Cole; Daniel Winters, president of the Adams County Extension Association; William B. Wilson and Arthur Mussleman, members of the Extension Executive Committee; and Senator William Moore.

Extension exec. comm., politicians meet

HARRISBURG – Members of the Adams County Cooperative Extension Service executive committee met with area legislators at a special breakfast recently in Harrisburg as part of the first State Extension Capital Days.

According to Thomas E. Piper, County Extension director, the legislative breakfast provided committee members and lawmakers an opportunity to discuss Extension programming and the functions of the Extension Service in serving al residents of the county.

Adams County delegates who took part in the activity were: Daniel Winters, pres., Extension Executive, committee; Arthur Musselman and William B. Wilson, members.

State Extension Capital Days was sponsored by the Pennsylvania Council of Cooperative Extension Associations (PCCEA) of which Harrison G. Fair, R1, York Springs is president. The organization is comprised of representatives of county Extension executive committees from 65 member counties. Executive committees serve in an advisory capacity to local Extension programs.

Flory advances

Bernard C. Flory

SOUDERTON – Bernard C. Flory has been appointed operations manager of the Montgomery Bucks Farm Bureau, Souderton. He will be responsible for retail operations, personnel, and operational budgeting.

Flory joined Farm Bureau in 1974 as credit manager.

Montgomery Bucks Farm Bureau is a $13 3 million retail farm cooperative supplying Bucks, Montgomery, Lehigh, and Berks County with feed, fertilizer, seeds, and home and garden supplies.

Plant dormant roses now

UNIVERSITY PARK – Dormant roses are available now in a good choice of varieties. Plant them within the next few weeks before buds start to grow. Plant your roses in a sunny location and where water will not stand after a heavy rain, suggests James J. McKeehen, Delaware County Extension agricultural agent. The rose garden should receive at least a half-day of sun for best results. Dig generous-size holes for roses, so the roots can fan out normally without bending or curling. A good soil mixture for roses consists of one bushel of peat moss to four bushels of soil.

One bushel of rotted manure may be mixed with six bushels of soil, and one-half pound of super-phosphate added to each seven bushel mixture. The bud union, or swollen "knuckle", where the desired variety has been budded onto a vigorous understock, should be planted about one inch below the soil surface. This protects the bud union from the Summer drought and Winter freezing. If you want to plant container-grown roses you can wait until May, since these are kept in a protected place by nurserymen until warmer weather is here.

WHAT'S NEW

GESTATION STALL FOR HOGS

Hawkeye Steel Products, Inc of Waterloo, Iowa announces the addition of the new Model GP500 gestation stall to the Pride of the Farm line of hog equipment. The GP500 offers pork producers the opportunity to provide the special care that gestating sows and gilts require, according to Pride of the Farm.

Sows and gilts are easier to manage in stalls. Heat detection is easier. Stalls keep sows from fighting and injuring each other, yet have enough room for comfortable movement. With gestation stalls, manure is easier to manage with stalls over slotted floors or a flush gutter system.

The new Pride of the Farm Model GP500 gestation stall features rugged legs that consist of a tube welded within a double strength tube. Heavy duty feed spout built to take abuse from hungry sows is available at extra cost. Side rails are constructed of rugged square tubular steel, designed for extra strength. Galvanized steel adjustable stringers feature unique locating clamps. The Pride of the Farm Model WN-1 nipple waterer may be attached to the front of the stall at the desired height. The Model WN-1 features a corrosion resistant stainless steel body with build in nipple guard.

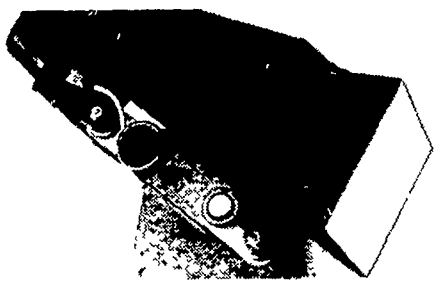
WHAT'S NEW



GROUND SPEED SENSOR

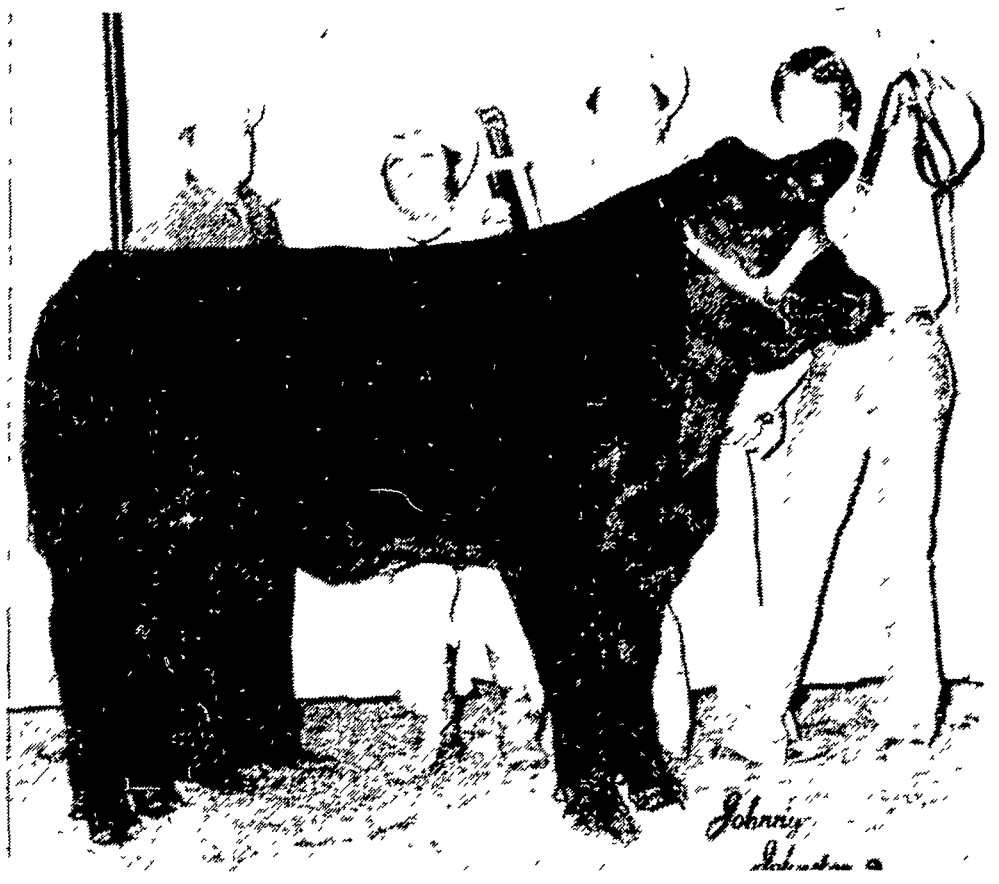
Dickey-john has developed a new ground speed sensor, The Radar Velocity Sensor, that can be used on virtually any tractor or implement.

The Radar Velocity Sensor is a microwave sending and receiving unit - similar to a police radar gun - that accurately measures ground speed under actual field conditions.

Unlike other types of ground speed sensors, the Radar Velocity Sensor is not affected by external conditions or by machinery performance. The Sensor sends, receives, and processes its own signal, through broken and muddy fields, or through waving grasses and plants, even if the tractor or implement's wheels are slipping badly.

The unit is designed to function with any Dickey-john system that requires a ground speed or distance input. It is an ideal sensor for the Dickey-john Area Monitor, Grain Loss Monitor, and Controlled Spraying Systems, as well as for the new Scanamatic R Planter Monitor and Tractor Performance Monitor, says the manufacturer.

Chianina steer sets record price



The highest price ever paid for an individual steer went to 18-year old Chianina owner Paul Ray of Big Spring, Tex., when the young man brought the 1189-pound animal to the 1978 Houston Livestock Show earlier this year. The record priced steer, known as "Blackness," was bred by Kraig Schilder of Malcolm, Iowa. Paul Ray, a 4-H'er, is at the halter of the prize-winning steer.

PSU sets dairy exposition

UNIVERSITY PARK – The Dairy Science Club of The Pennsylvania State University will sponsor its 53rd Annual Dairy Exposition soon. The event is dedicated this year to Harry Roth of Atlantic Breeders Cooperative, Lancaster. Roth is operations director for Atlantic, a Penn State graduate in dairy science and a member of Delta Theta Sigma, agricultural fraternity.

Harry Roth

He has aided the youth of the industry through his work as chairman of the Pennsylvania All-American Invitational Youth Dairy Cattle Judging Contest, and as an official at the 4-H National Dairy Cattle Judging Contest. Roth is currently a director of the National Association of Animal Breeders and is a member of the organization's research committee. He is also a member of the Dairy Shrine Club and is state and nationally approved as a dairy cattle judge.

Awards for the judging contest, and for fitting and showing, will be presented at the annual banquet in the Hetzel Union Building on May 6, starting at 6:30 p.m.

The main event of the 53rd Annual Dairy Exposition is Show Day, May 6, which will consist of dairy cattle fitting and showing contests, starting at 8 a.m. at the dairy barns. Students draw cows by lot from about 150 available and have six weeks to prepare them for the show. The students will be judged on their ability to fit and show the animal rather than on the animal itself

Other highlights of Show Day will include a celebrity and sorority milking contest, a milk chugging contest, and a calf dressing contest. Participants come from fraternities, sororities, and independent student groups.

The exposition general chairman this year is Terry E. Snoddy of Allenwood, senior in agricultural engineering. Show manager is Christine A. Kyper of Huntingdon, junior in dairy production Assistant show manager is W. Doug Seipt of Easton, junior in dairy production Chairman of special events is Brian P Derby of Penndell, senior in animal industry

York Co. 4-H'ers participate in State Capital Days

Sharing ideas on local government issues during a special legislative breakfast at State 4-H Capital Days in Harrisburg, from left: Tom Perry, Leaders Heights; Senator Hopper; Rep. Geesey; Brooke Palmer, Shrewbury; Rep. Foster; Rep. Anderson; and Rep. Lehr. The two-day event was designed to give 4-H members a working knowledge of the functions of state government.

HARRISBURG – County 4-H members, who soon will have a voice in Pennsylvania's legislative process, met with area legislators and other government officials during State 4-H Capital Days activities in Harrisburg, this month.

Those taking part from York County were Tom Perry, York; Brooke Palmer, Shrewsbury; Kay Swartz, Hanover; and Tommy Welsh, East Berlin.

They joined with 4-H members from all Pennsylvania counties to learn more about the operations of state government and to discuss citizenship projects that will help strengthen local 4-H programming.

While in Harrisburg, they received a guided tour of the State Capital building, visited their local legislators in their offices, and participated in educational workshops geared to increase their understanding of the legislative process.

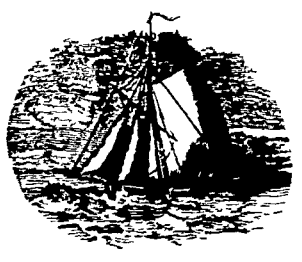
During the afternoon of April 3, 4-H members visited one of the following departments or agencies: game commission, community affairs, Environmental Resources, Agriculture, Education, PennDot, Commerce, Justice, Public Utilities Commission, Health, and Labor and Industry.

Senators and representatives were guests of the county delegation at a legislative breakfast on April 4. At this event, 4-H members and lawmakers discussed local issues and defined the purposes of the educational youth program.

Speaker at the legislative breakfast was Carol Zepp, 4-H member from Adams County, who presented the topic, "What 4-H Means to Me."

County delegates serving as chairpersons at the various luncheons and activities were Robin Morgan, of Washington County; Nina Hardwerk, of Lehigh County; and Thomas Perry, of Monroe County.

Frank Bortz, 4-H specialist at Penn State University and coordinator of the event, points out that State 4-H Capital Days is one of the highlights of the 4-H citizenship program.



CONSIDER INCOME AVERAGING

If you sold a house or other property for a substantial profit in 1977, or for any other reason made considerably more money last year than in previous years, "income averaging" may save you money on your federal tax return. Obtain a copy of Schedule G from the IRS and follow the steps to see if you qualify.

DON'T PAY TAX ON LOST INTEREST

If you had bank interest forfeited in 1977 as a penalty for premature withdraw of funds from a time deposit, make sure you don't inadvertently pay tax on the forfeted amount List the forfeiture on Form 1040, line 26, so that it can be deducted as an "adjustment" to income

A new way to help nitrogen help wheat . . .

N-SERVE nitrogen stabilizers.

Now, there's a way to reduce nitrogen loss on fall- or spring-applied nitrogen fertilizer. With N-SERVE* nitrogen stabilizers. N-SERVE cuts loss by slowing the nitrification of the nitrogen you apply So your N is available to your wheat when it needs it That means more efficient and effective use of your nitrogen fertilizer. And that could mean higher yields Come see us for more information on N-SERVE nitrogen stabilizers. Just look for the sign with the N-SERVE policeman

Ephrata's FFA officers ranked first again

BROWNSTOWN -- Ephrata's FFA officers were promoted to best in the area on Wednesday afternoon when a panel of three judges "saluted" them with a nod of approval. The occasion was the Area FFA Parliamentary Procedures Contest, held here at the Brownstown Vo-Tech School. FFA chapters from Lancaster, Chester, and Delaware Counties participated. The first two teams, Ephrata and Solanco, will now move on to regional competition, to be held on May 2.

Ranked as the best FFA officers in the area, Ephrata's parliamentary procedure team is all smiles about their most recent victory. From left to right, they are: Donald Good, Larry Burkholder Troy Gass. Tony Eberly, Sheryl Bollinger, Judy Zimmerman, Allen Ackley, and Kevin Smoker.

The contest on Wednesday was what might be considered a re-match of the Lancaster County Contest, which was held a week earlier at the Willow Street Vo-Tech School. In that event, Ephrata edged Solanco also.

Coached by Ernest Orr, the Ephrata team consists of Donald Good, sentinel; Larry Burkholder, reporter; Troy Gass, treasurer; Tony Eberly, vice president; Sheryl Bollinger, president; Judy Zimmerman, secretary; Allen Ackley, chaplain; and Kevin Smoker, student advisor.

Solanco's team consists of Sam Long, president; Tom Kirk, vice president; Tim Hanks, secretary; Jeff DeLong, reporter; Brent Hess, treasurer; Les Hershey, sentinel; Scott Frantz, chaplain, and Ron Clark, student advisor.

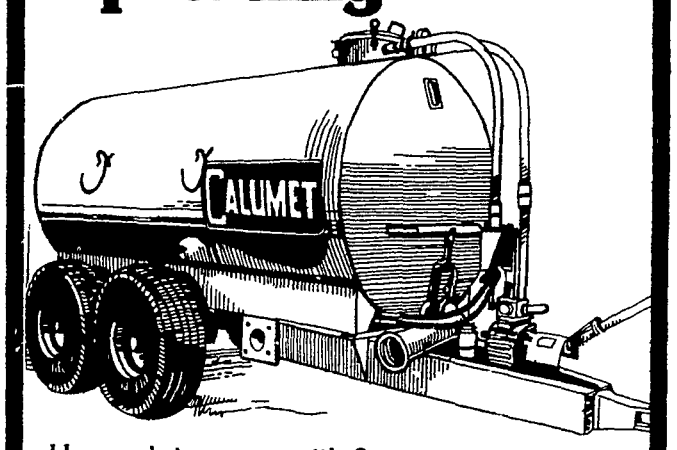
Placing behind Ephrata and Solanco were teams from Oxford and Owen J. Roberts FFA chapters. Judges were Darvin Boyd, Agricultural Financing Department, National Central Bank; Jay Bomgardner, Eastern Regional vice president for the Pennsylvania FFA; and Harvey Smith, vocational consultant of the Pennsylvania Department of Education.

Control clover mites with diazinon

UNIVERSITY PARK – During warm, sunny, Spring days, many homes are invaded by clover mites. Clover mites are smaller than the head of an ordinary straight pin and deposit a reddish stain when crushed. They are not harmful to human beings, pets, stored feed products or household furnishing. However, the reddish stains they deposit when crushed are difficult to remove and frequently clover mites will enter homes in large numbers, thereby causing some concern among housewives. The humidity in homes is usually too low for clover mites to survive for more than a day or two indoors.

To prevent clover mites from entering your home, apply an insecticide named diazinon to the base of the outside foundation and outwards for a distance of five feet and up the side of the house next to the foundation a distance of two to three feet.

Fast fill trip saver for liquid manure spreading



Heavy duty pump with 3-vane rotor handles all types of liquid manure. Rugged construction—full length support skids. Epoxy coated interior and exterior. 1180, 1500, 2250 and 3250 gallon sizes. Twelve month warranty.

It's Time To Think Haylage Treatment

Ensil-ate™

Developed by

MASTER MIX RESEARCH

The Silage Preservative With A Real Difference

WHAT IS IT?

ENSIL-ATE is a silage additive designed to

- Reduce Rancidity
- Prevent Oxidation and Over-Heating
- Inhibit Mold Growth
- Increase Palatability of any Ensilage

$1 invested for ENSIL-ATE per ton can return $3 per ton in added feeding value

ENSIL-ATE has its own feed value!

- Protein 11 percent - Fat 2 percent - Fiber 35 percent

ENSIL-ATE Adds Highly Digestible Protein and Fiber in the form of ground soybran flakes.
ENSIL-ATE prevents initial run off
10 lbs. of Ensil-Ate will absorb 40 lbs. water.
ENSIL-ATE is perfectly safe to use and contains only all-natural proteins.
ENSIL-ATE is backed by leading experimental stations as well as Master Mix Research.

HOW IS IT USED?

ENSIL-ATE requires no additional equipment.

It should be added to your silage at the rate of 10 lbs. per ton. Packaged in 50 lb. paper sacks, each bag will effectively treat 5 tons of silage. Simply spread the bag on the silage wagon before or during filling.

REMEMBER -

You can mix 10 lbs./ton easier and more thoroughly than 1 lb./ton of silage that most additives require.
ENSIL-ATE can also be added as the silo is being filled.

FOR MORE DETAILS ON HOW YOU CAN GET AN AVERAGE ADDED RETURN OF $3 FOR EVERY TON OF HAYLAGE YOU PUT UP THIS SPRING, CALL OR VISIT YOUR

MASTER MIX DEALER TODAY!

YOU'LL BE GLAD YOU DID!

Lebanon County DHIA Monthly Report

MARCH 1978

Willow Maple Farm, Dale Hostetter and sons, and Vincent Wagner, all Lebanon County Holstein breeders, shared top honors last month in the DHIA summary. Willow Maple Farm turned in the high individual lactation for milk production; the Hostetters had the high record for butterfat, and Wagner's 38 cows checked in with the highest butterfat average per day. Details follow:

The Lebanon County Dairy Herd Improvement Association records of tests on county cows with over 600 pounds of fat in March are as follows:

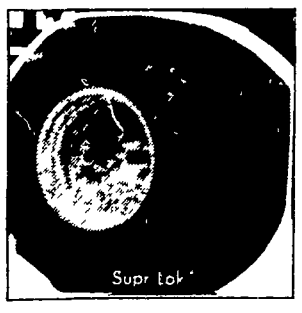
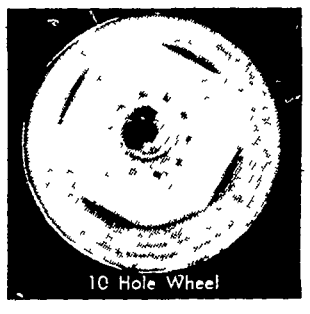
DMI SUPR-LOK® and AXLE MOUNT DUALS

QUALITY IS FIRST





- Equal or superior to OEM duals
- Rims shot blasted and protected with primer and enamel top coat
- Hooks are guaranteed for 20 years
- Full one year warranty on duals

The DMI Supr-Lok® dual is unique among other band type duals. The new triangular bracing system makes hook-up easy and exceptionally strong. A formed 7/16" steel lug is welded to the rim. Its face is concave to accommodate a special bushing which makes angling right or left possible. No alignment to the tractor wheel is necessary. Just hook to the nearest lug on the dual rim. DMI Supr-Lok® duals ask us to show you how they work.

DMI 10 bolt "B" series axle mount duals are the heaviest in the industry. Wedges are eliminated by using two huge U bolts positioned at the points where the most stress occurs. The combination of the heavy-duty U-bolts and the massive malleable iron hub with its "pressed fit" makes the DMI axle mount dual the strongest made. DMI 10 bolt hubs and wheels are used as duals, triples, or even as primary tractor pull wheels and they're backed by a full year warranty!

Stop in now and see us. We'll show you how DMI duals put tractor power to the ground!
DMI . . . Quality Is First!

If you want to save money on *new and used* wheel sets, deal with Factory Direct Dist. Also we have many large tires at low prices.

For the 2-year-olds, who are a little young to understand sheep shearing, Jugan personally takes a lamb to their classroom for them to pet.

Farmer teaches sheep trade and auctioneering to students

By JOANNE SPAHR

KIMBERTON -- The crowd of three, four, and five years old rustles, squirms, and talks as Michael Jugan stands before them shearing a sheep. All of a sudden one of the little fellows in the front row spies a lamb wandering over to its mother and tackles it, yelling with excitement, "I got it. I got the lamb!"

As he does so, the other children in the front row are drawn to the scene, and before long the bleating baby is besieged with hands eager to pet its wooly fleece.

Jugan, spying the commotion, stops what he's doing and patiently rescues the little animal then goes back to his demonstration.

"Now, see all this wool," he says, pointing to the large eight pound bundle he just collected from the black-faced Suffolk, "This is all from just one year's growth." The children "o-o-o-o" and "ah-ah-ah" their recognition

Michael Jugan, Jr., Kimberton, is a sheep farmer. He's also an auctioneer, and he's in the real estate business. As if that's not enough, he is an educator, as well, in his spare time. He's not a teacher, however Instead, he is a demonstrator - a man who takes his free time and goes around to schools teaching children from preschool to junior high age all about his business

"I started out 10 years ago with the Lion's Club," Jugan relates "My wife is a teacher, and I feel students need to have a farm program in their schools "

In his sheep shearing and auctioneering demonstrations, Jugan tries to show his audiences how wool is marketed from the beginning to the end He also includes a segment on auctioneering a lamb at market

To begin his presentation, Jugan shows the students samples of wool products such as a coat or vest Then, after he feels that they understand the products come from wool, he begins shearing a sheep. As he works, he constantly talks to the children telling them about the medicine and lanolin in the fleece.

When he has finished the shearing, he shows how the bundles are wrapped up for market, with the dirty wool tucked underneath the bundle.

"Did you ever hear the expression, 'pulling the wool over somebody's eyes'?" he askes. "Well, that's where this expression comes from," he clarifies.

At each statement the children titter their consent.

After he wraps up the wool, he than tells the children that the bundle is tied with paper string so that when it is soaked in water, the paper will dissolve and only pure wool remain.

As a token for the day, Jugan sees to it that each child receives a hunk of fleece to take home.

Following the shearing demonstration, Jugan and the students play a game together. That game is called auctioneering. To show them how it's done, Jugan sells the sheep he brings, and the students take part.

"Who'll give me a dollar for this little lamb?" the auctioneer begins.

Not unlike a regular sale, the bidders become extremely involved in what they're doing. At the Charlestown Playhouse near Phoenixville, where **Lancaster Farming** caught up with Jugan, the preschoolers

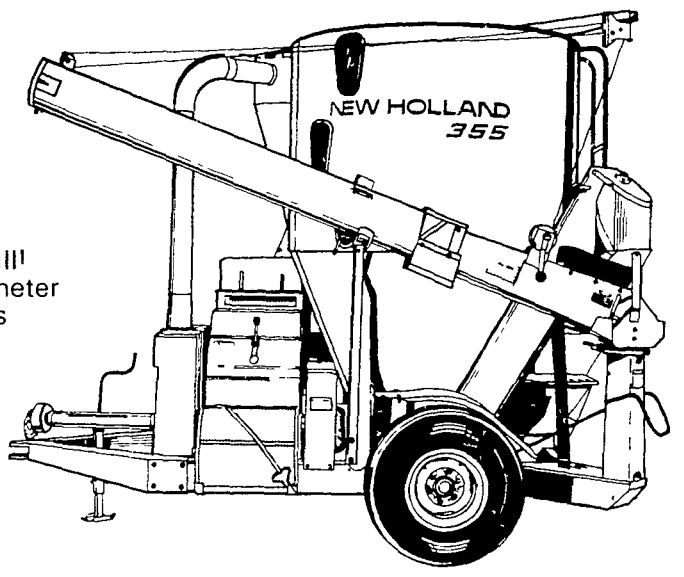
Get a great deal on Sperry New Holland Grinder-Mixers and Spreaders

Sperry New Holland grinder-mixers have it all: Quality, capacity and selection.



- Three models to choose from!
- 80-bushel model features a 16-inch mill!
- 100- and 120- bushel models feature a 21-inch mill!
- Unloading system features high-speed, 8-inch diameter fold-back augers in 10-, 13-, 17- or 20-foot lengths to give you that long reach!
- Augers swing back to a neat 10 feet for transport!

Sperry New Holland grinder-mixers offer fast unloading . . long reach! See them today

Now you can spread wet or dry.

- Hydraulic endgate (on four largest models) works with upper beater installed
- Worm gear drive is standard on four largest models Practically eliminates need for adjustments
- BONDED PROTECTION! You get new sides free if they ever rust through while the rest of the spreader is still operational
- Beefed up frame and side joints take pressure of peak loads, rutted fields
- The country's No 1 spreader line 6 box-types and 5 tank-types

Come in today and see why they're called "The Strong-Boxes"

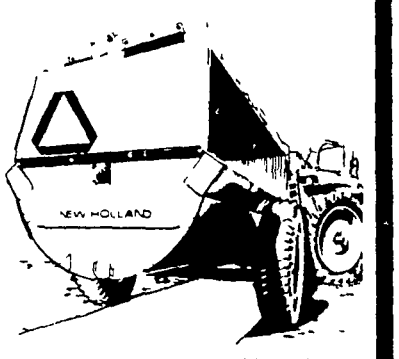
Sperry New Holland
STRONG-BOXES
The Name Says It All

And remember, they're backed by the SPERRY NEW HOLLAND parts system.

Sperry New Holland tank spreaders

keep your barn area tidy, the roadway clean and your neighbors happy!

Here's the spreader we ll stand behind! No drip! No trail!

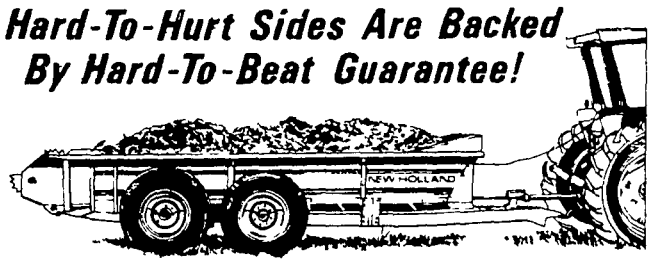


Plus, Sperry New Holland spreaders have a solid warranty

- Liquid-tight steel tank!
- All-weather operation!
- 145- to 350-bu size!

Sperry New Holland STRONG-BOXES

Hard-To-Hurt Sides Are Backed By Hard-To-Beat Guarantee!



Bonded Protection by Sperry New Holland gives you new sides free if they ever rust through while the rest of the spreader is still operational Applies to any owner, not just the original buyer Capacities from 108 to 358 bushels

Call your Sperry New Holland Dealer listed on the facing page for a demonstration on your farm!

Mg 14

IT HAS BEEN ESTABLISHED THAT THERE ARE PERIODS IN WHICH AN ANIMAL'S REQUIREMENTS FOR MAGNESIUM MAY BE INCREASED BRIEFLY, THEY ARE

1) ADVANCED PREGNANCY – The intake must supply Magnesium for two animals
2) EARLY LACTATION – During this period a 2-day flow of milk will remove all of the Magnesium in the blood
3) HIGH NITROGEN LEVELS IN FORAGES AND HAY – This is caused by heavy nitrogen fertilization and is believed to be more pronounced where there is an imbalance in the phosphorus and calcium content of the plant

TO AID THE FEEDER IN COMBATTING THIS CONDITION OF MINERAL IMBALANCES, SEA BOARD OFFERS IT'S Mg14

Mg14 is a supplemented mineral feed containing 14% MAGNESIUM and all other major and minor mineral elements, salt and vitamins to efficiently balance the nutrition cattle obtain from the pasture It is recommended that Mg14 be made available in free choice feeders prior to the outbreak of the problem

If however, the problem has developed and acute cases of MAGNESIUM DEFICIENCY are noted it is recommended that 200 lbs of Mg14 be mixed with 1800 lbs of ground feed and fed at the rate of 5 lbs per animal for two to three weeks

For more information concerning this valuable Mineral Supplement and for all your Mineral and Ingredient needs, CONTACT YOUR LOCAL FEED DEALER

FUEL OIL HEAT

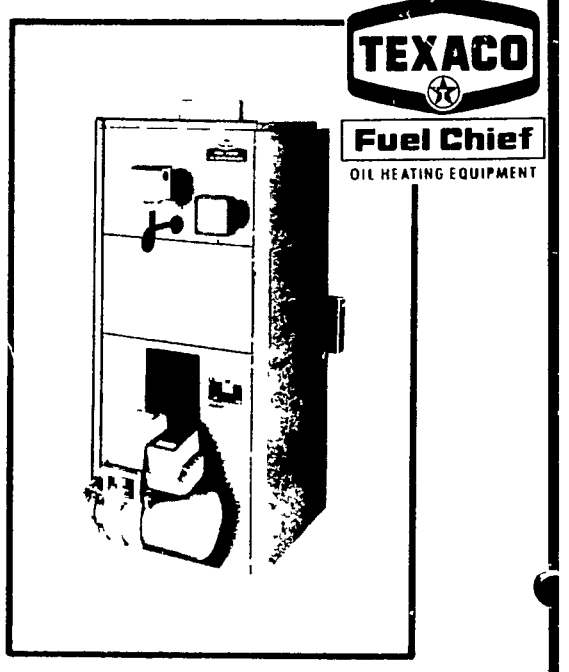
The modern design of the "FC-13" Series Texaco Fuel Chief Wet Base Boiler-Burner Unit features waterbacked heat-transfer surfaces on all sides and bottom to provide maximum heat absorption for greater fuel savings. Integrally cast fins staggered to increase the travel of hot gases in flue passages — prevent loss of otherwise wasted heat. Installation time is reduced to a minimum.

The entire unit is only 20" wide Exterior is finished in attractive baked-on, decorator-approved colors. Features the dependable, economical Texaco Model TFR Fuel Chief High Speed Flame Retention Oil Burner with non-adjustable stainless steel firing head.

The "FC-13" Series Texaco Fuel Chief Wet Base Boiler-Burner Unit has been manufactured to furnish home-heating at its most comfortable-best!

FEATURES WHICH ASSURE RELIABILITY AND ECONOMY

- **FLUSH CABINET** — beautifully finished in green Hammertone Extension which completely encloses burner—optional
- **INSULATION**—Fiberglass blanket retains heat within boiler keeps jacket cool
- **WET BASE CONSTRUCTION** — bottom sides top and rear of fire chamber are completely surrounded by water backed cast iron sections to assure maximum absorption
- **COMBUSTION CHAMBER**—Ceramic fiber light weight one piece—molded unit is factory installed eliminates assembly of heavy fragile refractory materials
- **BUILT-IN WATER HEATER**—copper coil located at hottest point to assure ample hot water for household use the year round
- **HEAT FINS** — retard upward flow of hot gases for greater fuel economy



- **FUEL CHIEF HIGH PRESSURE OIL BURNER** — featuring the Texaco Fuel Chief High Speed Flame Retention design with non-adjustable stainless steel firing head

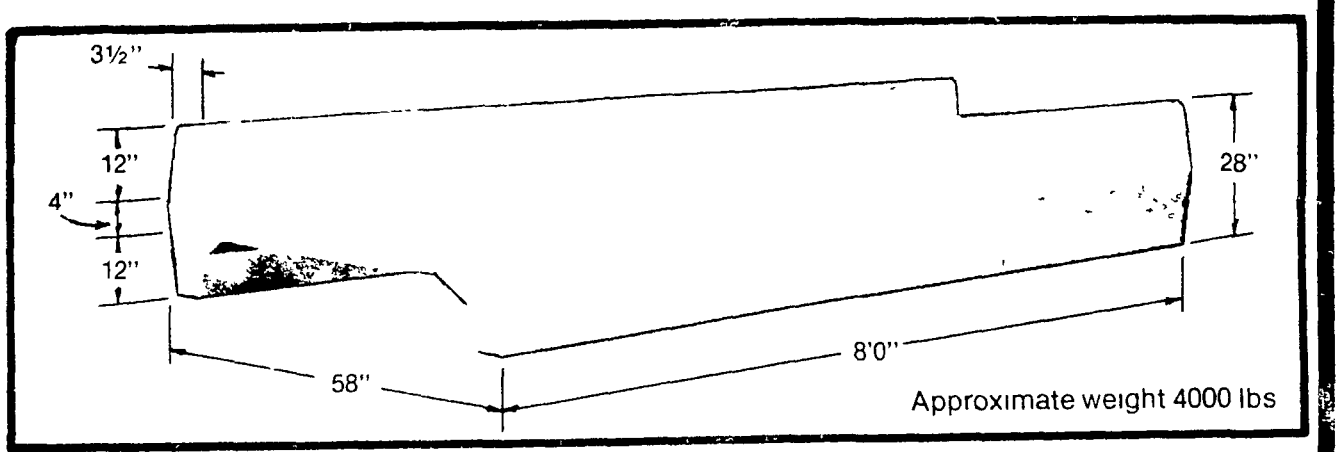
CONCRETE

"H" TYPE FEED BUNKS



Approximate weight 4000 lbs

Featuring

- Large Capacity
- Steel Reinforced
- Movable — for future expansion
- Strong enough to support a roof and feeder
- No corners to retain spoiled feed

INSTALLATION OF BUNKS

We have the necessary equipment to handle and install these heavy bunks Customer shall make roadway to feed lot passable for our delivery truck

Migrant labor episodes recollected

EDITOR'S NOTE: The following article is a contribution from a reader. The purpose of articles such as this one is to give a written and pictorial record of what agriculture was like a generation or two ago.

By MARSHALL JONES

WEST CHESTER -- During the depression years of the 1930's with an unemployment rate of 25 per cent, there was an abundant supply of local labor at potato harvest time. During the war years of the early 1940's this labor pool went into the armed services and defense industries and farmers were forced to find an alternate labor source. It was at this time that farmers were asked to produce more food but were faced with serious shortages of labor and machinery. These problems were very serious at the time, but after 35 years, one can remember some humerous events of that era.

The potato growers in New Jersey would bring large numbers of Negro help from Florida in trucks and buses to pick their crop in August and September. The New Jersey growers would dig the potatoes and contract with the crew leader to furnish labor for picking, grading, and bagging the crop for 10 cents or more per 100 pounds.

They were usually finished by October when our late variety of potatoes were ready for harvest.

I knew a potato grower near Hightstown, N.J. I needed about eight pickers and since he had about 30, he said he would select the best ones who did not have a drinking problem and I could get them early in October when he completed harvesting.

On the first Sunday in Ocotober 1943 I went to New Jersey to get them.

One of the men had an old Pontiac sedan which we had to tow to get started and gas was rationed then and they had no gas rationing stamps so I bought a tankful of tractor gas from the potato grower. Four of them loaded their meager belongings in the car and I got them started on their way with instructions for them to wait for me when they reached Trenton.

Today we hear much about the OSHA regulations in regard to migrant labor. It was quite different 35 years ago. In New Jersey they lived in a cattle shed and were quite satisfied.

When we arrived home late in the afternoon I put them in a four room tenant house with a hand water pump, an old cook stove and an old radio. For some it was their first experience with electric lights, and they said it was the best housing they ever had.

There was no furniture in the house but they said they didn't mind that. Three of them filled potato sacks with straw for beds. Three more went to work on a dead tree with a cross-cut saw and an axe and the other two quickly made a table and bench from the lumber while the cook was unloading the cars. Within an hour after arriving, the cook had a meal started on the stove.

They proved to be very good workers, and although they could not read or write, they sure knew how to count their money.

When the harvest was completed in November and the weather was getting colder they did some repair work on the Pontiac and some of them started for Florida but I doubt if the old car made it that far.

Others joined the Negro community in West Chester and went to work in the defense industries there.

The next year the U.S. was scraping the bottom of the labor barrel and large numbers of Jamaicans were imported to help with the harvest. Those for Delaware and Chester Counties were housed in the old Delaware County Prison in Media. I hauled about a dozen the 14 miles to work each day in a stake body truck with a canvas top and bales of straw for seats.

The first day there was a real trouble maker in the group and after we eliminated him they worked fairly well but not as good as the Florida group the year before.

One October morning the temperature was just above the freezing mark with a very heavy frost. They thought it was snow which they had never seen before. They said it was too cold to work but as some potatoes were already dug I persuaded them to pick and load them on the wagon which they did with much grumbling and complaining about the weather. I took the wagon load to the barn and when I returned to the field no one was in sight, I looked into the truck and all I saw were the straw bales which were moving. I pulled them aside and such a sight I have never seen before or since. All the Jamaicans were on the floor all wrapped around each other like a bunch of snakes trying to keep warm. Needless to say they refused to work anymore that day and I took them back to the warm jail. I was really glad when the potato harvest was finished that year.

In 1954 there were several hundred German prisoners of war in a camp near the airport in Philadelphia.

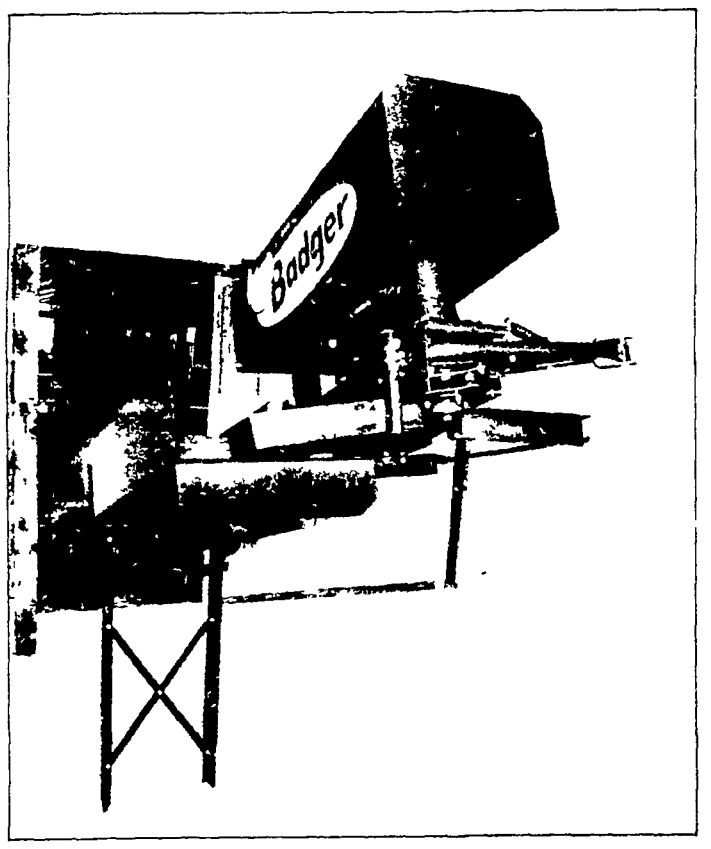
STORMOR

Quality Built to Last Longer



A barn cleaner's an "everyday" machine. Badger builds 'em to last

Cleaning barns is part of your everyday routine. Badger keeps it routine. When you're running tight, Badger keeps you on-schedule with a dependable, trouble-free barn cleaner.

Badger's chain is designed to operate smoothly with minimum wear. Every link is heat-treated forged steel, joined by heavy carbon-steel pins. The closed links reduce chain stretching...so there's no need to clean your barn twice a day, if you have a long installation. Badger chain is built to carry a full load.

Broilers up 6 per cent

HARRISBURG – Pennsylvania broiler chick placements during the week ending April 1, 1978 were 17 per cent above the placements a year earlier, according to the Pennsylvania Crop Reporting Service.

Placements of broiler chicks in the commonwealth were 2,135,000, seven per cent more than in the previous week. Average placements during the past ten weeks were 13 per cent above a year earlier.

Placements of broiler chicks in the 21 poultry states were 73,429,000, one per cent above the previous week and four per cent more than the same week a year ago.

Average placements of broiler chicks in the 21 states during the past ten weeks were four per cent above a year ago. Broiler-fryers slaughtered in Pennsylvania under federal inspection during the week ending March 22 totaled 1,748,000, with an average weight of 3.89 pounds.

Grange to hold open house

QUARRYVILLE – The public is invited to an Open House of Fulton Grange 66 at their hall in Oakryn, April 24 at 8 p.m. This will be in observance of National Grange Week which will be held across the nation from April 23 to 29. Mrs. William Rhoades, lecturer, will present a special program followed by refreshments and a social time.

The program will include a history of the Grange movement by Mrs. David Knight; and a skit entitled "Time to Rewind". Clifford Holloway Jr. will give a talk "Summary of Current Activities of Fulton Grange". Honey Brook Township Grange 1688, Chester County, will present an American flag and a National Grange flag in a traveling flags ceremony being conducted by the Pa. State Grange.

Also in observance of National Grange Week, Fulton Grange will display a poster showing various community activities they have participated in

Fulton Grange 66 has been in existance 104 years and is a part of the National Grange which was founded 111 years ago. The Grange is proud of its contributions to agriculture and rural America.

Fulton Grange in recent years instigated movements to secure the Solanco Famiy Health Center in Quarryville, the Norman Wood bridge across the Susquenna River at Holtwood, rebuilding the Pine Grove bridge and the bridge on Route 222 at Goshen, securing the warning traffic signals at the instersection of Routes 272 and 372 at the Buck, supporting the Scouts, FFA, 4-H clubs, Quarryville Library Center, holding a go-to-church night annually, lending financial support to the Lancaster County Farm and Home Center, Solanco F.H. Center, Solanco Fair, Miss Solanco pageant, Meals on Wheels and many other chaitable organizations.

Life Becomes Extinct

Approximately 90 per cent of all the forms of life that have existed on earth have eventually become extinct

Skating party set for Sun.

HARRISBURG – An open roller skating party is being sponsored by the Dauphin County 4-H Clubs on April 23.

The party will be held from 4:30 p.m. - 7 p.m. at the Star Skating Center, 7601 Derry St., Harrisburg.

Proceeds will go toward transportation costs for an exchange trip between 4-H'ers in Bennington County, Vermont, and Dauphin County planned for this Summer.

Advance tickets are $1.50 and can be obtained from Theresa Comiskey at 717-566-3105. The cost will be $1.75 at the door. The public is invited.

bid a lamb up to $42 and a ewe/lamb pair to $100. Of course, the bidding could have gone on for several more minutes, but Jugan sold the animal prematurely to keep the price realistic.

After each hour demonstration, Jugan also answers questions from the group. At the playschool, those questions included: "Are you going to shave the little lamb?" to "Does the mother get cold when you shave her?" to "What's that stuff you put on your clippers?" Following each inquiry, Jugan responds willingly.

After 10 years, Jugan knows what to expect, for the most part, although something new can pop up any time.

Last week Jugan did six demonstrations in schools and said that he travels anywhere from Kimberton to Allentown to Reading to Montgomery to Bucks counties. He's also been doing work with intermediate units, and feels that these "special" children have a lot to benefit from the program.

But, anyone, really, can gain knowledge from his program. So, for this farmer/real estate agent/auctioneer/educator, the time involved is well spent.

For further information, Jugan can be reached at Prizer Road, Kimberton. Phone 215-933-7507 or 827-7608.

• Sheep and wool growers learn of Thiobenazole

By LAUREL SCHAEFFER
Staff Correspondent

LEESPORT, Pa. – The sheep industry in the United States looses 26 million dollars a year because of worm infestation. These unnecessary losses are reflected largely in the loss of market lamb weights and wool production, learned Berks County Sheep and Wool Grower producers. In most instances this problem can be easily remedied by the use of a readily available drug, Thiobendazole.

Representating the Merek Animal Health Division of Ralway, New Jersey, was C.E. McDougall, who addressed the sheep producers April 12, at the Berks County Agricultural Center.

McDougall presented a film prepared by the Merek Company on the causes, life cycles, and prevention of severe parasite infestations. The film also covered the results obtained by the company's research division on worm control by using Thiobendazole.

Thiobendazole is a wide spectrum drug which controls six of the more common parasitic worms infecting sheep.

It causes no harmful effects or set-backs to the animals, McDougall told the producers. There is no sign that immunity is built up when the drug is used continuously and not alternated with other drugs, he added.

The drug comes in several forms and can be administered quickly and easily as a drench or bolus. The company representative also showed the sheep producers a new form of the drug which has only been approved for cattle but seems to be the fastest, easiest way for worming livestock. This drug is in a paste form and administered directly into the mouth by a simple apparatus much like a chalking gun.

However, one parasite that Thiobendazole does not control is the tapeworm, the sheep producers learned. It is effective in controlling dry rot in potatoes, mold on citrus fruit, bananas, and bulbs, and as a fungicide for soybeans and mildew inhibitor in paint.

Following the presentation by McDougall, the directors of the Berks County Sheep and Wool Growers Association formed a panel to answer questions posed by area sheep producers. The panel agreed that it is a better practice to select ewes to use for breeding that have good milking ability than to rely on their twinning preformance. "You need milk to feed them," they stated.

Also discussed was the reluctance of some veterinarians to work on sheep and the problems of intestinal blockage.

It was also announced during the meeting that the association has bought it's own wool bagger and one will not have to be rented for the wool pool this year.

Penn State Ag Alumni to meet

UNIVERSITY PARK – Alumni of the College of Agriculture at Penn State will have an opportunity May 6 to visit the Milton S. Hershey Medical Center, see the Penn State Blue-White football game at Hershey, and attend the 11th annual meeting of the Ag Alumni Society.

The annual alumni meeting and the Blue-White scrimmage are normally held together at University Park. The site was changed due to work of expanding Beaver Stadium at the campus.

The annual business meeting will take place at 9:15 a.m. May 6 in a Medical Center conference room. Presiding will be College of Agriculture alumni president Al J. Vigilante, of Harrisburg. A registration desk will be set up in the Medical Center from 8:30 to 10:30 a.m.

A color slide tour of the Medical Center will follow the business meeting. Alternate bus tours of Hershey's many attractions will be available to alumni members not wishing to attend the afternoon football game.

The annual banquet will take place in the Hotel Hershey, starting at 6:30 p.m. Edward R. Book, Presidend and Chairman of HERCO, Inc., Hershey, will be the banquet speaker. He will discuss HERCO operations as well as alumni relations. Book is a trustee of Penn State and currently serves as President of the overall Penn State Alumni Council.

For further information, one can contact Jack MacMillan, Acting CAAS Executive Secretary, 237 Agricultural Administration Building, University Park, Pa. 16802. The telephone number is 814-865-2541.

Potato Toppings

Here's a list of slim potato toppings Toasted sesame seeds, whipped butter and a dash of poppy seeds, a small amount of slivered pimento and green pepper, a spoonful of stewed tomatoes and coarsely grated cheese, melted butter or margarine thinned with lemon juice, or, sliced mushrooms marinated in low-calorie dressing

Apricot

Dried apricots are a tasty, concentrated source of Vitamin A

WHAT'S NEW

MANURE AGITATOR

The Model 277 liquid manure agitator that mixes liquids, sediments and surface crust into a slurry mixture has been released by the Patz Company of Pound, Wis. A three-bladed 24 inch propeller at the end of 17 foot boom arm is driven by a standard 540 r.p.m. power takeoff. Three-point hitch framework reinforced with steel plate has a telescoping support pipe to adjust entry angle of agitator and align the p.t.o. shaft. Support stands, propeller stand and P.T.O. shaft with self-locking yoke are standard equipment, says the manufacturer.

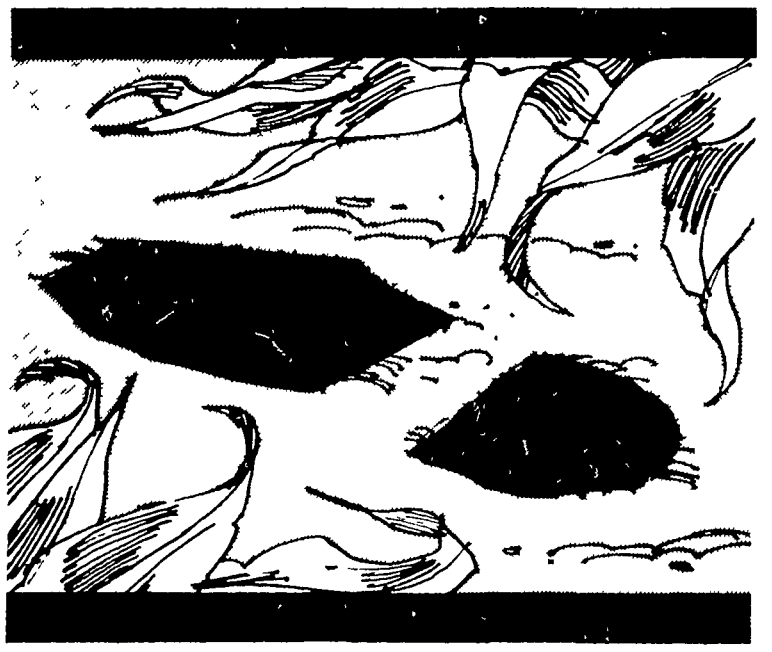
Pre-emergence tank-mix combination controls both grassy and broadleaf weeds

Banvel®+Lasso®*



a giant first step toward total weed control in field corn

Successful on millions of acres where corn is the major crop, the Banvel + Lasso herbicide combination can give you "near perfect" (90-100 percent) control of a wide spectrum of grassy and broadleaf weeds, when used according to label directions.

Banvel + Lasso herbicide is compatible with most fluid fertilizers. It needs no incorporation. There is no carryover.

Take a giant step toward total weed control. Call about the Banvel + Lasso combination. Remember, the "near perfect" herbicide is the one you build...starting with Banvel herbicide...from Velsicol.

*The combination is effective on all major soil types except light sandy soils Lasso is a registered trademark of Monsanto Company

To achieve best results be sure to read understand and follow the label

Grange youth nite held

WOMELSDORF – Marion Grange 1853 held their regular meeting on April 12. The youth presented a program with the following individuals as officers: Rebecca Davis, master; George Sattazahn, overseer; Karen Sattazahn, lecturer; Kevin Sattazahn, gatekeeper; Nick Sattazahn, steward; Larry Rittle, assistant steward; Susie Rittle, lady assistant steward; Sharon Zechman, chaplain; Mary Moyer, secretary; Ruth Miller, ceres; Ruth Katzaman, pomona; Debbie Troutman, flora; Dennis Sattazahn, Norman Manbeck, executive committee; and Nancy Kieffer, pianist.

Dennis Sattazahn, legislature chairman, spoke on "Legislature: the power of the people."

MARS daughters are actually averaging more than 1400 lbs. over contemporaries. We expect his proof to keep going up.
MARS daughters excel in rear udders, teat placement, teat size, strength and capacity, and feet and pasturns.
What bull should you use for higher production? MARS.
What bull should you use for better type? MARS of course.

For more information on MARS and our newest Elevation son, Chris, check pages 88 and 89 of the Elevation issue of the Holstein Fresian World.

MARS is available on a regular basis.

Bob Butera doesn't need on-the-job training. He's the only Republican who's prepared to be a good Governor.

Only Bob Butera has the experience and the know-how needed to immediately change our state government for the better.

Bob Butera was the Republican Majority Leader of the State House of Representatives in 1973-74 and helped get us our only tax cut in more than two decades. He's been the leader of the fight to get state spending under control and to root out corruption.

Bob Butera has worked hard for fifteen years learning what's wrong with state government . . . what must be changed . . . and he knows how to change it. The last new, fresh-face Pennsylvania had for Governor . . . was Milton Shapp. That's enough.

Bob Butera . . . he's ready to be a good Governor.

Bob Butera for Governor
Republican Primary / Tuesday / May 16

Nutritional labeling

LANCASTER – At a breakfast held in his honor at the Landis Valley Motor Inn, Sixteenth Congressional District Republican Primary candidate, Norman O. Aamodt, spoke out in opposition of the nutritional labeling of package foods as proposed by present congressman Bob Walker. Aamodt indicated that the proposed regulations being bureaucratic in nature will increase the price of food and will result in additional synthetic additives to "boost nutrients". Aamodt also questioned several federal diet recommendations. For instance, he opposes federal efforts to "blackball" wholesome foods such as milk, eggs, beef and pork on debatable evidence as to their health effects.

During a question and answer period that followed the breakfast, Aamodt spoke in favor of the Delaney Amendment, which is designed to protect the safety and purity of food. Mentioning the rising in an alarming rate of cancer in children and adults Aamodt said, "I deplore the efforts of certain congressmen and special interest groups to keep suspected chemicals in the American diet."

Chester Co. 4-H leaders applauded

UNIONVILLE – A 4-H thanksgiving dinner was held on April 11 at the Stone Barn in Unionville to recognize 4-H leaders, teen leaders, and other 4-H workers for their years of volunteer service to the 4-H youth of Chester County.

Eleven leaders received special recognition for their 186 years of combined service. They were Leon Wilkinson, Landenberg; Charles Wollaston, Toughkenamon; Mrs. Harold Thompson, Coatesville; Mrs. Calvin Brown, Oxford; Mildred Seeds, Downingtown; Mrs. Edward Hoopes, West Grove; Mrs. Robert Trostle, Avondale; Mrs. Horace Wilson, Kimberton; Mrs. J.R. Minshall, Avondale; Mrs. J.M. Burkhart, Avondale; and Mrs. Edward Lafferty, Hockessin.

The even was sponsored by the National Central Bank and was highlighted by a multi-media slide presentation on "America the Beautiful" by Eshleman Studio, Manheim.

Tributes to leaders were offered by Roger Davidheiser, Mary Ellen Rehrman, Darvin Boyd, Janet Renner, and Glenn Shirk.

Dauphin County DHIA Monthly Report

MARCH 1978

Stoney Lawn Farms, Paul Crissinger, and John Hertzler, all Dauphin County Holstein breeders, share top honors in the March 1978 DHIA summary. Hertzler posted the top butterfat average with his 63 cows; Stony Lawn had the high record cow for milk production, and Crissinger is owner of the high butterfat lactation for the month. Following is the summary:

OWNER BREED	NO COWS	% DAYS IN MILK	LBS MILK	% FAT	LBS. FAT
John Hertzler H	62.9	97.7	54.9	4.2	2.28

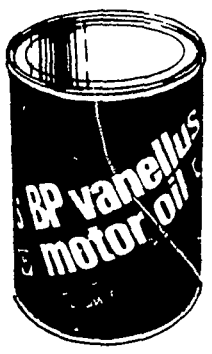
SPRING
FARM LUBRICANTS
SALE

EFFECTIVE NOW THROUGH APRIL 29, 1978

One for all.

BP VANELLUS MCS 3



BP Vanellus MCS-3 Motor Oil, one oil for all engines, is a new multi-purpose engine oil that meets or surpasses every current requirement or standard now in use by engine manufacturers or military agencies. With this new oil, any internal combustion engine, with the exception of 2-cycle gasoline engines, can be safely lubricated. Meets or exceeds API SE/CD requirements, MIL-L-2104C and MIL-L-46152, Ford M2C101-C, GM 6136M and all Diesel engine manufacturers' requirements.

Keystone Expo Center gets candidate support

YORK -- Lieutenant Governor Ernest P. Kline has come out flatly for a new Keystone Exposition Center as an investment in the future of Pennsylvania to bring more jobs, business and revenues into the state. Other Pennsylvania gubernatorial candidates to have come out in favor of the Center are Butera, Hager, Thornburgh, and Casey.

The May 16 primary candidate for the Democratic nomination for the office of Governor gave his view on step-by-step development of a new Center for the benefit of all the people in the commonwealth in response to a letter from Norman F. Reber, editor emeritus of Pennsylvania Farmer magazine and chairman of the Keystone Exposition Center Committee, a spearhead action group representing 18 state organizations pushing to put Pennsylvania in the forefront again as the exhibit center of the Northeast, a position it has lost from ten years of delay, deterioration and destruction.

The lieutenant governor, in noting that the present Farm Show Complex has served us well, stated a modern facility was urgently needed to supply more space to present exhibitors and to take care of a waiting list of over 200 groups who would use a new and expanded Center.

"The exposition and convention business is a lucrative market. If Pennsylvania does not make an effort to accommodate groups who want to have their events here, we stand to suffer a substantial economic loss," the gubernatorial candidate said. "Cities and states across the country are building new and modern convention and exhibition facilities. Pennsylvania must stay competitive with them," he added.

In his statement, Kline referred to a state-financed study that established a new facility near the present Complex would "not only be the least expensive to develop, but would generate over $13 million more in annual general business throughout Pennsylvania."

"Both the need and the financial return for the proposed Keystone Exhibition Center have been established. We now need leadership to turn these plans into reality," the lieutenant governor said.

Chairman Reber commented that the $13 million annual gain in cash flow from a new Center over the old facility was a figure determined more than ten years ago when the state study was made. Building past and future inflation factors into that figure, Reber estimates the net increase in cash flow from a new center over the present one could readily exceed $25 million. Since the study indicated that 80 per cent of the total cash flow was the result of tourism from out of the state, this would mean a $20 million stimulant to the sluggish economy of the Commonwealth and bring into its treasury stepped-up sales and income tax revenue in much greate amounts than would b required for debt service or phased development of a new center, Reber stated.

In contrast to this brigh outlook from a new center Reber cited the gloomy outlook of the old center, the mountainous maintenance costs on deteriorating anc flood-ravaged buildings with shrunken exhibit space due to walls built to meet fire safety regulations.

Carolyn Rutter briefs members of the York County Farmers political education committee.

York County Farmers Assn. conducting registration survey

YORK – With the Spring primary election looming ahead, the political education committee of the York County Farmers' Association has been focusing on voter registration of the membership.

Carolyn Rutter, Dover R2, is heading up the committee which just completed a random survey to determine the percentage of farmer-members exercising their voting privilege.

Of the 80 persons contacted in the survey, only nine were currently registered to A large majority of the registered indicated th they do consistently vo in both the general and primary elections.

Eugene M. Kilgore, Airville R2, was appointed chairman of a subcommittee to contact gubernational candidates running for party nominations in the upcoming primary. Each candidate will be questioned on a few key issues, with replies to be sent in printed form to the countywide membership for pre-primary study.

All county members not currently registered to vote will be personally contacted in upcoming weeks by members of the political education committee.

The York County Farmers Association stresses that it is bi-partisan and backs no specific party or candidates in political campaigns.

Horse seminar slated for May

HUMMELSTOWN – All horse and pony owners are urged to attend the "Care and Preventive Medicine of the Horse" at 7:30 p.m. on May 11 at Lower Dauphin High School, Hummelstown.

The seminar is being sponsored by the Dauphin County 4-H Veterinary Science Club in cooperation with the Capital City Veterinary Medical Association.

Topics to be discussed include "Care and Feeding of Mares and Foals", "Proper Worming and Vaccination Program", and "Pennsylvania Coggins Testing Program."

There will be no charge and the seminar is open to the public. Call Linda Gilman (717-566-8467) or Karen Isaacman (717-236-9722) for additional information.

Baam approved for Pa. pear growers

HARRISBURG – State Agriculture Secretary Kent Shelhamer says that the Pennsylvania Department of Agriculture has received notification from the Environmental Protection Agency that Pennsylvania's pear growers have been granted permission to use the pesticide Baam for control of pear psylla.

Shelhamer said that the use of Baam was granted under Section 18 of the Federal Insecticide, Fungicide and Rodenticide Act, which allows the emergency use of non-registered pesticides for severe insect problems.

The Agriculture Secretary said he was pleased that the EPA had acted on this request on behalf of our state's pear growers. "Pear psylla has been a serious problem for our pear growers. The use of Baam in emergency conditions should give our pear growers a better chance to adequately control this pest," he said.

Pennsylvania growers must be certified as private applicators under the requirements of the Pennsylvania Pesticide Control Act of 1973 in order to apply Baam, Shelhamer said. In addition, authorization for the use of Baam must be made following an emergency determination made by a pest management consultant.

Under Pennsylvania law, management consultants are required to obtain a license. "A testing and examination program has been scheduled at Biglerville, Adams County, for May 1," Shelhamer said, "to accommodate anyone who wishes to be licensed as a pest management consultant."

Individuals who wish to be licensed as pest control consultants for the use of Baam against pear psylla, should report to the Biglerville location. A Pesticide Inspector from the Department of Agriculture will be present to supervise tests and to issue licenses. The fee for a pest management license is $25.

Shelhamer said that pest management consultants would make determinations on emergency conditions by the following criteria:

"The consultant must decide that the jucidious use of currently registered pesticides for pear psylla are not providing adequate control for the pest. In a particular orchard, a majority of the trees sampled must have ten per cent or more of the shoots in the scaffolding infested with nymphs of the pear psylla. A minimum of ten trees must be sampled in each orchard."

Shelhamer said that after a determination of emergency conditions is made, the consultant will sign a form authorizing the grower to purchase Baam. Pesticide dealers will be responsible for keeping accurate records of the amount of Baam received and sold.

Shelhamer said that Dr. Gerard Florentine of the Department's Bureau of Plant Industry is coordinating the Baam program. All inquiries regarding the use of Baam, pest management consultant tests, or requirements for pesticide application licenses should be directed to the Bureau of Plant Industry, Pennsylvania Department of Agriculture, Room G-13, 2301 N. Cameron Street, Harrisburg, Pa. 17120, or by calling 717-787-4843.

April 30 transfer date

DOVER, Del. – Delaware farmers have until April 30 to transfer their 1976 crop corn and sorghum under loan into the grain reserve program, according to Joe Penuel, state executive director of the Delaware Agricultural Stabilization and Conservation Service (ASCS). He also reminds farmers that May 31 is the final day to obtain price support loans on 1977 crop corn and sorghum.

Working with the feed grain and wheat set aside program to improve the prices farmers receive for their crops, the reserve program isolates grain from the market until prices rise to stated levels, or for three years. Farmers receive advanced storage payments annually of 25 cents per bushel for wheat, corn, barley, and sorghum, and 19 cents per bushel for oats. While in the reserve, the grain is subject to the same storage requirements as grain in the regular price support loan program. It can be stored either on the farm or in commercial warehouses, Penuel says.

Nationally, about 76 per cent of the 330-million-wheat reserve goal has been reached as of March 23. A survey of ASCS field offices during this period showed that 250.8 million bushels of wheat had been placed in the reserve.

ASCS is currently accepting applications for the set aside and the grain reserve program.

WHAT'S NEW

BIOLOGICAL ADDITIVE FOR SILAGE

The addition of only 35 cents worth of the additive, Carbozyme, will yield an equivalent of $3.00 saving in feed cost per hundred pound weight gain for fed animals, according to Bioferm International, Inc. of Moorestown, N.J. This is based on controlled tests conducted by cooperating ranchers. In addition they found that heifers gained weight twice as fast as animals fed with untreated silage.

The action of Carbozyme is to help assure the biological preservation of green silage. It is of primary value for the farmer, rancher, feed lot operator and dairyman. Carbozyme is composed of a balanced blend of natural microorganisms which have been adapted and stabilized for optimal activity in silage preservation. It is supplied as free flowing, dehydrated tan powder which is merely added to the silage as it is being charged into the silo.

Forage from alfalfa, legumes, grains and grasses respond quite favorably to treatment with Carbozyme. Even green corn silage has demonstrated excellent nutrient preservation. In addition to preserving the silage, Carbozyme is said to result in approximately eight per cent protein digestibility when compared with identical untreated silage. And there is a visible improvement in the digestibility of other nutrients as well, claims the manufacturer.

Carbozyme produces an anaerobic atmosphere by replacement of the oxygen by carbon dioxide and a mild acid condition which inhibits the unwanted bacteria and favors the growth of the highly active and beneficial lactic acid cultures.

It has been observed that treated silage peaks its temperature at 92 degrees Fahrenheit while untreated silage reaches 122 degrees with resulting nutrient loss.

For additional information on Carbozyme, contact Dr. Howard E. Worne, Bioferm International, Inc., 209 Chester Ave., Moorestown, N.J. 08057.

ROUND BALER

What Vermeer officials describe as "a totally redesigned giant round baler, is now available from the Pella, Iowa firm.

The new Vermeer 605F features several major improvements which allow the operator to harvest an extremely tight, weather-resistant round bale that retains its shape without excessive settling. Both spring tension and hydraulic pressure on the belts maintain a tightly packed bale formation from the core to the outer layers. A new improved, open throat design starts the bale instantly .. without waiting for hay to gather in the chamber. The unit also includes hydraulic twine tie, a bale counter, an adjustable tongue for different draw bar heights, plus new heavy-duty shafts, bearings, and chains as standard equipment on the machine

The 605F makes a bale that measures a full six feet in diameter and five feet wide, and weighs 2000 pounds (16% moisture alfalfa)

Peach Blossom festival enjoyed

GATCHELVILLE -- What's fuzzy, plays the guitar and shakes a lot?

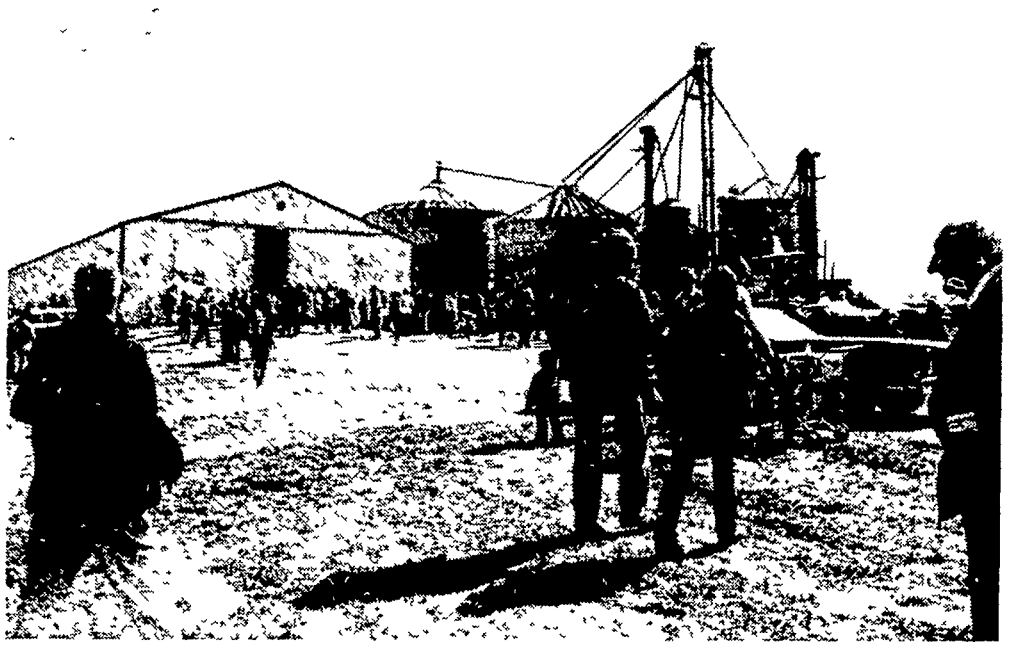
Elvis "Peachley."

That was one of the riddles invented by southern York County elementary school youngsters who took part in an art competition held in conjunction with the Maple Lawn Farms Peach Blossom festival last weekend.

Hundreds of colored, painted, and chalked creations decorated the walls of the crafts and concessions barn which was packed with browsers hunting peach-related souvenirs and gifts.

The annual festival played this year to sunny skies accompanied by brisk cool winds. Over four thousand visitors turned out for the April 15 and 16 open house, termed the "best event ever" by the Paul McPhersons, who own the orchard and grain operation.

Especially popular with both children and parents was the petting zoo sponsored by the Mt. Nebo youth group. Besides the usual chicks, ducks, geese, kittens, pigs, goats, and calves, there were these eye-opening exhibits: fillet of sole (a lone shoe displayed atop a cardboard box), the baby rattler (a child's toy rattle hidden in a box), and a quarter horse (a small statue of a horse with a quarter taped to its side).



A weekend of sunny Spring weather brought the crowds to visit Maple Lawn Farms annual peach blossom festival.

Two tractors kept busy pulling wagons loaded with visitors touring the orchards for a look at the pruning and spraying techniques. Although cold weather kept the blossoms from opening in time for the celebration, most families went home with handfuls of branches for forcing into bloom.

"A lot of people thought they could stick those branches into the ground and have a peach tree of their own," said Gail McPherson. "It gave us the chance to explain to many visitors that growing an orchard just isn't that simple."

The sounds of bluegrass music floated over the crowd as the Sizemore family of Fawn Grove entertained. Farm equipment on display for the mostly-urban festival goers included planters, a high-clearance sprayer, and a combine.

Lara Frost, fourth grader in Roger Wilson's Delta Peach Bottom class captured first prize in her class and grand prize in the Peachy Art Contest. Her colorful composition of branch, peach, butterfly and satisfied worm stood out among other entries.

Over 350 elementary students in the South Eastern School District entered the contest with 16 classes being represented in the various buildings.

Chester Co. 4-H'ers go to state days

WEST CHESTER – Young adults from the Commonwealth's 67 counties, including three from Chester County, have had an opportunity to broaden their knowledge of the functions of state government when they participated in State 4-H Capitol Days in Harrisburg on April 3 to 4.

The Chester County delegates selected to take part in the statewide event were: Janet Latshaw of Spring City, Jonathan Weinstock of Phoenixville and Warren Hilberg, also of Phoenixville.

220 watch as Kennard-Dale FFA honors own

FAWN GROVE – The members of the Kennard-Dale Future Farmers of America held their annual parent/member banquet on April 5 at the Kennard-Dale High School. A family style ham dinner was served to about 220 people.

The chapter officers planned and took part in the banquet program with chapter president Paul Knight serving as toastmaster.

This year's outstanding members were: John Marsteller, Stewartstown R3, star greenhand; Robert Stewart, chapter star agribusinessman; Paul Knight, outstanding FFA member for 1977-78; Rich Hushon, Chapter star farmer, and Dean Miller, Dekalb award.

Flower bulb awards were presented to John Marsteller, Jr., son of Mr. and Mrs. John Marsteller, Sr., Stewartstown R3, high salesman; Howard Richardson, son of Mr. and Mrs. Clarence Richardson, Delta R1, second place; and Tim Rehman, son of Mr. and Mrs. Fred Rehman, Stewartstown R1, third place.

Citrus sales award winners were also recognized. High salesman Jeff Wilson, son of Mr. and Mrs. C. Earle Wilson, New Freedonm R2; second place, Mark Griffith, son of Mr. and Mrs. William Griffith, Delta R1; and third place, Stephen Krick, son of Mr. and Mrs. Paul Krick, Stewartstown R3.

Garden seed sales winners were John Marsteller, Jr., high salesman; second, Jeff Wilson; and third, Bradley Rineholt, son of Mr. and Mrs. Sterling Rineholt.

Field seed sales awards were presented to Keith McFatridge, son of Mr. and Mrs. Larry McFatridge, Stewartstown R3, high salesman; John Baldwin, son of Mr. and Mrs. John Baldwin, Delta R1, second place; and Cindy Bowser, daughter of Mr. and Mrs. Richard Bowser, Stewartstown, third place.

John Bach, guidance counselor at Kennard-Dale, presented scholarship awards to the top agriculture student in each grade. Receiving these awards were - Keith Bowles, son of Mr. and Mrs. Charles H. Bowles, Fawn Grove R1; James Knight, son of Mr. and Mrs. George Knight, Jr. Airville R2, 10th grade; Gary Mink, son of Mr. and Mrs. James Mink, Fawn Grove R1, 11th grade; Dean Miller, son of Mr. and Mrs. Harold Miller, Jr. Stewartstown R3, 12th grade.

Honorary Chapter Farmer degrees were conferred by the officer team on Jerry McCleary, outstanding farmer chapter member and past president of the agriculture advisory committee, and Wade Manifold, farmer owner of Manifold's Feed Mill in Fawn Grove, a continued supporter of chapter activities.

Lee Schaeffer, vice president, North Central Region Pennsylvania FFA, was guest speaker for the evening.

Chapter officers were recognized for their service

(Continued from Page 139)

Top award winners from the Kennard-Dale FFA include: (left to right) Rick Hushon, chapter star farmer; Paul Knight, outstanding FFA member; John Marsteller, Jr., star greenhand; Robert Stewart; chapter star agri-businessman; and Dean Miller, Dekalb award.

NDC discovers, answers, and educates for milk

By JOYCE BUPP
Staff writer

BALTIMORE — Because of an increasing awareness of foods and diet, the American public needs accurate and useful nutritional information, based on long-range scientific studies.

"There is no question in anybody's mind that dairy foods make a significant contribution and supply a significant amount of nutrients," says Dr. Robert Katz, assistant director of National Dairy Council's division of nutrition research.

Dr. Katz was the featured speaker during the annual meeting of the Dairy Council of the Upper Chesapeake Bay, Inc., held last week at the Cross Keys Inn.

National Dairy Council is an educational arm of the dairy industry, dedicated to nutritional research through "discovering, answering and education." Research is carried out through three avenues: professional contacts, with laboratory personnel and scientists joining together in research work; library research, where a compilation is made of articles concerning nutrition; and through grants-in-aid, with 25 research and study programs currently being funded across the country.

One research study centers on calcium deficiency. Statistically, 74.6 per cent of the total civilian consumption of calcium comes from dairy products.

Among the ever-increasing senior citizen segment of the population, 25 per cent of the women and 12 per cent of the men currently are affected by calcium deficiencies evidenced in

(Turn to Page 143)

Jesse Burall, Sr., left, president of Dairy Council of the Upper Chesapeake, was recognized for his contribution to the nutrition education organization during the annual meeting. Congratulating him are Judy Strehan, executive director, and program speaker Dr. Robert Katz.

March milk price to be $9.65

NEW YORK, N.Y. – Dairy farmers supplying milk plants regulated under the New York-New Jersey marketing orders during March will be paid on the basis of a uniform price of $9.65 per hundred pounds or 20.8 cents per quart. Market Administrator Thomas A. Wilson, who announced March's price, also stated that the uniform farm price was $9.87 per hundredweight in February 1978 and $9.13 per hundredweight in March 1977. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive fund (Louisville Plan) removed a total of $1,731,992.73 or $.20 per hundredweight from the dairy farmers' uniform price for March. Deductions for this fund will continue through June and will be returned in the August through November uniform price calculations.

The total amount of milk received from the 18,207 dairy farmers supplying the New York-New Jersey Marketing Area was 865,996,366 pounds during March 1978. This was more than 33.5 million pounds above last year. The gross value to dairy farmers for milk deliveries was $85,406,556.46. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers (handlers) utilized 395,830,858 pounds or 45.7 per cent of the total amount of milk for Class I. The Class I milk is used for fluid milk products such as homogenized, flavored, low-test and skim milks. For March 1978, handlers paid $11.16 per hundredweight, or 24.0 cents per quart, for the milk used in Class I products compared with $10.59 a year ago.

The balance of the milk, 54.3 per cent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid $9.04 per hundredweight.

The uniform price is based on milk containing 3.5 per cent butterfat. For March 1978, a differential of 11.6 cents was applied to the price for each one-tenth of one percent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for bulk tank milk received within the 201-210 mile zone from New York City.

Broilers up

HARRISBURG – Pennsylvania broiler chick placements during the week ending April 8, 1978 were six per cent above the number of placement a year ago, according to the Pennsylvania Crop Reporting Service.

Placements of broiler chicks in the Commonwealth were 1,885,000. The placements were 12 per cent below the previous week. Average placements during the past 10 weeks were 12 per cent above a year earlier.

Placements of broiler chicks in the 21 poultry producing states were 72,993,000. This is about the same as the previous week but four per cent more than a year ago.

Average placement of broiler chicks in the 21 states during the past 10 weeks were four per cent above a year earlier.

Broiler-fryers slaughtered in Pennsylvania under federal inspection during the week ending March 29, 1978 totaled 1,709,000 with an average weight of 4.05 pounds.

Potato stocks down

HARRISBURG – Stocks of potatoes held in storage in Pennsylvania by growers, local dealers and processors on April 1 are estimated at 1,070,000 cwt., according to the Pennsylvania Crop Reporting Service. The stocks are seven per cent less than April 1, 1977.

Disappearance during March this year totaled 530,000 cwt. compared to 750,000 cwt. disappearance for the same period last year.

In the eight eastern states, April 1 stocks of potatoes totaled 13.0 million cwt., up 23 per cent from a year ago. Maine's stocks of 11.0 million cwt. compared with 8.4 million cwt. in 1977.

Stocks of potatoes for all uses held in storage by growers, local dealers and processors in all U.S. fall production states totaled 89.0 million cwt. on April 1, 1978. This is nine per cent above a year earlier and 24 per cent more than in 1976.

Sale Mgrs. Note:

Due to health problems Mr. Jennings is selling his herd. Lack of facilities to handle his hfrs. and milking herd has not done justice to the hfrs. just coming fresh, thus the records on 1st calf hfrs. suffer. However, the animals have always matured well as many satisfied buyers of Jenningcriss animals will testify to. This herd is descended from some of the best cattle that were ever in this area. Help yourself if you need replacements.

Terms: Cash or Good Check.

Sale under cover. Lunch available.

NDC discovers

(Continued from Page 141)

loss of bone matter. Ongoing studies are looking at the incidence of falls among this age group. Findings now suggest that the falls, which frequently result in broken bones, are being caused by a breakdown and weakness in bone tissue, caused by decreasing amount of calcium in diets.

Tooth loss is another area where Dairy Council funds are conducting research. The major cause of tooth loss for people over the age of 35 is peridontal disease. Studies indicate that the alveolar bone, which surrounds the teeth, is one of the first places in the body to lose calcium. Although most doctors and dentists are resisting this theory, an accumulating amount of scientific data point to that conclusion, says the nutrition specialist He predicts that future recommendations on tooth health will recognize a combination of bacterial accumulations and calcium deficiencies as the major enemy.

Fairly new in the dairy product field is lactobacillus acidophilus milk. Dr. Albert Newcomer of the Mayo Clinic is studying test groups of milk intolerant individuals and their physical reactions to the "new" milk.

Lactobacillus acidophilus milk is also being scrutinized as a possible agent in reducing the risk of colon cancer. New data suggests that the lacto-acid drink inhibits enzymes used by the body to convert certain food products into carcinogneic (cancer-causing) products in the colon. Preliminary information shows a decrease in the incidence of malignant tumors when acidophilus milk is included in the diet.

Cholesterol, a subject which has probably stirred more nutritional arguments than any other single issue, is also getting its share of Dairy Council attention.

A study conducted by Dr. George Mann centered on the diet of the Maisai tribe, whose natural diet is very high in sour milk. Members of the tribe have very low cholesterol readings and a low rate of heart disease. Numerous studies on the cholesterol issue now have researchers beginning to accept the findings that milk drinking actually helps to lower cholesterol.

Judy Strehan is the executive director of the Maryland Dairy Council branch. Sponsoring the non-profit organization are Milk Marketing Order #4, Capitol Milk Producers Cooperative, Inc., Maryland Cooperative Milk Producers, Inc., and Mt. Ararat Farms.

Congressman returns money

WASHINGTON, D.C. – According to a report recently made available by Edmund L. Henshaw, Jr., Clerk of the U.S. House of Representatives, Congressman Bob Walker returned $54,331.33 tax dollars to the U.S. Treasury last year.

The tax money returned by Walker represents 17.6 per cent of the office allowance funds provided to him for calendar year 1977.

Each Congressman is allotted $306,441.63 per year for staff salaries, office equipment, office supplies, and general operations.

In response to an NRCC inquiry, Walker said, "Since coming to Congress, I have tried to both vote for economy in the operation of the federal government and practice economy in the operation of the 16th District Congressional office."

Plans underway for Berks County dairy princess pageant

READING – Members of the Berks County Dairy Princess Pageant Committee met recently in the home of Mrs. Leon Kirkhoff, Bernville, to formulate plans for this year's pageant. The pageant is planned for Saturday June 17 at 7:15 p m. at the Sheraton Berkshire Inn, Wyomissing.

Also discussed were various methods of informing eligible contestants so they will more readily enter. Any information on eligible contestants should be forwarded to Mrs. Kirkhoff at Bernville R3, Pa. 19506 before May 20. Committees were formed and headed by the following: Banquet Tickets - Leon Kirkhoff and Alton Rohrbach; Judging - Gail Malsbury; Banquet Chairman - Mary Kirkhoff; Publicity - Marilyn Althouse; Decorating - Sue Seidel; Cooking Contest and Butter Making - Helen Dreisbach.

Migrant

(Continued from Page 124)

They were transported to farms in Delaware and Chester Counties by school bus before and after school hours.

I had about a dozen and they were by far the best crew we ever had. They had no guard and one of the group, Herman Weifel, acted as interpreter. There were a few farmers among them but most were lawyers, doctors or engineers.

They were all equally good workers and very thankful they had been captured by the Americans instead of the Russians. They didn't expect any of the Russian captives to ever return home. They also predicted Russia and U.S. would be involved in a war in a few years.

The camp only supplied them with dry bread and cold pork side meat for lunch with instructions that they were not to receive any more food. I soon learned that they couldn't do much hard work on that meager diet so regardless of regulations my wife cooked them a hot meal with plenty of meat every day and their work capacity increased over 100 per cent.

I also found that a pack of cigarettes and a bottle of beer, also forbidden, produced results worth many times what these items cost.

I corresponded with the interpreter for several years after the war and sent him medical supplies and other things which his family couldn't get in the post war years behind the Iron Curtain in East Germany.

SATURDAY, APRIL 29

At 12:00 Noon

Located in Mifflin Co., 4 miles West of Belleville, Pa., or 3 miles East of Allensville, Pa., along Route 655.

35 HEAD MILK COWS

32 Holsteins (5 Registered) - 3 Brown Swiss

A good number fresh November thru March, 4 due in April and 3 in May.

A lot of these cows have milked over 80 lbs. per day and several peaked in the 90's.

12 fresh with 1st calf and 8 are 2nd calf cows

Special Mention: Registered Elevation from an Astronaut Dam milking 70 lbs with 1st calf, a nice minuteman from an Astronaut Dam; a lot of good grade cows from unit sires

This is a top herd never on official test, but shows a lot of dairyness.

Pregnancy Checked 30 Day Health Test

Horses

Reuben Stoltzfus will offer 6 good standard bred driving horses following the cow sale.

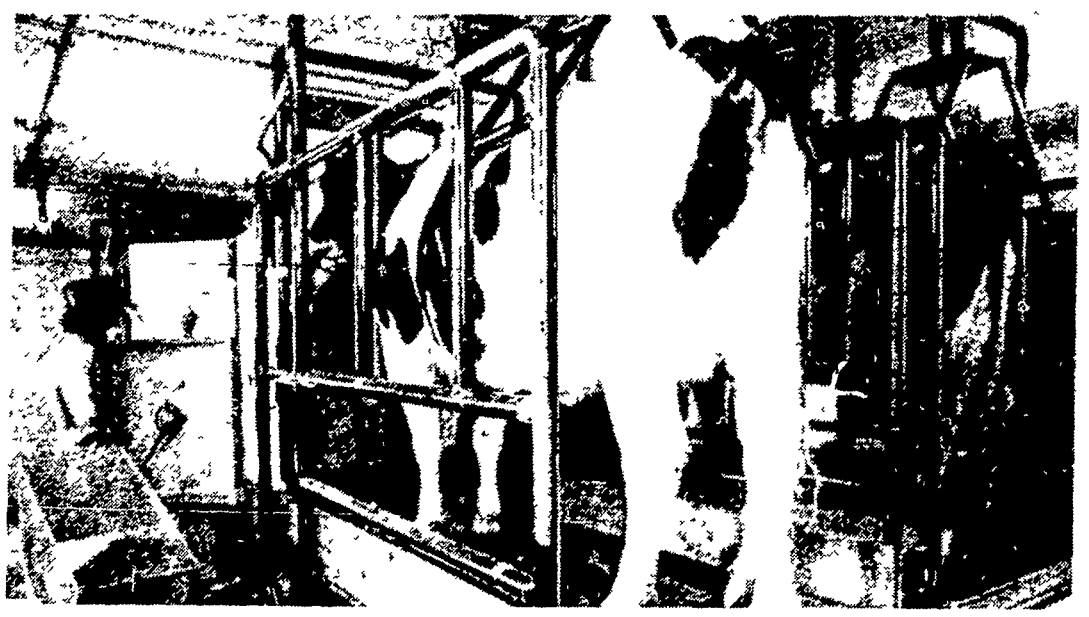
YOUR PURINA DEALERS INVITE YOU TO ATTEND

PURINA'S REGIONAL* DAIRY CONFERENCE

MONDAY & TUESDAY, JUNE 26-27
AT PURINA'S 820 ACRE GRAY SUMMIT RESEARCH FARM
NEAR ST. LOUIS, MISSOURI

TOURS & DISCUSSIONS INCLUDE:
- Dry Cow Unit
- Pit Silos
- Milking Parlor
- Milk Cow Metabolism Unit
- Calf Metabolism Unit
- Calf Barn
- Pollution Control
- Breeding of High Producing Cows

DISCUSSION LEADERS:
- **DR. J. P. (Jim) EVERETT** - Director, Purina Dairy Research
- **DR. AL KERTZ** - Manager, Purina Dairy Research
- **DR. LARRY PREWITT** - Manager, Applied Nutrition
- **DR. BOB DAHLGREN** - Veterinary Services Department
- **BRUCE RYDEEN** - Product Group Director, Dairy Chows
- **CHARLEY BROCK** - Director of Technical Services, Ralston Purina Company



Gray Summit milking cows metabolism unit. This research unit measures the cows ability to digest and use various feedstuffs. All feed and water intake is carefully measured-urine and feces are collected - and finally milk quantity is recorded and quality analyzed to determine cows response to diet changes.

Palatability of dairy feeds is one of Purina's keys to top milk production. In this picture, Dr. J. P. Everett works with one of his able-bodied assistants.

TOUR COST - $220 PER PERSON

INCLUDES:
JET LINER
ROUNDTRIP FROM HARRISBURG
MEALS AND LODGING

RESERVATIONS MUST BE MADE BY MAY 1.
